

FEATURES

Low Insertion Loss and On Resistance: 2.2 Ω Typical
On Resistance Flatness 0.5 Ω Typical
Automotive Temperature Range
 -40°C to +125°C
-3 dB Bandwidth = 240 MHz
Single 3 V/5 V Supply Operation
Rail-to-Rail Operation
Very Low Distortion: 0.5%
Low Quiescent Supply Current (1 nA Typical)
Fast Switching Times
 t_{ON} 7 ns
 t_{OFF} 4 ns
TTL/CMOS Compatible

APPLICATIONS

USB 1.1 Signal Switching Circuits
Cell Phones
PDA's
Battery-Powered Systems
Communications Systems
Data Acquisition Systems
Token Ring 4 Mbps/16 Mbps
Audio and Video Switching
Relay Replacement

GENERAL DESCRIPTION

The ADG774 is a monolithic CMOS device comprising four 2:1 multiplexer/demultiplexers with high impedance outputs. The CMOS process provides low power dissipation yet gives high switching speed and low on resistance. The on resistance variation is typically less than 0.5 Ω with an input signal ranging from 0 V to 5 V.

The bandwidth of the ADG774 is greater than 200 MHz; this, coupled with low distortion (typically 0.5%), makes the part suitable for switching USB 1.1 data signals and fast Ethernet signals.

The on resistance profile is very flat over the full analog input range ensuring excellent linearity and low distortion when switching audio signals. Fast switching speed, coupled with high signal bandwidth, also makes the parts suitable for video signal switching. CMOS construction ensures ultralow power dissipation, making the parts ideally suited for portable and battery-powered instruments.

REV. C

Information furnished by Analog Devices is believed to be accurate and reliable. However, no responsibility is assumed by Analog Devices for its use, nor for any infringements of patents or other rights of third parties that may result from its use. No license is granted by implication or otherwise under any patent or patent rights of Analog Devices. Trademarks and registered trademarks are the property of their respective owners.

FUNCTIONAL BLOCK DIAGRAM

The ADG774 operates from a single 3.3 V/5 V supply and is TTL logic compatible. The control logic for each switch is shown in the Truth Table.

These switches conduct equally well in both directions when ON, and have an input signal range that extends to the supplies. In the OFF condition, signal levels up to the supplies are blocked. The ADG774 switches exhibit break-before-make switching action.

PRODUCT HIGHLIGHTS

1. Wide -3 dB Bandwidth, 240 MHz.
2. Ultralow Power Dissipation.
3. Extended Signal Range.
The ADG774 is fabricated on a CMOS process giving an increased signal range that fully extends to the supply rails.
4. Low Leakage Over Temperature.
5. Break-Before-Make Switching.
This prevents channel shorting when the switches are configured as a multiplexer.
6. Crosstalk Typically -70 dB @ 30 MHz.
7. Off Isolation Typically -60 dB @ 10 MHz.

ADG774—SPECIFICATIONS

SINGLE SUPPLY ($V_{DD} = 5\text{ V} \pm 10\%$, $GND = 0\text{ V}$. All specifications T_{MIN} to T_{MAX} unless otherwise noted.)

QSOP Package, Power Dissipation	566 mW
θ _{JA} Thermal Impedance	149.97°C/W
Lead Temperature, Soldering (10 sec)	300°C
I R Reflow, Peak Temperature (<20 sec)	235°C
ESD	2 kV

NOTES

¹Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those listed in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability. Only one absolute maximum rating may be applied at any one time.

²Overvoltages at IN, S, or D will be clamped by internal diodes. Current should be limited to the maximum ratings given.

*Z = Pb-free part.

CAUTION

ESD (electrostatic discharge) sensitive device. Electrostatic charges as high as 4000 V readily accumulate on the human body and test equipment and can discharge without detection. Although the ADG774 features proprietary ESD protection circuitry, permanent damage may occur on devices subjected to high energy electrostatic discharges. Therefore, proper ESD precautions are recommended to avoid performance degradation or loss of functionality.

PIN CONFIGURATION (SOIC/QSOP)

TERMINOLOGY

V_{DD}	Most Positive Power Supply Potential.
GND	Ground (0 V) Reference.
S	Source Terminal. May be an input or output.
D	Drain Terminal. May be an input or output.
IN	Logic Control Input.
$\overline{EN}$	Logic Control Input.
R_{ON}	Ohmic Resistance between D and S.
ΔR_{ON}	On Resistance Match between any Two Channels, i.e., $R_{ON\ max} - R_{ON\ min}$.
$R_{FLAT(ON)}$	Flatness is defined as the difference between the maximum and minimum value of on resistance as measured over the specified analog signal range.
I_S (OFF)	Source Leakage Current with the Switch OFF.
I_D (OFF)	Drain Leakage Current with the Switch OFF.
I_D, I_S (ON)	Channel Leakage Current with the Switch ON.
V_D (V_S)	Analog Voltage on Terminals D, S.
C_S (OFF)	OFF Switch Source Capacitance.
C_D (OFF)	OFF Switch Drain Capacitance.
C_D, C_S (ON)	ON Switch Capacitance.
t_{ON}	Delay between Applying the Digital Control Input and the Output Switching on. See Test Circuit 4.
t_{OFF}	Delay between Applying the Digital Control Input and the Output Switching Off.
t_D	OFF Time or ON Time Measured between the 90% Points of Both Switches, When Switching from One Address State to Another. See Test Circuit 5.
Crosstalk	A Measure of Unwanted Signal that is Coupled through from One Channel to Another as a Result of Parasitic Capacitance.
Off Isolation	A Measure of Unwanted Signal Coupling through an OFF Switch.
Bandwidth	Frequency Response of the Switch in the ON State Measured at 3 dB Down.
Distortion	$R_{FLAT(ON)}/R_L$

Связь**

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
