

Description

The E-T-A power distribution system SVS02 is designed to accommodate the electronic circuit breaker series ESS20-003 or electronic circuit protector ESX10. It distributes the current supplied by a switch mode power supply up to 40 A to 4, 8, 12 or 16 channels. Input connections are via screw terminals. The individual circuit breakers can be plugged in. Loads are connected via spring-loaded screwless terminals. The power distribution includes integral wiring of the signalisation of the individual channels which can be combined to a group signal. The SVS02 can be snapped onto a DIN symmetrical rail.

- Suitable for**
- **ESS20-003**
 - **ESX10-103**
 - **2210-S21**

Ordering information

Type

SVS02 Power distribution system for ESS20-003

- short circuit current limited DC 24 V applications
- max. 40 A continuous load
- two integral circuit breakers (CB1 and CB2): overcurrent protection of group signalisation of power distribution system, red LED glashes upon trip of CB1
- 2 insulated wire bridges Y 303 881 08 included
- without jumpers SB-S11-P1-01-1A (for unused positions)

Version, max. number of circuit breakers ESS20-003 on the power distribution system

04 4 channels (F1...F4)

08 8 channels (F1...F8)

12 12 channels (F1...F12)

16 16 channels (F1...F16)

Screw terminals for power supply DC 24 V

P310 3 loop-through terminals (X21) max. 10 mm² for DC 24 V (+) / DC 24 V (-) / FE functional earth

Load outputs per channel (F1 .. Fn, n = 04, 08, 12, 16)

L50 5 load outputs per channel, max. 8 A each

- (L+S) group output (+) internally bridged over all channels
- (L+L) protected load output (+), per channel
- (-) DC 24 V (-)
- (-) DC 24 V (-)
- (FE) functional earth

Signal outputs

S15 1 signal terminal (X31) for group signal, 5-pole, complete with plug-in terminal, wiring 5 x max. 2.5 mm² / without connector sleeve, max. 0.5 A:

- (+) internal +DC 24 V supply for signalisation via insulated wire bridge from (+) to (SC)
- (SC) external supply possible +DC 24 V for signalisation
- (S0) signal output group signalisation
- (-) additional output DC 24 V (-)
- (FE) additional functional earth

Control input

E00 without control input

Fitting variants

B10 complete with screwless spring-loaded terminals, (max. 2.5 mm², without connector sleeve) (standard)

B20 complete with plug-in screw terminals (max. 2.5 mm², without connector sleeve)

SVS02 - 16-P310 - L50 - S15 - E00 - B10

SVS02-08...

Technical data

- Modular Power distribution system for short-circuit limited DC 24 V applications up to max. 40 A continuous load, max. voltage DC 32 V.
- Three screw terminals (max. 10 mm²/AWG 8) for:
 - DC 24 V (+) = X 21 +
 - DC 24 V (-) = X 21 -
 - FE (functional earth) = X 21 FE
 for connecting the DC 24 V power supply max. 40 A
- Modular design ESS20-positions F1...Fn (F1...F4 (...F8, ...F12 or ...F16)):
 - SVS02-04 / 4 channels / F1...F4 = Kl. X1...X4
 - SVS02-08 / 8 channels / F1...F8 = Kl. X1...X8
 - SVS02-12 / 12 channels / F1...F12 = Kl. X1...X12
 - SVS02-16 / 16 channels / F1...F16 = Kl. X1...X16
- 5 load outputs per channel complete with Combicon screwless connectors, wiring 5 x max. 2.5 mm² (AWG 14)/ without connector sleeve max. 8 A:
 - (L+S) group output (+), internally bridged across all channels
 - (L+L) load output (+), per channel
 - (-) DC 24 V (-)
 - (-) DC 24 V (-)
 - (FE) functional earth
- Signal terminal (X31) for group signal complete with Combicon screwless connectors, wiring 5 x max. 2.5 mm² (AWG 14)/ without connector sleeve, max. 0.5 A (signal contact ESS20):
 - (+) internal +DC 24 V supply for signalisation of terminal X 21 + via insulated jumper from (+) to (SC), protected by CB2
 - (SC) external supply possible +DC 24 V for signalisation, protected by CB1
 - (S0) signal output group signalisation
 - (-) additional output DC 24 V (-)
 - (FE) additional functional earth
- Selective overcurrent protection CB1 and CB2 for group signalisation of the power distribution system, red LED blinks after CB1 has tripped (see schematic diagram). Reset of circuit breakers: momentarily press red actuator button
- Protection class to: IP20
- Insulation co-ordination to IEC 60934: 0.5 kV / pollution degree 2
- Dielectric strength AC 500 V
- Temperature range: 0...50 °C (without condensation)
- for DIN symmetrical rail mounting EN 50022 - 35 x 7.5
- Dimensions: see dimensional drawing

Dimensions SVS02-16

This is a metric design and millimeter dimensions take precedence ($\frac{\text{mm}}{\text{inch}}$)

Schematic diagram SVS02-(n) n = 04, 08, 12, 16

Dimensions SVS02-04, fitted with ESS20-003

Application example for jumper to replace

The signalling pathway of the group signalisation is as follows:

- feed-in of +DC 24 V potential in (SC = terminal 31.2)
- via in-built overcurrent protection CB1
- via all signal contacts of the fitted circuit breakers type ESS20-003
- back to signal output of group signalisation (S0 = terminal 31.3)

In operating condition (i.e. all circuit breakers plugged in and functional) the signalling pathway (SC) to (S0) is closed.

If the distribution rail is not completely fitted with ESS20-003, the open pathway (SC) to (S0) may be closed by means of a jumper type SB-S11-P1-01-1-1A

Application example for insulated wire bridge

Terminal X31 (group signalisation)
wire bridge from (+) to (SC)
internal +DC24V feed for signalisation
Thus plus potential of terminal X21+ is connected to (SC)

Accessories

Jumper SB-S11-P1-01-1-1A

Insulated wire bridge Y 303 881 08

Two insulated wire bridges are supplied with the power distribution system. They may be used for:

- Channel X31: internal +DC 24 V supply for signalisation wire bridge from (+) to (SC)
Signal circuit (+) to (SC) protected by CB2
Signal circuit (SC) to (SO) protected by CB1
- Channel X1: Protected load output (L+L) of CBE position F1 takes over protection of (L+S) terminals of all CBEs F2 up to Fn (n= 04, 08, 12, 16)

This is a metric design and millimeter dimensions take precedence ($\frac{\text{mm}}{\text{inch}}$)

All dimensions without tolerances are for reference only. In the interest of improved design, performance and cost effectiveness the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
