

## Turbo 2 ultrafast high voltage rectifier

### Features

- High junction temperature capability
- Ultrafast with soft recovery behavior
- Low reverse current
- Low thermal resistance
- Reduce switching and conduction losses
- D²PAK HV creepage distance (anode to cathode) = 5.38 mm min. (with top coating)
- ECOPACK®2 compliant (DO-247, TO-220AC)

### Applications

- Output rectification
- PFC
- UPS
- Air conditioning
- Charging station

### Description

The STTH30RQ06 has been developed to be used in application requiring a high-voltage secondary rectification for LLC Full Bridge topology.

It is also suited for use in switching power supplies, industrial applications, as rectification, freewheeling and clamping diode.

#### Product summary

|                 |        |
|-----------------|--------|
| $I_{F(AV)}$     | 30 A   |
| $V_{RRM}$       | 600 V  |
| $V_F$ (typ.)    | 1.45 V |
| $t_{rr}$ (max.) | 30 ns  |
| $T_j$           | 175 °C |

# 1 Characteristics

**Table 1. Absolute ratings (limiting values, at 25 °C, unless otherwise specified)**

| Symbol              | Parameter                                    |                                   |                                           | Value       | Unit |
|---------------------|----------------------------------------------|-----------------------------------|-------------------------------------------|-------------|------|
| V <sub>RRM</sub>    | Repetitive peak reverse voltage              |                                   |                                           | 600         | V    |
| I <sub>F(RMS)</sub> | Forward rms current                          |                                   |                                           | 50          | A    |
| I <sub>F(AV)</sub>  | Average forward current δ = 0.5, square wave | T <sub>C</sub> = 125 °C           |                                           | 30          | A    |
| I <sub>FSM</sub>    | Surge non repetitive forward current         | t <sub>p</sub> = 10 ms sinusoidal | D <sup>2</sup> PAK, D <sup>2</sup> PAK HV | 180         | A    |
|                     |                                              |                                   | TO-220AC, DO-247                          | 200         |      |
| T <sub>stg</sub>    | Storage temperature range                    |                                   |                                           | -65 to +175 | °C   |
| T <sub>j</sub>      | Maximum operating junction temperature       |                                   |                                           | 175         | °C   |

**Table 2. Thermal parameters**

| Symbol        | Parameter        | Max. value | Unit |
|---------------|------------------|------------|------|
| $R_{th(j-c)}$ | Junction to case | 0.7        | °C/W |

**Table 3. Static electrical characteristics**

| Symbol      | Parameter               | Test conditions       |                     | Min. | Typ. | Max. | Unit          |
|-------------|-------------------------|-----------------------|---------------------|------|------|------|---------------|
| $I_R^{(1)}$ | Reverse leakage current | $T_j = 25\text{ °C}$  | $V_R = V_{RRM}$     | -    |      | 40   | $\mu\text{A}$ |
|             |                         | $T_j = 150\text{ °C}$ |                     | -    | 80   | 800  |               |
| $V_F^{(2)}$ | Forward voltage drop    | $T_j = 25\text{ °C}$  | $I_F = 15\text{ A}$ | -    |      | 2.45 | V             |
|             |                         | $T_j = 150\text{ °C}$ |                     | -    | 1.15 | 1.45 |               |
|             |                         | $T_j = 25\text{ °C}$  | $I_F = 30\text{ A}$ | -    |      | 2.95 |               |
|             |                         | $T_j = 150\text{ °C}$ |                     | -    | 1.45 | 1.85 |               |

