

LTC3779

High Voltage, High Efficiency 48V/10A Synchronous Buck-Boost Converter

DESCRIPTION

Demonstration circuit 2456A is a high voltage, high efficiency synchronous buck-boost DC/DC converter with a 16V to 120V input voltage range. It can supply a 10A maximum load current with a 48V output. The demo board features the [LTC®3779EFE](#) controller. The constant frequency current mode architecture allows a phase-lockable frequency of up to 600kHz, while an optional output current feedback loop provides support for applications such as battery charging. With a wide input range, wide output range and seamless transfers between operation modes, the LTC3779 is ideal for Industrial, Automotive, Medical, Military and Avionics applications.

The light load operation mode of the converter is determined with the MODE pin. Use JP2 jumper to select pulse-skipping mode or forced continuous mode (CCM) operation. The switching frequency is pre-set at about 200kHz. The converter can also be externally synchronized to an external clock through the PLLIN pin (PLLIN terminal on the board). To shut down the converter, force the RUN pin below 1.2V (SW1: OFF). The power good output (PGOOD terminal) is low when the output voltage is outside of the $\pm 10\%$ regulation window.

Design files for this circuit board are available at <http://www.linear.com/demo/DC2456A>

PERFORMANCE SUMMARY

Specifications are at $T_A = 25^\circ\text{C}$

PARAMETER	CONDITION	VALUE
Input Voltage Range		16V to 120V
Output Voltage, V_{OUT}	$V_{IN} = 21\text{V to } 120\text{V}$, $I_{OUT} = 0\text{A to } 10\text{A}$	48V $\pm 2\%$
Maximum Output Current, I_{OUT}	$V_{IN} = 21\text{V to } 120\text{V}$, $V_{OUT} = 48\text{V}$	10A
Default Operating Frequency		200kHz
Typical Efficiency	48V _{IN} , 48V _{OUT} , 10A	98.7%
	36V _{IN} , 48V _{OUT} , 10A	99.0%
	72V _{IN} , 48V _{OUT} , 10A	98.7%
Typical Output Ripple	48V _{IN} , 48V _{OUT} , 10A	480mV

QUICK START PROCEDURE

Demonstration circuit 2456A is easy to set up to evaluate the performance of the LTC3779. Refer to Figure 1 for the proper measurement equipment setup and follow the procedure below:

1. With power off, connect the input power supply to V_{IN} (16V to 120V) and GND (input return).
2. Connect the 48V output load between V_{OUT} and GND (Initial load: no load).
3. Connect the DVMs to the input and the output.
4. Turn on the input power supply and then check for the proper output voltages. V_{OUT} should be 48V $\pm$ 2%.
5. Once the proper output voltages are established, adjust the loads within the operating range and observe the output voltage regulation, ripple voltage and other parameters.

Note: When measuring the output or input voltage ripple, do not use the long ground lead on the oscilloscope probe. See Figure 2 for the proper scope probe technique. Short, stiff leads need to be soldered to the (+) and (–) terminals of an output capacitor. The probe's ground ring needs to touch the (–) lead and the probe tip needs to touch the (+) lead.

Additional Note:

R2, R3, R4 and C10 is needed for additional/constant output current limit only. If this average current loop function is not used, short R2 and remove R3, R4 and C10; and then short IAVGSNSP and IAVGSNSN pins together, and tie them to V5.

Output Current Derating

Demonstration circuit 2456A is designed to supply 48V output with a 10A maximum load current. Figure 3 shows the full load efficiency and loss vs. the input voltage. For thermal concern, hotspot temperature is limited below 90°C for input voltage range between 21V and 120V with 200LFM air flow. Figure 4 and Figure 5 show the thermal performance of Demonstration circuit 2456A with 21V_{IN}, 48V_{OUT}, 10A load current and 120V_{IN}, 48V_{OUT}, 10A load current, respectively. Further decreasing the input voltage below 21V with 10A load current is not recommended. For applications with input voltage range between 16V and 21V, the output current derating curve is shown as Figure 6. For input voltage range between 36V and 72V which is popular in Telecom Industry, Demonstration circuit 2456A can handle the 10A full load current without any forced air flow. Figure 7, Figure 8 and Figure 9 show the thermal performance at 36V_{IN}, 48V_{IN} and 72V_{IN}, respectively.

Besides the thermal performance, another limit factor for high output power capability is the saturation current of the power inductor. To supply 48V_{OUT}, 10A load current with the input voltage below 21V, 15μH inductor with P/N 60068 from Payton Planar Magnetics Ltd. is recommended. Please contact the manufacture for detail information. Figure 10 shows the thermal performance at 18V_{IN}, 48V_{OUT}, 10A load current with 400LFM air flow. For applications with input voltage range between 16V and 18V, the output current derating curve is shown as Figure 6.

DEMO MANUAL DC2456A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
