

LUXEON Z

LUXEON Z ES

Breakthrough luminance, design flexibility
and optical control for Illumination solutions

Introduction

Philips Lumileds technology enables the new LUXEON® Z and LUXEON Z ES LEDs.

The LUXEON Z is a family of micro sized Illumination grade emitters that is the first ever 1-step MacAdam Ellipse warm white LED that enables never before seen color consistency, luminance, flux density and design flexibility for next generation lighting solutions. LUXEON Z family is undomed, a feature that provides un-matched optical flexibility for precise beam angle control. Tested and binned at application conditions 85°C, the LUXEON Z and Z ES emitters are an ideal choice for indoor and outdoor light sources requiring superior beam angles, higher efficiency and lower costs.

Features

- Micro sized: LUXEON Z, 1.3x1.7 mm and LUXEON Z ES, 1.6x2.0 mm
- Undomed device architecture
- Hot tested at 85°C
- Up to 1 A max drive current
- *Freedom from Binning*
- 1, 3, 5 step MCE options
- Lowest thermal resistance 3°C/W

Benefits

- Highest luminance to deliver punch
- Ultimate design flexibility from micro form factor
- Precise optical control from an undomed architecture
- Enables small customizable and scalable light engines
- Leading system level lm/\$ proposition

Key Applications

- Indoor area
- Lamps
 - MR16, PAR, GU10 and Candles
- Outdoor area
 - High-flux street light modules
- Specialty lighting
- Architectural

General Information

Product Nomenclature

LUXEON Z and Z ES emitters are specified and binned under “hot” conditions comparable to those found in “real-world” lighting products. The test conditions for LUXEON Z ES and LUXEON Z are 700 mA DC and 500 mA DC respectively with junction temperature at 85°C

The part number designation is explained as follows:

L X Z n - a b c d - y

Where:

- n — 1 for LUXEON Z and 2 for LUXEON Z ES
- a, b — designates nominal ANSI CCT (27 for 2700K, 30 for 3000K, RB for Royal Blue)
- c, d — designates minimum CRI performance (7 for 70 CRI, 8 for 80 CRI, 9 for 90 CRI)
- y — 1 designates 1 SDCM, 3 designates 3 SDCM and 5 designates 5 SDCM (only for 80 and 90 CRI versions. Lower than equal to 70 CRI parts will not have a SDCM designate and all parts will be within 5 step MCE).

Therefore, 3 SDCM 2700K/80 CRI LUXEON Z ES will have the following part number:

L X Z 2 – 2 7 8 0 - 3

Therefore, 5 SDCM 3000K/80 CRI LUXEON Z will have the following part number:

L X Z 1 – 3 0 8 0 - 5

Average Lumen Maintenance Characteristics

LUXEON Z products are tested in compliance with LM-80. Please visit www.philipslumileds.com/support/documentation/lumen-maintenance or contact your local Philips Lumileds Technical Solutions Manager for TM-21 extrapolations or other support.

Environmental Compliance

Philips Lumileds is committed to providing environmentally friendly products to the solid-state lighting market.

LUXEON Z and LUXEON Z ES products are compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS and REACH directives. Philips Lumileds will not intentionally add the following restricted material to the LUXEON Z and LUXEON Z ES: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Notes for Table 5:

- Proper current derating must be observed to maintain junction temperature below the maximum. For additional information on thermal measurement guidelines please refer to Application Brief AB106.
- Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple", with frequencies ≥ 100 Hz and amplitude ≤ 200 mA are acceptable, assuming the average current throughout each cycle does not exceed 1000 mA.
- Pulsed operation with a peak drive current of 1200 mA is acceptable if the pulse on-time is ≤ 5 ms per cycle and the duty cycle is $\leq 50\%$.
- Transient reverse voltages and surge currents due to electrical switching or supply interruptions are acceptable if these events do not last for more than 10ms, the amplitude of the reverse voltage does not exceed 5V and the reverse current is less than 200 μ A.
- Max 5V reverse for up to 10s is an acceptable beginning of life, one time test condition.

Product Binning and Labeling

Purpose of Product Binning

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical data sheets. For this reason, Philips Lumileds bins the LED components for luminous flux and forward voltage (V_f). Color is offered in a single 1 step, 3-step or 5-step MacAdam ellipse color space centered on the ANSI CCT color bins. For additional information please review the MacAdam ellipse technical definition section.

Decoding Product Bin Labeling

LUXEON Z ES and LUXEON Z emitters are labeled using a four digit alphanumeric code (CAT code) depicting the bin values for emitters packaged on a single reel. All emitters packaged within a reel are of the same 3-variable bin combination. Reels of LUXEON Z emitters are labeled with a four digit alphanumeric CAT code following the format below.

ABCD

A = Flux/Radiometric power bin (L, M, etc.)

B and C = Color Bin (5A, 5B, 5C, 5D, 3U, 3L, 0I)

D = V_f bin (P,R)

Luminous Flux and Forward Voltage Bins

Table 7 lists the standard photometric luminous flux bins for LUXEON Z ES and LUXEON Z emitters (tested and binned at 700 mA and 500 mA $T_j = 85^\circ\text{C}$). Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all colors.

Company Information

Philips Lumileds is a leading provider of LEDs for everyday lighting applications. The company's records for light output, efficacy and thermal management are direct results of the ongoing commitment to advancing solid-state lighting technology and enabling lighting solutions that are more environmentally friendly, help reduce CO₂ emissions and reduce the need for power plant expansion. Philips Lumileds LUXEON® LEDs are enabling never before possible applications in outdoor lighting, shop lighting, home lighting, digital imaging, display and automotive lighting.

Philips Lumileds is a fully integrated supplier, producing core LED material in all three base colors, (Red, Green, Blue) and white. Philips Lumileds has R&D centers in San Jose, California and in the Netherlands, and production capabilities in San Jose, Singapore and Penang, Malaysia. Founded in 1999, Philips Lumileds is the high flux LED technology leader and is dedicated to bridging the gap between solid-state technology and the lighting world. More information about the company's LUXEON LED products and solid-state lighting technologies can be found at www.philipslumileds.com.

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
