GT Amphe-Power Connectors with RADSOK® Technology,

Amphe-Power™ Amphe-GTR, Power GT 88

Special Application GT Connectors:

 GTC-M Series with metal clips, GT-PC Connectors for high voltage power applications, 89

 GT Connectors for the HMI Lighting industry 89

Additional Amphenol Industrial Products for the Rail Industry 90, 91

Amphenol® ACA-B Connectors

with reverse bayonet coupling

Features of the Amphenol® ACA-B Reverse Bayonet Coupling Connectors with SAE AS50151 insert patterns:

- Quick positive coupling
- Audible and tactile indication of full coupling
- Waterproof - IP67 rated
- No lockwiring required
- High shock and vibration capabilities
- Inserts available in Neoprene
- Available in both crimp and solder terminations
- Contacts available in gold and silver plating
- Numerous finishes available
- Zinc alloy plating (cadmium free) available
- Rugged construction
- Intermateable with existing VG95234 connectors
- 500 couplings minimum
- Up to 50% more ampacity with the use of RADSOK® socket contacts. Consult Amphenol Industrial Operations for more information or see Amphenol® Amphe-Power Connectors with RADSOK® Technology, SL-391 (online at www.amphenol-industrial.com).
- Operating temperature range: -55°C to 125°C

RoHS Compliant Product
Available – Consult
Amphenol Industrial Operations.

The ACA-B is designed for commercial and industrial environments requiring a rugged bayonet style connector for heavy duty power and signal applications.

A comprehensive selection of insert arrangements and accessory hardware configurations are featured to accommodate heavy-duty, commercial wire and cable.

ACA-B is manufactured in accordance with SAE AS50151 and VG95234. The insulators are made of high quality polychloroprene material and can withstand temperatures of -55 to +125 degrees C. The rugged shell is made from aluminum alloy and plated with a variety of finishes to meet any application. Contacts are machined from copper alloy or brass and can be plated with gold or silver.

Common applications include automation, machine tool, robotics, instrumentation, process control, material handling, and test and measurement.

Amphenol® GT Connectors with reverse bayonet coupling

Designed originally for use by the military, the heavy duty GT connector has become widely used in commercial, geophysical, aerospace, ground support and shipboard applications. It is the preferred connector for mass transit.

Variety of Shell Styles are Available

Wall Mount Receptacle

Inline Receptacle

Straight Plug

Jam Nut Receptacle

NOTE:

The connector products in this brochure were formerly known as Bendix® products. These products are now manufactured and sold under the Amphenol® brand name. The name "Amphenol" will replace the name "Bendix" on products and literature in the future.

Amphenol® GT reverse bayonet coupling connectors with SAE AS50151 insert patterns features:

- Quick positive coupling
- Audible, tactile and visual indication of full coupling
- Waterproof – IP67 rated
- No lockwiring required
- High shock and vibration capabilities
- Inserts available in Neoprene and Viton* materials
- Low smoke/flame retardant inserts also available
- Operating temperature range:
With Neoprene inserts: –55°C to +125°C
With Viton** inserts: –50°C to +200°C
With low smoke/flame retardant inserts: –55°C to +125°C
- Available in both crimp and solder terminations
- Contacts available in gold and silver plating
- Numerous commercial finishes available
- Zinc alloy plating (cadmium free) available
- Rugged construction; aluminum or stainless steel components
- Available with resilient cover coupling for added damage protection and increased gripping surface
- Intermateable with existing VG95234 connectors
- 2000 couplings minimum
- UL recognized
- Up to 50% more ampacity with the use of RADSOK® technology (see page 54)

Amphenol's special offerings of GT Series connectors (see end of catalog) include: GT Amphe-Power® Connectors with RADSOK® technology, the GTC-M Series with metal clip inserts and GT-PC Series for high voltage power applications. There is also information on other Amphenol Industrial Products for the Rail Industry at the end of this catalog.

