

FPD87208AXA **+2.5V Low EMI, Low Dynamic Power XGA/WXGA** **TFT-LCD Timing Controller with Reduced Swing** **Differential Signaling RSDS™ Outputs**

General Description

The FPD87208AXA is a timing controller that combines an LVDS single pixel input interface with National Reduced Swing Differential Signaling (RSDS™) output driver interface for XGA and Wide XGA resolutions. It resides on the TFT-LCD panel and provides the data buffering and control signal generation for XGA, and Wide XGA graphic modes. The RSDS path to the column driver contributes toward lowering radiated EMI and reducing system dynamic power consumption.

This single RSDS bus conveys the 6-bit color data for XGA, and three different WXGA resolutions.

Features

- Reduced Swing Differential Signaling (RSDS) digital bus reduces dynamic power, EMI and bus-width from the timing controller
- LVDS single pixel input interface system
- Input clock range from 25 MHz to 85 MHz
- Drives RSDS column drivers at 170 Mb/s with an 85 MHz clock (Max)
- BIST Function
- CMOS circuitry operates from a 2.25V–2.75V; 0°C–70°C
- 64 TQFP package with body size 10 mm x 10 mm x 1.0 mm