1. Pulse test:  $t_p = 5\text{ ms}$ ,  $\delta < 2\%$

2. Pulse test:  $t_p = 380\text{ }\mu\text{s}$ ,  $\delta < 2\%$

To evaluate the conduction losses, use the following equation:

$$P = 1.05 \times I_{F(AV)} + 0.026 \times I_F^2 (RMS)$$

**Table 4. Dynamic electrical characteristics**

| Symbol   | Parameter                | Test conditions       |                                                                                    | Min. | Typ. | Max. | Unit |
|----------|--------------------------|-----------------------|------------------------------------------------------------------------------------|------|------|------|------|
| $t_{rr}$ | Reverse recovery time    | $T_j = 25\text{ °C}$  | $I_F = 0.5\text{ A}$ , $I_R = 1\text{ A}$ , $I_{rr} = 0.25\text{ A}$               | -    |      | 30   | ns   |
|          |                          |                       | $I_F = 1\text{ A}$ , $V_R = 30\text{ V}$ , $di_F/dt = -50\text{ A}/\mu\text{s}$    | -    | 40   | 55   |      |

## 2 Package information

In order to meet environmental requirements, ST offers these devices in different grades of **ECOPACK®** packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: [www.st.com](http://www.st.com). ECOPACK® is an ST trademark.

### 2.1 DO-247 package information

- Epoxy meets UL94, V0
- Cooling method: by conduction (C)
- Recommended torque value: 0.8 N·m (DO-247)
- Maximum torque value: 1.0 N·m (DO-247)

**Figure 15. DO-247 package outline**

| V    | 0°         |      | 8°    |

**Figure 20. D<sup>2</sup>PAK High Voltage footprint in mm**

### 2.4.1 Creepage distance between anode and cathode

**Table 9. Creepage distance between anode and cathode**

| Symbol             | Parameter                                                        |                       | Value | Unit |
|--------------------|------------------------------------------------------------------|-----------------------|-------|------|
| Cd <sub>A-K1</sub> | Minimum creepage distance between A and K1 (with top coating)    | D <sup>2</sup> PAK HV | 5.38  | mm   |
| Cd <sub>A-K2</sub> | Minimum creepage distance between A and K2 (without top coating) |                       | 3.48  |      |

*Note:* D<sup>2</sup>PAK HV creepage distance (anode to cathode) = 5.38 mm min. (refer to IEC 60664-1)

**Figure 21. Creepage with top coating**

Minimum distance between A & K1 = 5.38 mm (with top coating)

**Figure 22. Creepage without top coating**

Minimum distance between A & K2 = 3.48 mm (without top coating)

### 3 Ordering information

**Table 10. Ordering information**

| Order code      | Marking     | Package               | Weight | Base qty. | Delivery mode |
|-----------------|-------------|-----------------------|--------|-----------|---------------|
| STTH30RQ06G-TR  | STTH30RQ06G | D <sup>2</sup> PAK    | 1.48 g | 1000      | Tape and reel |
| STTH30RQ06D     | STTH30RQ06D | TO-220AC              | 1.86 g | 50        | Tube          |
| STTH30RQ06W     | STTH30RQ06W | DO-247                | 4.40 g | 30        | Tube          |
| STTH30RQ06G2-TR | TH30RQ06G2  | D <sup>2</sup> PAK HV | 1.48 g | 1000      | Tape and reel |

## Revision history

**Table 11. Document revision history**

| Date        | Revision | Changes                                                                                                                                                        |
|-------------|----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 12-Jun-2017 | 1        | Initial release.                                                                                                                                               |
| 11-Oct-2018 | 2        | Added D <sup>2</sup> PAK HV package.                                                                                                                           |
| 20-Nov-2018 | 3        | Updated Features and <a href="#">Table 9</a> . Creepage distance between anode and cathode.<br>Added <a href="#">Figure 22</a> . Creepage without top coating. |

**IMPORTANT NOTICE – PLEASE READ CAREFULLY**

STMicroelectronics NV and its subsidiaries ("ST") reserve the right to make changes, corrections, enhancements, modifications, and improvements to ST products and/or to this document at any time without notice. Purchasers should obtain the latest relevant information on ST products before placing orders. ST products are sold pursuant to ST's terms and conditions of sale in place at the time of order acknowledgement.

Purchasers are solely responsible for the choice, selection, and use of ST products and ST assumes no liability for application assistance or the design of Purchasers' products.

**Стандарт  
Электрон  
Связь**

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