For further information on your individual application requirements, contact:

Amphenol Corporation
Amphenol Industrial Operations
191 Delaware Avenue
Sidney, New York 13838-1395
Phone: 888-364-9011 Fax: 520-397-7169

Crimp contacts accommodate wire the same size as the contact as well as wire of the next smaller, even size. Arrangements identified with an asterisk () are exceptions. See insert arrangement drawings on pages 55-77 for application wire size.

**Coaxial cable data can be found on insert arrangement drawings, pages 55-77. For further information on coaxial contacts call Amphenol Industrial at 888-364-9011.

ACA-B/GT Connectors

insert alternate positioning

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate rotations are available as indicated in the accompanying charts.

As shown in the diagram below, the front face of the pin insert is rotated within the shell in a clockwise direction from the normal shell key. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

The following insert arrangements have the same alternate insert rotations for W, X, Y and Z, which are:

| Degrees | | | |
|---------|-----|-----|-----|
| W | X | Y | Z |
| 80 | 110 | 250 | 280 |

| Insert Arrangement | Insert Arrangement | Insert Arrangement | Insert Arrangement | Insert Arrangement | Insert Arrangement | Insert Arrangement |

*Additional rotations available; consult Amphenol for information.

ACA-B/GT Connectors

solder contacts

Machined copper alloy contacts in a full range of sizes, with closed entry socket design in the size 12 and 16 contacts. A heavy silver-plated finish is deposited on all solder contacts for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop. Gold plated contacts are also available. (See how to order, page 78 for ACA-B and page 79 for GT.)

| Pin/ Socket | Mating End Size | Wire Barrel Size | Allowable Wire Size | Test Current** Amps |

| Pin | 0 | 0 | 0 | 150 |
| | | | 1 | 125 |
| Socket | | | 2 | 100 |

** Contact ratings as stated are test ratings only. The connector may not withstand full rated current through all contacts continuously.

Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

† The 10SL, 14S and 16S connectors require short contacts.

Table I
MIL-SPEC CONTACT ARRANGEMENT
SERVICE RATING

| MS Service Rating | Recommended Operating Voltage* at Sea Level | | Effective Creepage Distance Nom. | Mechanical Spacing Nom. |
|-------------------------|---|----------|---|-------------------------------|
| | DC | AC (RMS) | | |
| Inst. | 250 | 200 | 1/16 | |
| A | 700 | 500 | 1/8 | 1/16 |
| D | 1250 | 900 | 3/16 | 1/8 |
| E | 1750 | 1250 | 1/4 | 3/16 |
| B | 2450 | 1750 | 5/16 | 1/4 |
| C | 4200 | 3000 | 1 | 5/16 |

* The values listed in Table I represent operating values which include a generous safety factor. It may be necessary for some applications to exceed the operating voltages listed here. If this is necessary, designers will find Table II useful for determining the degree to which the recommended values of Table I can be exceeded.

Table II
ALTITUDE VOLTAGE
DERATING CHART**

| MS Service Rating | Nominal Distance | | Standard Sea Level Conditions | | Pressure Altitude † 50,000 Feet | | Pressure Altitude † 70,000 Feet | |
|-------------------------|---------------------|----------|----------------------------------|-----------------|------------------------------------|-----------------|------------------------------------|-----------------|
| | Airspace | Creepage | Minimum Flashover Voltage | Test Voltage | Minimum Flashover Voltage | Test Voltage | Minimum Flashover Voltage | Test Voltage |
| | | | AC (RMS) | AC (RMS) | AC (RMS) | AC (RMS) | AC (RMS) | AC (RMS) |
| Inst. | 1/32 | 1/16 | 1400 | 1000 | 550 | 400 | 325 | 260 |
| A | 1/16 | 1/8 | 2800 | 2000 | 800 | 600 | 450 | 360 |
| D | 1/8 | 3/16 | 3600 | 2800 | 900 | 675 | 500 | 400 |
| E | 3/16 | 1/4 | 4500 | 3500 | 1000 | 750 | 550 | 440 |
| B | 1/4 | 5/16 | 5700 | 4500 | 1100 | 825 | 600 | 480 |
| C | 5/16 | 1 | 8500 | 7000 | 1300 | 975 | 700 | 560 |

† Not corrected for changes in density due to variations in temperature.

