

## 1.8V Operating Voltage 3<sup>rd</sup> Overtone Quartz Crystal Oscillator IC with Input Tolerant Function

### GENERAL DESCRIPTION

The NJU6227 series is a C-MOS quartz crystal oscillator IC realized excellent frequency stability for 3<sup>rd</sup> Overtone (up to 160MHz) oscillation, and consists of an oscillation amplifier, a 3-state output buffer, a built-in LDO and a input tolerant circuit.

The operating voltage is from 1.62V to 3.63V (x3, x4, x5, x6: from 2.25V to 3.63V), and the LDO holds down the characteristic change of the oscillation amplifier for operating voltage variation, and has been stabilized oscillation frequency (Frequency stability  $\pm 1\text{ppm}@V_{DD}\pm 10\%$ ). The 3-state output buffer is C-MOS compatible.

The input tolerant circuit ensures that 0 to 3.63 V can be applied to CONT terminal without regard to the supply voltage.

The oscillation stopping current is very low stand-by mode, therefore, it is suitable for the portable items of the communication equipment and the like.

### PACKAGE OUTLINE

NJU6227xXC-V

### FEATURES

- Maximum Oscillation Frequency      160MHz(3<sup>rd</sup> Overtone)
- Frequency Stability                     $\pm 1\text{ppm}@V_{DD}\pm 10\%$
- Wide Operating Voltage                1.62 to 3.63V(x3, x4, x5, x6 2.25V to 3.63V)
- Built-in LDO
- Input Tolerant Circuit                    0 to 3.63V@CONT Term.
- Stand-by Function ( Oscillation Stop and High-Z )
- 3-State Output Buffer
- Variable Pull-up Resistance on-Die ( CONT Terminal: Pull-up resistance is large at Stand-by Function )
- Oscillation Capacitors Cg and Cd on-Die
- C-MOS Technology
- Package Outline                            Die/Wafer

### VERSION DISCRIMINATION INTERNAL COMPONENTS

PAD layout version of the NJU6227 series is determined by the mask pattern. Frequency version of the NJU6227 series is determined by the internal fuse trimming.

Laser-trimmed versions are identified externally by the combination of the version name marking (1) and the locations of trimmed fuses (2). (Table 1 shows the chip version identification)

Table1: Frequency version and Cutting point in fuse.

### TERMINAL DESCRIPTION

SYMBOL	FUNCTION
CONT	Oscillation and 3-state Output Buffer Control
	CONT      F <sub>OUT</sub>
	H or OPEN      Output frequency f <sub>0</sub>
	L      Oscillation Stop and High impedance Output
XTI	Quartz Crystal Connecting Terminals
XTO	
V <sub>SS</sub>	GND Terminal (V <sub>SS</sub> =0V)
F <sub>OUT</sub>	Frequency Output
V <sub>DD</sub>	V <sub>DD</sub> =1.62 to 3.63V (x3, x4, x5, x6 2.25 to 3.63V)

### FUNCTIONAL DESCRIPTION

#### Standby Function

When CONT Terminal goes "Low", the F<sub>OUT</sub> Terminal output becomes High impedance.

CONT	F <sub>OUT</sub>	Oscillator
High(Open)	Frequency output	Normal operation
Low	High impedance	Stopped

#### Variable Pull-up Resistance

The CONT Terminal pull-up resistance changes in response to the input level. When CONT is tied "LOW" level, the pull-up resistance is large, reducing the current consumed by the resistance. When CONT is left open circuit, the pull-up resistance is small, which increases the input susceptibility to external noise. However, the pull-up resistance ties the CONT Terminal "High" level to prevent external noise from unexpectedly stopping the output.

### ABSOLUTE MAXIMUM RATINGS

## Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
