Legal Disclaimer

The information given in this document shall in no event be regarded as a guarantee of conditions or characteristics. With respect to any examples or hints given herein, any typical values stated herein and/or any information regarding the application of the device, Infineon Technologies hereby disclaims any and all warranties and liabilities of any kind, including without limitation, warranties of non-infringement of intellectual property rights of any third party.

Information

For further information on technology, delivery terms and conditions and prices, please contact the nearest Infineon Technologies Office (www.infineon.com).

Warnings

Due to technical requirements, components may contain dangerous substances. For information on the types in question, please contact the nearest Infineon Technologies Office.

Infineon Technologies components may be used in life-support devices or systems only with the express written approval of Infineon Technologies, if a failure of such components can reasonably be expected to cause the failure of that life-support device or system or to affect the safety or effectiveness of that device or system. Life support devices or systems are intended to be implanted in the human body or to support and/or maintain and sustain and/or protect human life. If they fail, it is reasonable to assume that the health of the user or other persons may be endangered.

Introduction

This document describes the features and hardware details of the Ethernet/CAN/RS485 Interface Card (COM_ETH-V1) designed to work with Infineon's XMC4500 CPU board. This board is part of Infineon's Hexagon Application Kits.

1 Overview

The COM_ETH-V1 board is an application expansion satellite card of the Hexagon Application Kits. The satellite card along with a CPU board (e.g. CPU_45A-V2 board) demonstrates the communication capabilities of XMC4500. The main use case for this satellite card is to demonstrate the communication features of XMC4500 device including the toolchain. The focus is safe operation under evaluation conditions. The satellite card is not cost optimized and cannot be seen as reference design.

1.1 Key Features

The COM_ETH-V1 satellite card is equipped with following features

- Connection to CPU board (e.g. CPU_45A-V2) via satellite connector COM
- 10/100Mbps Ethernet (RJ45)
- CAN transceiver with CAN connector (DE-9 male)
- RS-485 transceiver, full-duplex, bootable (DE-9 female)
- CAN transceiver, bootable (4-pin header)
- I2C based IO expander with 8 channels
- Power supply
 - Powerjack for external 24 V supply
 - From CPU board via COM satellite connector

1.2 Block Diagram

Figure 1 shows the block diagram of the COM_ETH-V1 satellite card. There are following building blocks:

Figure 1 Block Diagram of the Ethernet/CAN/RS485 Interface Card

2 Hardware Description

The following sections give a detailed description of the hardware and how it can be used.

Figure 2 Ethernet/CAN/RS485 Interfaces Card (COM_ETH-V1)

2.1 Ethernet

The COM_ETH-V1 satellite card supports RJ45 jack with magnetic on board for communication to LAN. On board PHY device DP83848CVV is connected to the CPU via a RMII.

A 50 MHz crystal oscillator is used on board to generate the clock required by the RMII interface.

Figure 3 Ethernet Interface

Table 1 below gives the signal details of RJ45 connector.

Table 1 RJ45 Connector Pinout

Pin No.	Signal Name	Description
1	TD+	Tranmit Data Plus
2	TD-	Tranmit Data Minus
3	RD+	Receive Data Plus
4	NC	No Connection
5	NC	No Connection
6	RD-	Receive Data Minus
7	NC	No Connection
8	NC	No Connection

Table 2 shows the connection of the Ethernet signals to the COM satellite connector.

Table 2 Ethernet signal connection to the Satellite Connector

Pin No.	Signal Name	Description
22	ETH_REF_CLK	Clock
21	ETH_TXD0	Tansmit Data 0
14	ETH_TXD1	Tansmit Data 1
16	ETH_TXEN	Tansmit Enable
15	ETH_RXD0	Receive Data 0
13	ETH_RXD1	Receive Data 1
18	ETH_CRS_DV	Receive Data Valid
20	ETH_RXER	Receive Error
19	ETH_MDC	Management Clock
17	ETH_MDIO	Management Data

2.2 CAN

The COM_ETH-V1 satellite card supports a CAN interface on board via a DE-9 connector (X320). A CAN transceiver (U320) is connected to the CPU via the 80-pin satellite connector.