** No attempt has been made to recommend operating voltages. The designer must determine his own operating voltage by the application of a safety factor to the above derating chart to compensate for circuit transients, surges, etc.

ACA-B/GT Connectors

crimp contacts and application tools

Machined from copper alloys and silver or gold plated for maximum corrosion resistance, with a minimum millivolt drop and a maximum current carrying capacity, the size 16 and 12 socket contacts are of the closed entry design. Crimp contacts are available for all insert arrangements and are identified based on part number call out. (See how to order, page 78 for ACA-B and page 79 for GT.)

Additional contact variations including thermocouple contacts are available; consult Amphenol, Sidney, NY for information.

RADSOK® Technology

RADSOK® Technology Advantages

RADSOK'S twisted grid configuration allows for 50% more current to pass through the same size pin, while providing increased reliability, ampacity and cycle durability as well as lower insertion force, T-rise and voltage drop.

• HIGH RELIABILITY

Unique RADSOK® design and construction technology create an electrical contact interface that exceeds typical interconnect requirements. Applications in aerospace, medical, industrial, automotive, mining, offshore, and other harsh environments depend on the high reliability of Amphenol's RADSOK® technology.

• LOW CONTACT ENGAGEMENT/SEPARATION FORCES

The hyperbolic lamella socket contact construction distributes normal forces over a high percentage of the mating pin surface. This creates a smooth, even engagement effort. This force distribution also contributes to excellent performance in vibration applications with resistance to typical fretting corrosion.

• LOW CONTACT RESISTANCE

The large interface area between the socket lamella and pin surface result in very low contact resistance, enabling the RADSOK® contacts' high current ratings compared to traditional power contact designs.

• HIGH MATING CYCLE DURABILITY

RADSOK® contacts with typical silver plating finishes have demonstrated survival of 20,000 mating cycles. Specialized plating and contact lubricants can extend cycle life to 200,000 matings or higher. Even with continuous exposure to harsh environmental abuse (salt, sand, and high humidity), RADSOK® contacts have been tested to maintain low contact resistance beyond 10,000 mating cycles.

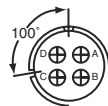

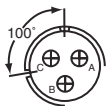

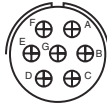

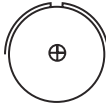

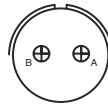

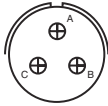

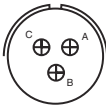

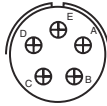

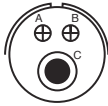

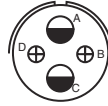

RADSOK® Socket Table

| CRIMP CONTACT DATA | | APPLICATION TOOLS | | | | |
|---------------------|----------------|-------------------|-----------|---------------------------|----------------------|---------------|
| RADSOK® Part Number | | Mating Size | Wire Well | Crimp Tools | Positioner/Die Set | Locator/Color |

Amphenol® ACA-B Connectors

how to order, connector intermateability

| Part Number System (example part number shown) | | | | | | | |
|---|-------------|----------|---------------|----------|----------|----------|--------------|
| <u>ACA</u> | <u>3101</u> | <u>E</u> | <u>10SL-3</u> | <u>P</u> | <u>W</u> | <u>B</u> | <u>(F80)</u> |
| <u>1</u> | <u>2</u> | <u>3</u> | <u>4</u> | <u>5</u> | <u>6</u> | <u>7</u> | <u>8</u> |

1. Connector Series

ACA designates Amphenol® ACA-B Reverse Bayonet Series

2. Shell Style

- 3101 - Cable connecting receptacle
- 3102 - Box mount receptacle (Class E only, see sect. 3)
- 3103 - Wall mount receptacle for rear panel mounting
- 3106 - Straight plug
- 3107 - Jam nut receptacle - rear panel mount
(Class A only, see sect. 3)
- 3108 - 90° angle plug

3. Connector Class

- A Environmental, no rear threads (Applies to 3107 only)
- E Environmental resisting, with grommet seal and strain relief backshell
- F Environmental resisting, with grommet seal and solid backshell with rear accessory threads
- G Backshell for heat shrink termination
- R Environmental resisting with lightweight endbell

4. Shell Size and Insert Arrangement

See pages 48-50 for insert availability charts, and pages 55-77 for insert pattern drawings.

