

# Low-Voltage, High-Speed, Quad, SPST CMOS Analog Switches

MAX4614/MAX4615/MAX4616

## General Description

## Features

The MAX4614/MAX4615/MAX4616 quad, low-voltage, high-speed, single-pole/single-throw (SPST) analog switches are pin compatible with the industry-standard 74HC4066/MAX4610 analog switches. On-resistance ( $10\Omega$  max) is matched between switches to  $1\Omega$  max and is flat ( $1\Omega$  max) over the specified signal range. Each switch handles  $V+$  to GND analog signal levels. Maximum off-leakage current is only  $1nA$  at  $T_A = +25^\circ C$  and  $6nA$  at  $T_A = +85^\circ C$ .

The MAX4614 has four normally open (NO) switches, and the MAX4615 has four normally closed (NC) switches. The MAX4616 has two NO switches and two NC switches. These CMOS switches operate from a single  $+2V$  to  $+5.5V$  supply. All digital inputs have  $+0.8V$  and  $+2.4V$  logic thresholds, ensuring TTL/CMOS-logic compatibility when using a single  $+5V$  supply.

- ♦ **Fast Switching Times**  
12ns  $t_{ON}$ , 10ns  $t_{OFF}$
- ♦ **Pin Compatible with Industry-Standard 74HC4066/MAX4610**
- ♦ **Guaranteed On-Resistance**  
10 $\Omega$  max (+5V supply)  
20 $\Omega$  max (+3V supply)
- ♦ **Guaranteed Match Between Channels (1 $\Omega$  max)**
- ♦ **Guaranteed Flatness Over Signal Range (1 $\Omega$  max)**
- ♦ **<6nA Off-Leakage Current Over Temperature ( $T_A = +85^\circ C$ )**
- ♦ **Rail-to-Rail<sup>®</sup> Signal Handling**
- ♦ **TTL/CMOS-Logic Compatible**

## Applications

## Ordering Information

- Battery-Operated Equipment
- Audio/Video Signal Routing
- Low-Voltage Data-Acquisition Systems
- Sample-and-Hold Circuits
- Communication Circuits

| PART       | TEMP. RANGE    | PIN-PACKAGE    |
|------------|----------------|----------------|
| MAX4614CUD | 0°C to +70°C   | 14 TSSOP       |
| MAX4614CSD | 0°C to +70°C   | 14 Narrow SO   |
| MAX4614CPD | 0°C to +70°C   | 14 Plastic DIP |
| MAX4614EUD | -40°C to +85°C | 14 TSSOP       |
| MAX4614ESD | -40°C to +85°C | 14 Narrow SO   |
| MAX4614EPD | -40°C to +85°C | 14 Plastic DIP |

## ABSOLUTE MAXIMUM RATINGS

(Voltages referenced to GND)

|  |                       |
|--|-----------------------|
| V+, IN_  | -0.3V to +6V          |
| COM_, NO_, NC_ (Note 1)  | -0.3V to (V+ + 0.03V) |
| Continuous Current (any terminal)                                | ±75mA                 |
| Peak Current (NO_, NC_, COM_)<br>(pulsed at 1ms, 10% duty cycle) | ±200mA                |

Continuous Power Dissipation (T<sub>A</sub> = +70°C)

|  |                 |
|--|-----------------|
| 14-Pin TSSOP (derate 6.3mW/°C above +70°C)         | 500mW           |
| 14-Pin Narrow SO (derate 8.00mW/°C above +70°C)    | 640mW           |
| 14-Pin Plastic DIP (derate 10.00mW/°C above +70°C) | 800mW           |
| Operating Temperature Ranges                       |                 |
| MAX461_C_  | 0°C to +70°C    |
| MAX461_E_  | -40°C to +85°C  |
| Storage Temperature Range                          | -65°C to +150°C |
| Lead Temperature (soldering, 10sec)                | +300°C          |

**Note 1:** Signals on NO\_, NC\_, or COM\_ exceeding V+ or GND are clamped by internal diodes. Limit forward-diode current to maximum current rating.

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

**Note 2:** The algebraic convention, where the most negative value is a minimum and the most positive value a maximum, is used in this data sheet.