The CAN bus on board has a 120 Ohm termination resistor.

Figure 4 CAN Interface

Table 3 gives the details of CAN connector pin mapping.

Table 3 CAN Connector Pinout (X320)

Pin No.	Signal Name	Description
1	NC	No Connection
2	CANL	CAN Low
3	GND	Ground
4	NC	No Connection
5	NC	No Connection
6	GND	Ground
7	CANH	CAN High
8	NC	No Connection
9	VDD	5 V

Table 4 shows the connection of the CAN signals to the COM satellite connector.

Table 4 CAN signal connection to the Satellite Connector

Pin No.	Signal Name	Description
28	CAN_TXD	CAN Transmit Data
30	CAN_RXD	CAN Receive Data

2.3 RS485/CAN Boot Loader

The COM_ETH-V1 satellite card supports RS485 interface via a DE-9 connector (X331). The satellite card uses a RS485 transceiver (U331) connected to the CPU via the 80-pin satellite connector.

Table 5 gives the details of RS485 connector pin mapping.

Table 5 RS485 Connector Pinout (X331)

Pin No.	Signal Name	Description
1	NC	No Connection
2	TX+	Transmit Data Plus
3	GND	Ground
4	RX+	Receive Data Plus
5	NC	No Connection
6	NC	No Connection
7	TX-	Transmit Data Minus
8	RX-	Receive Data Minus
9	NC	No Connection

The COM satellite card supports booting of the CPU via RS485 (default) or CAN. Boot option can be chosen using the solder jumpers SJ1/SJ2. SJ2 (RS485) is closed by default. For booting through CAN use connector X330, for booting through RS485 use connector X331.

Figure 5 RS485/CAN BootLoader

Table 6 CAN Connector Pinout (X330)

Pin No.	Signal Name	Description
1	VDD	5 V
2	CANH	CAN High
3	CANL	CAN Low
4	GND	Ground

Both RS485 as well as CAN bus have a 120 Ohm termination resistor.

Table 7 shows the connection of the RS485/CAN signals to the COM satellite connector.

Table 7 RS485/CAN signal connection to the Satellite Connector

Pin No.	Signal Name	Description
29	ASC_TXD	ASC Transmit Data
27	ASC_RXD	ASC Receive Data

2.4 IO Expander

The COM_ETH-V1 satellite card supports GPIO expansion through I2C IO-Expander on board (U230). The I2C address for the IO expander device is 0x1001100X. The satellite card supports 8 such GPIO's. All the GPIO's are connected to LEDs (V230-V237) and SMD-Pads (TP230 – TP237). The table below gives the GPIO channel and corresponding LED/PAD mapping.

Table 8 GPIO channel LED/SMD pad mapping

GPIO	LED reference	SMD pad Reference
GPIO0	V230	TP230
GPIO1	V231	TP231
GPIO2	V232	TP232
GPIO3	V233	TP233
GPIO4	V234	TP234
GPIO5	V235	TP235
GPIO6	V236	TP236
GPIO7	V237	TP237

Table 9 shows the connection of the IO Expander device to the COM satellite connector.

Table 9 IO Expander I2C signal connection to the Satellite Connector

Pin No.	Signal Name	Description
38	I2C_SCL	I2C Clock
37	I2C_SDA	I2C Data

2.5 Power

The COM_ETH-V1 satellite card can be supplied by an external power supply (24 V / 1 A) to be connected to the power jack X240 or by a 5 V supply via the 80-pin COM satellite connector. An external power supply is necessary only in case the current coming via the COM satellite connector is not sufficient.