5. Contact Style

P designates pin contacts
S designates socket contacts
Note: standard contacts are silver plated. Consult Connector Modification for ordering gold plated contacts.

6. Alternate Position

W, X, Y and Z - See page 51.
No suffix required for normal position.

7. Designation for Reverse Bayonet

B designates Reverse Bayonet coupling shells

8. Connector Modification

Omit for standard olive drab connectors with solder type silver plated contacts.

For a modification as listed below, add suffix in parenthesis to the end of the part number. Consult Amphenol Industrial Operations for further description or assistance.

- (RDS) with RADSOK® contacts (crimp sockets only)*
- (F80) with AWG crimp contacts
- (FO) less contacts. (contacts are to be ordered separately)
- (A176) gold contacts
- (T00) metric threads in flange holes
- (RFI) grounded - plug only
- (F42) less grommet and backshell
- (F85) less sleeve and grommet
- (A23) electroless nickel plating
- (A232) with black zinc cobalt plating
- (072) gray zinc nickel **NEW**

* Consult page 54 for RADSOK® Technology Advantages.

GT Connectors

how to order, connector intermateability

| Part Number System | | | | | | | | |
|--------------------|---|----|---|----|------|---|---|-------|
| GT | C | 00 | A | FF | 36-5 | P | W | (014) |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | |

1. Contact Style and Insert Material

- C = Crimp
- CN = Crimp with stainless steel
- S = Solder
- SN = Solder with stainless steel
- CY = Crimp with Viton
- SY = Solder with Viton
- CL = Crimp with low smoke/flame retardant inserts
- SL = Solder with low smoke/flame retardant inserts
- No designation required for Neoprene components

2. Shell Style

- 01 - Inline receptacle
- 02 - Box mount receptacle
- 030 - Square flange receptacle - rear panel mount
- 05 - Dummy receptacle
- 06 - Straight plug
- 07 - Jam nut receptacle - rear panel mount
- 070 - Jam nut receptacle with accessory threads
- 08 - 90° angle plug
- TB - Thru-bulkhead receptacle

3. Connector Class - For details, see pages 20-47

- A - Adapter for accessory attachment, non-environmental
- AF - Adapter, clamp for individual wires, non-environmental
- AMI - Threaded internal adapter. Thread style/size to be specified at the end of the PN - Ex (M20) or (PG21)
- CF - Adapter, jacketed cable clamp, environmental
- CFZ - Adapter, jacketed cable clamp, individual wire sealing grommet, environmental
- F - Adapter, clamp for individual wires, individual wire sealing grommet, environmental.
- G - Adapter for heat shrink tubing, individual wire sealing grommet, environmental
- GTTB - Thru bulkhead receptacle, accepts mating plug on both sides
- R - Adapter for accessory attachment, individual wire sealing grommet, environmental
- R - (02) No thread, no accessories, environmental with panel sealing gasket
- RMI - Threaded internal adapter with individual wire sealing grommet. Thread style/size to be specified at the end of the PN - Es (M20) or (PG21)
- RV - Adapter, individual wire sealing grommet, environmental
- SB - Adapter for termination of EMI/RFI shielded braid with heat shrink tubing or boot, individual wire sealing grommet, environmental

4. Designation for Mounting Hole - Receptacle Only

- FF - UN Threads
- FM - Metric Threads
- No designation for standard through hole mounting holes.

5. Shell Size and Arrangement

See pages 48-50

6. Contact Style

- P designates pin contacts
- S designates socket contacts

7. Alternate Position

- W, X, Y and Z - See page 51.
- No suffix required for normal position.