**Note 3:** Guaranteed by design.

**Note 4:**  $\Delta R_{ON} = R_{ON}(\text{max}) - R_{ON}(\text{min})$ .

**Note 5:** Flatness is defined as the difference between the maximum and minimum value of on-resistance as measured over the specified analog signal range.

**Note 6:** Leakage parameters are 100% tested at maximum-rated hot temperature and guaranteed by correlation at +25°C.

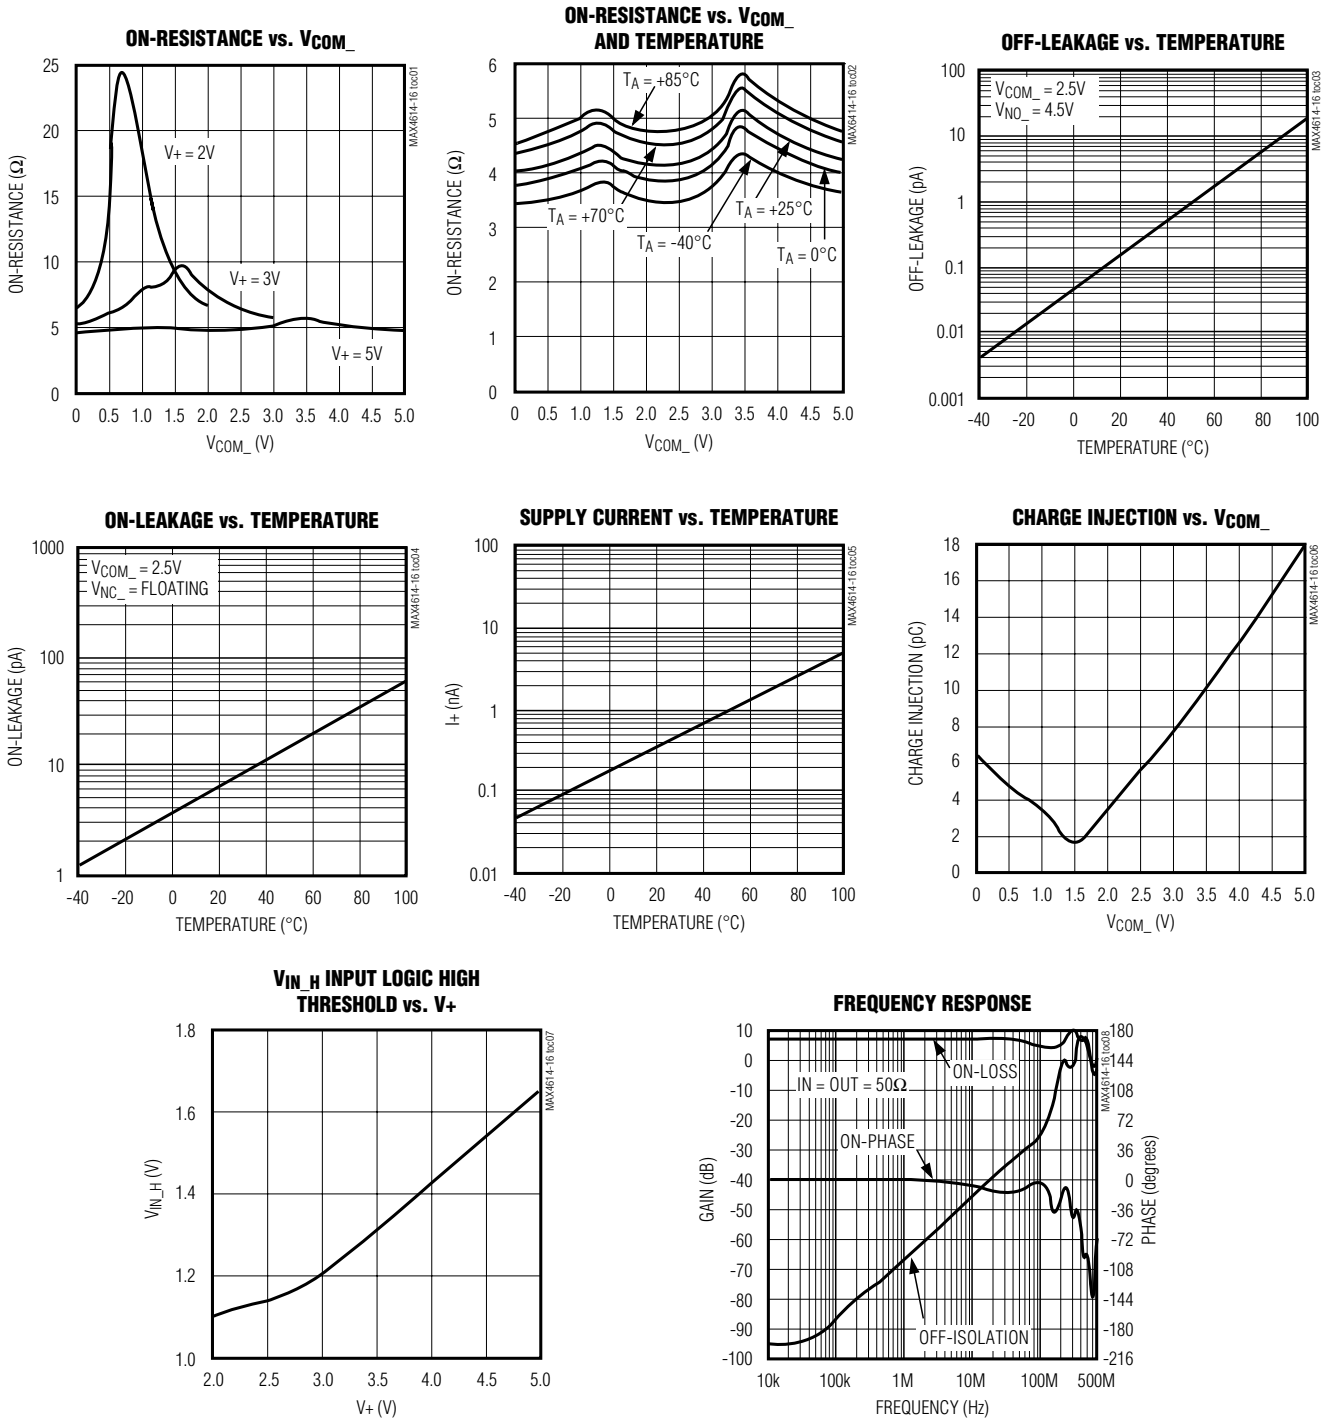

**Note 7:** Off-Isolation =  $20\log_{10}(V_{COM\_} / V_{NO\_})$ , VCOM\_ = output, VNO\_ = input to off switch.

**Note 8:** Between any two switches.

## Applications Information

### Power-Supply Sequencing and Overvoltage Protection

Do not exceed the absolute maximum ratings because stresses beyond the listed ratings may cause permanent damage to the devices.

Proper power-supply sequencing is recommended for all CMOS devices. Always apply V+ before applying analog signals or logic inputs, especially if the analog or logic signals are not current limited. If this sequencing is not possible, and if the analog or logic inputs are not current limited to 20mA, add a small-signal diode (D1) as shown in Figure 1. If the analog signal can dip below GND, add D2. Adding protection diodes reduces the analog signal range to a diode drop (about 0.7V) below V+ (for D1), and to a diode drop above ground (for D2). Leakage is unaffected by adding the diodes. On-resistance increases by a small amount at low supply voltages. Maximum supply voltage (V+) must not exceed 6V.

Adding protection diodes causes the logic thresholds to be shifted relative to the power-supply rails. This can be significant when low supply voltages (+5V or less) are used. With a +5V supply, TTL compatibility is not guaranteed when protection diodes are added. Driving IN1 and IN2 all the way to the supply rails (i.e., to a

Figure 1. Overvoltage Protection Using Two External Blocking Diodes

diode drop higher than the V+ pin, or to a diode drop lower than the GND pin) is always acceptable.

Protection diodes D1 and D2 also protect against some overvoltage situations. With Figure 1's circuit, if the supply voltage is below the absolute maximum rating, and if a fault voltage up to the absolute maximum rating is applied to an analog signal pin, no damage will result.

## Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