A DC-DC converter on board (U240) steps down the input voltage from the power jack X240 to 5 V (VDD5). The input voltage can be in the range from 12 V to 24 V. An on board linear voltage regulator is generating a 3.3 V (VDD3.3) power supply out of the VDD5.

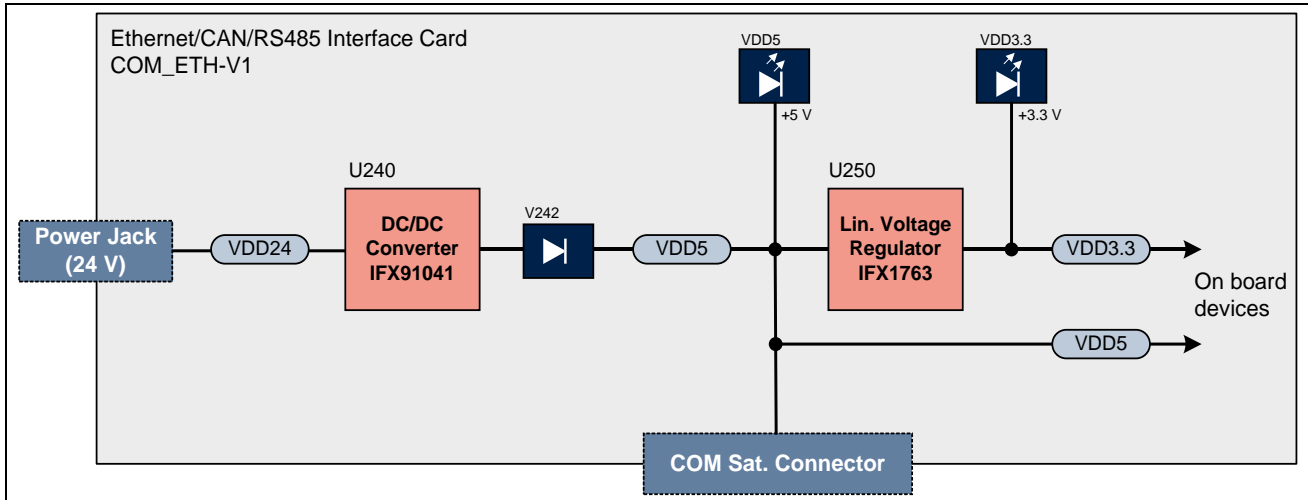

Figure 6 Power Circuit

A Diode V242 protects the reverse flow of current to an external source. Therefore a simultaneous power supply of the satellite boards via both the power jack and the satellite connector with not harm.

LED V210 indicates the presence of 5 V power and LED V211 indicates the presence of 3.3 V power.

Table 10 Power LED's

LED	Power Rail	Voltage	Note
V210	VDD5	5 V	Must always be "ON"
V211	VDD3.3	3.3 V	Must always be "ON"

Figure 7 Power LED's

The COM_ETH-V1 satellite card supports a PowerScale probe for power measurement purpose.

Table 11 PowerScale Jumper

Jumper	Function	Description
JP242	PowerScale	At this point a Hitex PowerScale probe can be connected for current sensing VDD (complete power delivered by U240) Default: pos. 1-2 (closed) <i>Note: On the PCB bottom side there will be a shorting trace between pin 1-2. This trace has to be cut first, before using PowerScale</i>

Table 12 shows the power connection to to the COM satellite connector.

Table 12 Power connection to the Satellite Connector

Pin No.	Signal Name	Description
43,44,45,46	VDD5	5 V
1,2,24,61,79,80	GND	Ground

2.6 Satellite Connector

The satellite connector of the COM_ETH-V1 satellite card interfaces it's the signals to a CPU board e.g. CPU_45A-V2. Take care to connect the COM satellite card always to the corresponding COM satellite connector of the CPU board only.

Figure 8 COM Satellite Connector

The signal mapping details of the COM satellite connector and the corresponding CPU function are provided in Figure 9

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