8. Connector Modification*

- Omit for standard olive drab with silver plated contacts
- i.e.: (A31) Gold/nickel plated contacts
- (025) Black zinc cobalt
- (LC) Less contacts
- (072) Gray Zinc Nickel
- (116) Solder contacts less pre-filled solder
- (724) Gray Zinc Nickel with solder contacts less pre-filled solder **RoHS Compliant**
- (RDS) RADSOK® contacts (crimp sockets only)*

* Consult page 54 for RADSOK® Technology Advantages.

ACA-B/GT Connectors – accessories

10-40450, 10-36675, 10-580649 sealing gaskets

PLAIN FLAT GASKET

The Amphenol® plain flat gasket of synthetic rubber material is provided to take complete advantage of waterproof and pressure sealing features. It is for use with the flange mounted receptacle.

SHIELDING GASKET

This flat gasket is provided to give the maximum in connector performance. Its special feature is in providing the maximum radio shielding under difficult conditions of high receiver sensitivity and low signal strength while retaining the sealing characteristics of the plain gasket. This gasket is for use with the flange mounting receptacle.

LOW TEMPERATURE GASKET

This gasket is provided for applications where the major requirement is resistance to the injurious effects of extremely low temperature. Even at temperatures as low as -67°F this gasket retains its resiliency and will seal a pressure differential of 30 psi.

Additional versions of gaskets are available including low smoke zero halogen, and also high temperature and conductive types. Consult Amphenol Industrial Operations, Sidney NY, for further information.

ACA-B/GT accessories glands

Nylon Cable Glands

Material: Nylon 66 (UL Approved 94V-2)
 Seal Ring: UL 94V-2(UL Approved 94V-2)
 Thread Type: Metric , PG, NPT
 Temp Range: Static: - 40°C ~ +100°C
 Dynamic: - 20°C ~ + 80°C
 Short Term: +120°C
 Current Colors: Gray, Black

Metal Cable Glands

Material: Brass with Nickel; Brass with Tin/Nickel
 Clamping: UL approved PA6, 94V-0
 Seal Ring: UL 94V-2 (UL approved NBR, 94V-2;UL approved DOW CORNING RUBBER, 94V-0)
 Thread Type: Metric, PG, NPT
 Protective: IP68 (tighten with o-ring)
 Temp Range: - 40°C ~ +100°C

Torque Value (N-M) of hex and cap nuts: 3.0-4.5 N-M
 M12, M16, M20 are UL recognized under file # E339605

Amphenol® GT Connectors with RADSOK technology

Amphenol offers Amphe-Power Connectors, high amperage capability connectors designed for the most demanding industrial and transportation applications. The GT connectors, in most shell styles, can be enhanced with RADSOK contacts that handle up to 150% higher amperages than standard contacts.

The RADSOK contact is a hyperbolic, stamped grid configuration within the socket. As male pin is inserted, axial members in the female half deflect, imparting high current flow across the connection with minimal voltage loss. This design ensures a large, coaxial, face-to-face surface area engagement and provides higher current capacity with minimized temperature rise. The RADSOK's strongest benefit is its very low mill-volt drop because of the intimate contact provided by the spring force of the grid. RADSOK contacts are available in size 8 (69 amps), size 4 (120 amps), and size 0 (250 amps). Current Amphe-Power lines support from 50A to 500A continuous duty. Hybrid arrangements with RADSOK and power contacts can be tailored to meet customer needs.

For more information on GT Amphe-Power Connectors, request Brochure SL-391.

The RADSOK Contact Advantage:

- Low contact Resistance
- Low milli-volt drop performance
- Higher current capacity with minimized temperature rise.
- Reliability under vibration and shock.
- High quality, consistency and lower cost

Amphe-Power™ Amphe-GTR

The Amphe-Power™ GT series provides the benefit of a GT connector in a high performance composite material. The GT-R is listed to UL/CUL 2238 Standard, Control Number 19VP. It also meets all of the specifications for high power process control and server applications. Performance level is the same as that of the GT series. RADSOK contacts enable an increased current rating of 120A on individual contacts, and a standard PG thread achieves an IP67 seal rating.

