R1800K009A-EV

144 nA IQ Low Quiescent Current Buck DC/DC Converter for Energy Harvester Evaluation Board

No. EEV-414-K009A-190212

R1800K009A-EV is the evaluation board for R1800 which has the below features, benefits and specification.

OVERVIEW

R1800K is a power-storing buck DC/DC converter for a photovoltaic and vibration energy harvester. A low operating quiescent current allows a harvester to be used under a low-illumination environment, and it is suitable for an equipment with low power supplied from a harvester.

KEY BENEFITS

- Providing a low operating quiescent current (I_Q 144 nA) and a high efficiency (approximately 90%@10 µA).
- A Control function that enables a maximum power optimizes a power supply from an energy harvester.

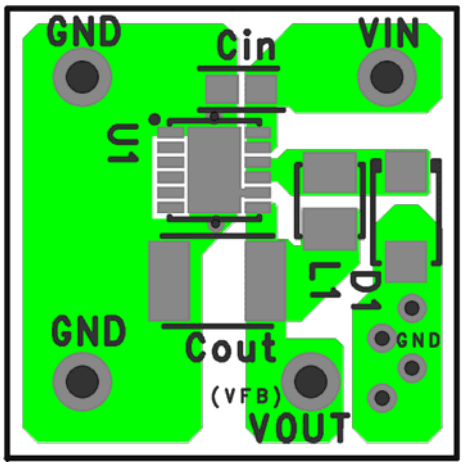
KEY SPECIFICATIONS

- Input Voltage Range: 2.0 V to 5.5 V
- Output Voltage Range: 2.0 V to 4.5 V
- Output Voltage Accuracy: ±3.0%
- Operating Quiescent Current:
  Typ.144 nA (Ta = 25°C, at no load)
- Starting Power: 720 nW
- Reverse Current Protection (V_{IN} ≥ 2.0 V)
- Accuracy of Maximum Power Voltage: 200 mV
- For more details on R1800 IC, please refer to
  https://www.e-devices.ricoh.co.jp/en/products/power/dcdc/r1800/r1800-ea.pdf.

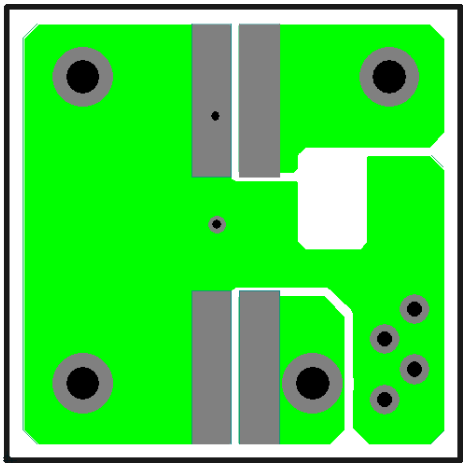
PCB LAYOUT

R1800KxxxA-TR (PKG:DFN(PLP)2730-12)

Top Layer



Bottom Layer



ABSOLUTE MAXIMUM RATINGS

Absolute Maximum Ratings (GND = 0 V)

Symbol	Parameter	Rating	Unit
V_{IN}	VIN Pin Voltage	−0.3 to 6.5	V
V_{LX}	LX Pin Voltage	−0.3 to V_{IN} + 0.3	V
V_{VFB}	VFB Pin Voltage	−0.3 to 6.5	V
P_D	Power Dissipation [1] [DFN(PLP)2730-12, JEDEC STD. 51-7 Test Land Pattern]	1850	mW
Tj	Junction Temperature Range	−40 to 85	°C
Tstg	Storage Temperature Range	−55 to 125	°C

ABSOLUTE MAXIMUM RATINGS

Electronic and mechanical stress momentarily exceeded absolute maximum ratings may cause the permanent damages and may degrade the life time and safety for both device and system using the device in the field.
The functional operation at or over these absolute maximum ratings are not assured.

RECOMMENDED OPERATING CONDITIONS

Recommended Operating Conditions

Symbol	Parameter	Rating	Unit
V_{IN}	Input Voltage	2.0 to 5.5	V
Ta	Operating Temperature Range	−40 to 85	°C

RECOMMENDED OPERATING CONDITIONS

All of electronic equipment should be designed that the mounted semiconductor devices operate within the recommended operating conditions. The semiconductor devices cannot operate normally over the recommended operating conditions, even if when they are used over such conditions by momentary electronic noise or surge. And the semiconductor devices may receive serious damage when they continue to operate over the recommended operating conditions.

[1] Refer to *POWER DISSIPATION* for detailed information.

ELECTRICAL CHARACTERISTICS

The specifications surrounded by [ ] are guaranteed by design engineering at −40°C ≤ Ta ≤ 85°C.

R1800K Electrical Characteristics (Ta = 25°C)

Symbol	Parameter	Condition	Min.	Typ.	Max.	Unit
V_{OUT}	Output Voltage	$V_{IN} \geq V_{SET}$ + 0.5 V, at no load	x 0.97		x 1.03	V
I_Q	Operating Quiescent Current	V_{IN} = 5.0 V, V_{SET} = 3.0 V, device not switching		144	300	nA
P_{ST}	Minimum Starting Power	Ta = 25°C, V_{IN} = 4 V, V_{SET} = 3.3 V, when constant current is applied		720		nW
V_{MP}	Accuracy of Maximum Power Voltage				200	mV
I_{REV}	Reverse Current	$V_{IN} \geq$ 2.0 V, V_{FB} = 4.5 V (When VIN drops from 2.5 V or more) Charging current to C_{IN} and C_{OUT} are not included(1)		10	100	nA

All test items listed under Electrical Characteristics are done under the pulse load condition (Tj ≈ Ta = 25°C).
Test circuit is operated with “Open Loop Control” (GND = 0 V), unless otherwise specified.

