

# General Specifications

## Electrical Capacity (Resistive Load)

|                 |                                                                                                                                                                                                                               |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>For MRX:</b> | 2A @ 125V AC or 1A @ 30V DC                                                                                                                                                                                                   |
| <b>For MRY:</b> | For MRY106G: 0.4VA maximum @ 28V AC/DC maximum<br>(Applicable Range 0.1mA ~ 0.1A @ 20mV ~ 28V)<br>Note: See Supplement Index to find explanation of operating range.<br>For all other MRY models: 3A @ 125V AC or 2A @ 30V DC |
| <b>For MRT:</b> | For MRT22: 10A @ 125V AC or 4A @ 30V DC<br>For MRT23: 5A @ 125V AC or 3A @ 30V DC                                                                                                                                             |

## Other Ratings

|                                   |                                                                                                                        |
|-----------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Contact Resistance:</b>        | 10 milliohms maximum for MRX, MRY, & MRT; 20 milliohms maximum for MRY106G                                             |
| <b>Insulation Resistance:</b>     | 100 megohms minimum @ 500V DC for MRX & MRY<br>200 megohms minimum @ 500V DC for MRT                                   |
| <b>Dielectric Strength:</b>       | 1,000V AC minimum for 1 minute minimum                                                                                 |
| <b>Mechanical Life:</b>           | 15,000 operations minimum                                                                                              |
| <b>Electrical Life:</b>           | 7,500 operations minimum                                                                                               |
| <b>Range of Operating Torque:</b> | 0.03 ~ 0.15Nm for MRX; 0.02 ~ 0.10Nm for MRY; 0.02 ~ 0.05Nm for MRT                                                    |
| <b>Contact Timing:</b>            | Nonshorting (break-before-make)<br>MRX: Self-cleaning, sliding contact; MRY: Rotary contactor dish; MRT: Butt contacts |
| <b>Indexing:</b>                  | 45° for MRX; 60° for MRY; 120° for MRT22; 60° for MRT23                                                                |

## Materials & Finishes

|                                         |                                                                                                                                                             |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Shaft:</b>                           | Brass with nickel plating                                                                                                                                   |
| <b>Stopper Plate:</b>                   | Steel with zinc plating for MRX & MRY                                                                                                                       |
| <b>Bushing/Housing:</b>                 | Brass with nickel plating                                                                                                                                   |
| <b>Movable Contacts:</b>                | Silver alloy for MRX & MRT; copper with silver plating for MRY106;<br>copper with gold plating for MRY106G                                                  |
| <b>End Contacts &amp; Terminals:</b>    | Silver alloy & copper with silver plating for MRX & MRT; silver alloy plus brass with silver plating for MRY106; silver alloy with gold plating for MRY106G |
| <b>Common Contacts &amp; Terminals:</b> | Copper with silver plating for MRX, MRY106 & MRT22; brass with gold plating for MRY106G; brass with silver plating for MRT23                                |
| <b>Base:</b>                            | Phenolic resin                                                                                                                                              |

## Environmental Data

|                                     |                                                                                                                                              |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Operating Temperature Range:</b> | -10°C through +70°C (+14°F through +158°F)                                                                                                   |
| <b>Humidity:</b>                    | 90 ~ 95% humidity for 96 hours @ 40°C (104°F)                                                                                                |
| <b>Vibration:</b>                   | 10 ~ 55Hz with peak-to-peak amplitude of 1.5mm traversing the frequency range & returning in 1 minute; 3 right angled directions for 2 hours |
| <b>Shock:</b>                       | 50G (490m/s <sup>2</sup> ) acceleration (tested in 3 right angled directions, with 3 shocks in each direction)                               |

## Installation

|                                          |                                                        |
|------------------------------------------|--------------------------------------------------------|
| <b>Mounting Torque:</b>                  | .686Nm (6.08 lb•in)                                    |
| <b>Cap Installation Force:</b>           | 19.6 ~ 29.4N (4.41 ~ 6.61 lbf)                         |
| <b>Soldering Time &amp; Temperature:</b> | Manual Soldering: See Profile A in Supplement section. |

## Standards & Certifications

|            |                                                                                                                                                                                                                                                    |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>UL:</b> | <b>File No. E44145 - Recognized only when ordered with marking on switch.</b><br>Add "/U" or "/CUL" before dash in part number to order UL recognized switch.<br>MRT22 models recognized at 10A @ 125V AC; MRT23 models recognized at 5A @ 125V AC |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# Distinctive Characteristics

Positive detent mechanism for distinct feel and audible feedback.

Metal bushing and housing construction increases durability.

Adjustable stopper plate allows 2-8 position settings.

High contact reliability achieved by the self-cleaning contact mechanism.

Break-before-make contact timing with various mechanism types: sliding contacts in MRX, contactor dish in MRY, and butt contacts in MRT models.

Terminal types include PC-turret for MRX, turret for MRY, and solder lug for MRT models.

Molded-in PC-turret and turret terminals prevent entry of flux and other contaminants.

## POSITION SETTING FOR MRX & MRY MODELS

Each switch is supplied with the stopper set for the maximum number of positions allowed for that model. Prior to installation, the desired position setting should be made. Contact factory for continuous rotation.

1. Using the actuator knob, turn the shaft counterclockwise to the extreme left. If the shaft is not turned to this extreme position where the white line on the knob points to the number 1 position shown on the side of the switch, proper setting cannot be achieved.
2. Remove the knob from the shaft and loosen the nut far enough to allow raising the stopper plate for resetting to the desired position.
3. Note the position numbers on the side of the switch; these correspond to the terminal numbers and stopper holes. Insert the stopper in the hole numbered for the maximum desired number of stop settings. Satisfactory switch functioning cannot be assured if the stopper plate is not properly positioned.
4. Tighten the nub (beveled side up) firmly against the stopper plate.

### Mounting Hardware Packaged Loose with Each Switch

**Стандарт  
Электрон  
Связь**

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