Compression (setscrew) wire termination to the 4/6AWG or 8/10AWG conductors allows for easy field replacement of pin or socket contacts. It also provides for easy complete plug or receptacle assemblies, all without a need for specialized tooling.

Power GT

The Power GT is a modification to the GT series incorporating three 8.0mm RADSOK contacts mounted in a common termination to busbar or cable, enhanced to an ultra-high current density in a compact shell size 28 layout. This design created the first TUV "finger-proof" 500A connector in the marketplace with the "dead-front" pin design to prevent contact with live circuits. In environmental versions, this connector achieves IP67 performance.

The ninety-degree wire orientation on the plug provides low-profile mounting for tight packaging requirements. This plug is designed to be over-molded, and can also be fitted with mechanical hardware for individual requirements.

with RADSOK® high amperage contacts*

Amphe-Power Composite GTR Connector

Power GT, Finger-Proof 500A Connector

Amphenol® GT Connectors special applications

GTC-M Series - The GT with Metal Clip Inserts

Amphenol's GTC-M series combines the GT reverse bayonet connector and the rear release metal clip retention system which is used in the Amphenol®/Matrix® MIL-C-5015 connector line. Another benefit is the captivated coupling nut assembly which allows unmating without the rear accessories attached.

Improved environmental sealing is achieved with this series. The crimp joint is covered by a three-webbed fluorinated silicone grommet that seals on the wires without the necessity of an additional sealing clamp. An interfacial seal with conical towers on the pin insert matches with recesses on the socket; a match that provides the popular "cork and bottle" seal during mating. The grommet and the interfacial seal provides adequate sealing during environmental extremes. The GTC-M series is intermateable and intermountable with the standard GT series, and it uses standard M85049 style rear accessories. For more information on the GTC-M Series, request Product Data Sheet #181.

GT-PC Connectors for High Voltage Power Applications

The Amphenol® GT-PC connectors were developed for use in the High Voltage Power Distribution industry. Incorporating all the standard features of the popular GT series, these connectors will prevent accidental electrical shocks to the technicians. "Dead Front" pin contacts in size 0 are recessed into a socket insert, preventing inadvertent contact with a live circuit. Higher amperage levels are provided - up to 100 amps per contact. The GT-PC series has been UL approved. "First Mate - Last Break" features on one or more of the pins provide an additional measure of operator safety. Currently there are 5 insert patterns available. Consult Amphenol Industrial Operations for more information.

GT Connectors for the HMI Lighting Industry

Amphenol provides GT connectors for the rugged use experienced during stage shows and other entertainment events, even outside in the elements. The same 3-point bayonet coupling system and the same ruggedness to survive 2000 mating cycles are provided. The unique features of this connector series include color-coded receptacle shells with matching backshells on the cable plugs. The colors can be matched to specific wattage cables and/or light systems. A wide selection of environmental adapters designed to seal on the outside diameter of specific cable diameters can be fitted to the backshells. Applications for these connectors include power and control of lighting trusses, and portable power and dimmer racks. For more information request Product Data Sheet #174.

Amphenol® GT-PC Connectors for High Voltage Power Applications

Amphenol® GT Connectors for the HMI Lighting Industry

Additional Amphenol Industrial Connectors for the Rail Industry

ARCL Series

Amphenol has developed a heavy duty 5015 type connector with 38999 Series III type coupling for use in mass transportation and heavy equipment applications. The ARCL Series has the same electrical characteristics as 5015 standard product but it has rugged ratchet double start stub threads. These rugged double stub threads eliminate mis-mating and provide for easy cleaning.

Other features/benefits of the ARCL connector series:

- 5 key/keyway alignment feature.
- Operating temperature is from -55°C to $+125^{\circ}\text{C}$.
Operating voltage is to 3000 VAC (RMS) at sea level.
- Crimp and solder termination available.
- 5 shell styles with all the 5015 insert patterns available.
- Supplied with low smoke, low halogen inserts which are flame retardant, but also can be supplied with standard 5015 inserts.
- Wide variety of backend accessories for all styles of cable and conduit, and a variety of cable strain reliefs including over-molding and heat shrink boots.
- RADSOK high amperage sockets can be incorporated.