Product-specific Electrical Characteristics

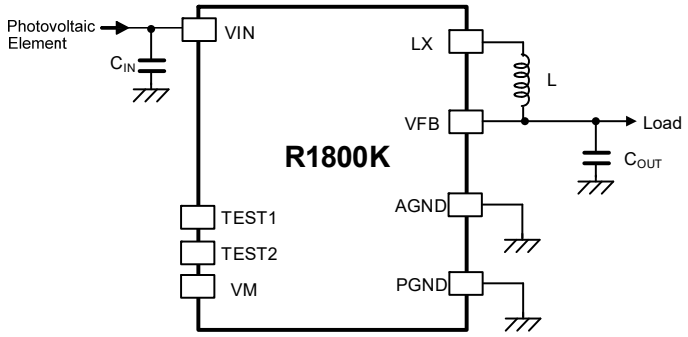
Product Name	V_{OUT} [V]			V_{MP} [V]	
	Min.	Typ.	Max.	Typ.	Max.
R1800K009A	3.201	3.3	3.399	4.0	4.2

V_{OUT}: the set output voltage, V_{MP}: the set maximum power voltage

(1) Reverse current protection operates at $V_{IN} \geq$ 2 V. It does not function with the voltage under 2 V. Set as $V_{MPSET} > V_{SET}$ + 0.5 V. Due to having a hysteresis in the reverse current protection, a state may be detected as a reverse current even if $V_{IN} = V_{OUT}$.

APPLICATION INFORMATION

Typical Application Circuit



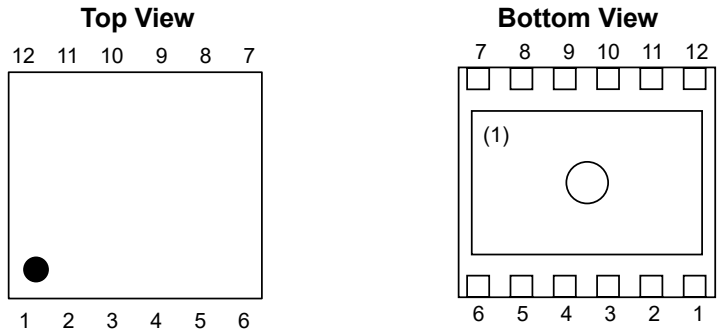
R1800K Typical Application Circuit

Recommended External Components*1

Symbol	Value
L	22 µH
C_{IN}	10 µF
C_{OUT}	47 µF

*1 The bill of materials will be attached on the shipment of each purchased evaluation board.

PIN DESCRIPTION



DFN(PLP)2730-12 Pin Configuration

DFN(PLP)2730-12 Pin Description

Pin No.	Symbol	Description
1	AGND	AGND Pin
2	TEST1	Pin for Testing (Must not be connected)
3	TEST2	Pin for Testing (Must not be connected)
4	VM	Pin for Testing (Must not be connected)
5	NC	No Connection (Must not be connected)
6	NC	No Connection (Must not be connected)
7	VFB	Feedback Pin
8	PGND	PGND Pin
9, 10	LX	DC/DC Switching Pin
11, 12	VIN	Pin for Connecting Photovoltaic Element

(1) The tab on the bottom of the package enhances thermal performance and is electrically connected to GND (substrate level). It is recommended that the tab be connected to the ground plane on the board, or otherwise be left floating.

TECHNICAL NOTES

The performance of a power source circuit using this device is highly dependent on a peripheral circuit. A peripheral component or the device mounted on PCB should not exceed a rated voltage, a rated current or a rated power. When designing a peripheral circuit, please be fully aware of the following points.

- External components must be connected as close as possible to the IC and make wiring as short as possible. Especially, the capacitor connected in between V_{IN} pin and GND pin must be wiring the shortest.
- If their impedance is high, internal voltage of the IC may shift by the switching current, and the operating may be unstable. Make the power supply and GND lines sufficient.
- As for wirings of the power, the ground, the inductor, the LX and the VFB pins, due consideration must be given to large current occurred by switching.
- Please choose inductors which have low direct-current resistance, enough allowable current and low magnetic saturation. Current-limited circuit may operate with LX peak current before reaching expected load current in case of low allowable current and extremely low inductance value under load condition.
- Note that the current-limited circuit is self-heating and radiation environment sensitive.

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to Ricoh sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of Ricoh.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under Ricoh's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire containment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. The X-ray exposure can influence functions and characteristics of the products. Confirm the product functions and characteristics in the evaluation stage.
9. WLCSP products should be used in light shielded environments. The light exposure can influence functions and characteristics of the products under operation or storage.
10. There can be variation in the marking when different AOI (Automated Optical Inspection) equipment is used. In the case of recognizing the marking characteristic with AOI, please contact Ricoh sales or our distributor before attempting to use AOI.
11. Please contact Ricoh sales representatives should you have any questions or comments concerning the products or the technical information.

RoHS Compliant
Halogen Free

Ricoh is committed to reducing the environmental loading materials in electrical devices with a view to contributing to the protection of human health and the environment.
Ricoh has been providing RoHS compliant products since April 1, 2006 and Halogen-free products since April 1, 2012.

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
