

## 5GHz BAND LOW NOISE AMPLIFIER GaAs MMIC

### ■ GENERAL DESCRIPTION

NJG1148MD7 is a 5GHz band low noise amplifier GaAs MMIC designed for wireless LAN, wireless image transmission and Intelligent Transport System.

The NJG1148MD7 has a LNA pass-through function to select high gain mode or low gain mode by low control voltage operation. Within the wide dynamic range from 4.9~5.95GHz, the NJG1148MD7 achieves low noise figure and high linearity with fewer external components. The ESD protection circuits are integrated into the MMIC. They achieve high ESD protection voltage.

A small and ultra-thin package of EQFN14-D7 is adopted.