Star-Line® Series

Amphenol/Pyle Star-Line Series is another heavy duty environmental cylindrical connector widely used in mass transportation and in the oil exploration market. Ideal for high amperage and high density control and instrumentation applications, this series has features and benefits as follows;

- Hard anodic coating for dielectric strength with heat and corrosion resistance.
- Operating temperature is from -67°F to $+257^{\circ}\text{F}$.
Amperages up to 1135 amps at 1000VAC or DC rating available.
- Double lead Acme threads provide complete coupling in one turn of the coupling nut, and do not clog under adverse weather conditions.
- Solder, crimp and pressure terminals; circuit breaking power and control types available.
- UL listed and CSA listed for circuit breaking capability.
- 5 shell styles with over 150 insert patterns.
- 3 retention styles with captive contacts or insertable/removable contacts.
- Variety of backend accessories including basketweave cable grips, straight or angled adapters and receptacles mounted to junction boxes.

Over-Molded Cable

Cables can be designed with custom overmold to Amphenol Industrial cylindrical connectors for almost any application in mass transportation or any other types of industrial markets. Overmold seals to the rear of the connector and to the cable jacket to provide moisture sealing. Cables may be designed to meet any environmental performance requirement and any electrical performance requirement. Variety of materials are available: neoprene, hypalon and others.

Consult Amphenol Industrial Operations for further information on these industrial products.

Amphenol® ARCL Series

Amphenol® Star-Line® Series

Over-Molded Cable for Industrial Connectors

Additional Amphenol Industrial Products for the Rail Industry, cont.

Trans-Power® Connectors

Amphenol/Pyle provides head-end power connectors for commercial rail systems. These meet Amtrak specification D-77-24, APTA #RP-E-016. Features and benefits include:

- Slip-fit, double seated for environmental protection.
- Retention by receptacle cover or optional accessories.
- Crimp termination per Amtrak and APTA specifications.
- Socket contacts provide uniform pressure for low mating and unmating forces, low voltage drop, consistently low temperature rise and shock resistance.
- Operating ambient temperature is -57°F to $+110^{\circ}\text{F}$. Electrical performance up to 600 volts, 400 Amps.
- All molded elastomeric rubber body on jumper. Raintight per U/L standard.

Amphenol® Trans-Power® Connectors for Rail Mass Transit

27 Pole Train-line Receptacles and Jumpers

Amphenol/Pyle 27 pole MU (multiple unit) and communication receptacles and jumpers are provided for rail applications. Jumpers are either standard car to car, between locomotives or between locomotives and lead cars. These products are designed to Amtrak and APTA specifications. Other design features and benefits:

- Locomotive jumpers are keyed differently from all other 27 pole jumpers to prevent mis-mating. They also have identification markings to distinguish their proper usage on locomotives.
- Receptacles are a rugged aluminum housing with a spring loaded cover. Receptacles can be provided with or without leads.
- Push-pull mating.

Amphenol® 27 Pole Train-line Receptacle and Jumpers for Rail Mass Transit

Amphe-Y Composite Molded Connectors

The Amphe-Y is a new Amphenol product for mass transit application that uses RADSOK high amperage sockets. It is a molded interconnect system that provides rapid and safe connect and disconnect for traction motor installation and repair.

This packaging solution consists of a molded base plate, a silver-plated copper "connector" with RADSOK contacts, and a molded top cover. When attached to the traction motor, this unit creates a safe, reliable and efficient means of conducting high amperage current from the third rail or catenary to the propulsion controller. Each "leg" of this assembly can safely accommodate up to 1000 amps through the 18mm RADSOK contacts.

Amphenol has wide capabilities in designing specialty molded interconnect solutions, such as the new Amphe-Y, for power and/or harsh environment applications. Custom designs can include bayonet, threaded or push-pull coupling with crimp solder or pressure termination. They can utilize RADSOK or standard contacts and can be designed to meet specific environmental sealing requirements and temperature ratings.

Amphe-Y Molded Interconnect System for Rail Mass Transit

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
