Pressure, Airflow and Force Sensing at Honeywell

Honeywell Sensing and Control:

In the 1980's, Honeywell developed a full line of piezoresistive pressure sensors featuring excellent repeatability, high accuracy, and reliability under varying environmental conditions. In addition, they feature highly consistent operating characteristics from one sensor to the next and interchangeability without recalibration.

In 1998, Honeywell acquired Data Instruments and added stainless steel and high purity pressure sensors, as well as the Advanced Silicon Group, or ASG family of pressure sensors. Data Instruments is best known for their sensors' precision and performance in applications that require high accuracy.

In 2002, Honeywell acquired Invensys Sensor Systems, including Sensym ICT, which brought a full line of high pressure, industrial products from the ICT side of the business, and a full line of low pressure plastic products from the SenSym side. SenSym is

best known for their Low Pressure Plastic products and their willingness to produce custom sensors and packages. ICT is known for their highly accurate Pressure sensors that are used in Industrial applications. ICT is also known for their willingness to work with customers to create custom pressure sensor solutions to meet challenging customer needs.

In 2003, Honeywell purchased Sensotec. Founded in 1973, Sensotec designs and manufactures one of the broadest and most comprehensive product lines of pressure, load cells and electronic sensor instrumentation. Sensotec products are best known for their quality of engineering and customization.

Honeywell Sensing and Control offers the broadest line of pressure, force, and airflow capabilities in the world. For more information on these, or any of our products, visit our website and interactive catalog at www.honeywell.com/sensing.

Honeywell

1998 Data Instruments:

- 1977 **Data Instruments** was formed as a result of a leveraged buyout of the Tyco Instruments Division of Tyco Laboratories.
- 1994 **NeXt Sensors** was founded
- 1995 **NeXt Sensors** merged with **Data Instruments** and formed the Advanced Silicon Group (ASG)
- 1998 **Honeywell** acquires **Data Instruments**.

2002 SenSym ICT:

- 1972 **ICT** was spun off from Fairchild.
- 1974 The **Foxboro** Company purchased **ICT**.
- 1989 Hawker Siddley (later acquired by BTR) purchased **SenSym** from National Semiconductor
- 1990 Siebe acquired the **Foxboro** company
- 1999 BTR merged with Siebe to form Invensys. **Sensym** merged with **Foxboro ICT** to form **Sensym ICT**.
- 2002 **Honeywell** acquired **SenSym ICT** as a part of Invensys Sensor Systems.

You can *trust* Honeywell Sensing and Control for:

The right products for your applications

By offering you the broadest switching and sensing portfolio in the world—and by offering you expert advice through our global sales and distribution channels to make the right choices, we can help to ensure you get the right product for your application.

Delivered on time

Through extensive work with Six Sigma* Plus and lean manufacturing programs, Honeywell is able to boast on-time to promise delivery statistics over 95%. Many of our locations operate at 100%. With an average lead time of only five days and distributor stocking programs in place throughout the world, we can meet even the most stringent of deadlines.

That work right the first time

At Honeywell Sensing and Control, we provide you with quality right out of the box, and quality down the line. Our Six Sigma* culture ensures that our sensors, switches and control products will work the first time and every time.

And every time

With over 60 years in the switching and sensing business, we have built a reputation you can rely on. Our robust product designs and extensive testing facilities ensure that the products you order from Honeywell are the quality you have come to depend on.

Anywhere in the world

Honeywell has a global sales force with application assistance available wherever you are located. See the back page of this brochure for more information on who to contact in your part of the world.

In addition to the sensing and control industry's largest direct salesforce, we have several ways of getting the answers you need:

1. Visit the website and interactive catalog at www.honeywell.com/sensing
2. Contact our Customer Response Center directly at:

Domestic: 800.537.6945

International: 815.235.6847

Fax: 815.235.6545

Our technical customer service staff is waiting to help you from 7:30am to 4:30pm, Central Standard Time.

3. Email us at info.sc@honeywell.com

SMT Pressure Products (1.0 psi to 100 psi)

Series	26PC	24PC	SCC	SX
Description	Calibrated	Bare Sensor	Bare Sensor	Bare Sensor
	Silicon Die Elastomeric Technology	Silicon Die Elastomeric Technology	Silicon Die on Ceramic Current Excitation	Silicon Die on Ceramic Voltage Excitation
Pressure Range	1.0 psi to 100 psi	1.0 psi to 100 psi	1.0 psi to 300 psi	1.0 psi to 300 psi
Device Type	Differential, Gage	Absolute*, Differential, Gage	Absolute*, Gage	Absolute*, Gage
Output Signal	mV	mV	mV	mV
Accuracy	Linearity, Hysteresis & Repeatability 0.5% typ.	Linearity, Hysteresis & Repeatability 0.5% typ.	Linearity, Hysteresis & Repeatability 0.2% typ.	Linearity, Hysteresis & Repeatability 0.2% typ.
Temperature Range	Compensated 0 °C to 50 °C [32 °F to 122 °F]	No Temperature Compensation	No Temperature Compensation	No Temperature Compensation

*Absolute only available on 15.0 psi and above.

Ultra Low Pressure Products (<10 inches of water)

Series	ASDXL	DC	SDXL	SCXL	DCXL	DUXL
Description	Amplified	Amplified SureSense™	Calibrated	Calibrated	Calibrated SureSense™	Bare Sensor SureSense™
	Silicon Die with ASIC Output	Dual Silicon Die with ASIC Output	Silicon Die with Thick-film Resistors	Silicon Die with Thick-film Resistors	Silicon Die with Thick-film Resistors	Silicon Die only
Pressure Range	0 in H ₂ O to 5.0 in H ₂ O and 10 in H ₂ O	0 in H ₂ O to 1.0, 2.0, 5.0, 10.0, 20.0, and 30.0 in H ₂ O	0 in H ₂ O to 5.0 in H ₂ O and 10.0 in H ₂ O	0 in H ₂ O to 4.0 in H ₂ O and 10.0 in H ₂ O	0 in H ₂ O to 10.0 in H ₂ O	0 in H ₂ O to 4.0 in H ₂ O and 10.0 in H ₂ O

Switching and Sensing Technology at Honeywell

From basic switching to on-chip, signal conditioned sensors, Honeywell Sensing and Control offers a wide variety of system critical switching and sensing solutions for all of your application needs. For more information, visit our website and interactive catalog at www.honeywell.com/sensing.

Humidity Sensors

Humidity sensors from Honeywell are configured with integrated circuitry to provide on-chip signal conditioning. These sensors contain a capacitive sensing die set in thermoset polymers that interacts with platinum electrodes. Absorption based humidity sensors provide both temperature and %RH (Relative Humidity) outputs. On-chip signal processing ensures linear voltage output versus %RH. Sensor laser trimming offers + 5%RH accuracy, and achieves 2%RH accuracy with calibration. Packages are chemically resistant and operate in ranges of -40 °C to 85 °C (-40 °F to 185 °F) to accommodate harsh environments.

Temperature Sensors and Thermal Products

Temperature sensors provide a change in a physical parameter such as resistance or output voltage that corresponds to a temperature change. These sensors are suitable for applications that require small package size, accuracy, and linear outputs. Honeywell also offers a full line of heaters, thermistors, and thermostats.

Infrared Sensors

Optoelectronic sensors from Honeywell integrate optical principles and semi-conductor electronics. These sensors are reliable, cost effective sensors for applications which require object presence sensing, motion sensing, position encoding, limit sensing, movement detection and counting.

Basic Switches

Honeywell's basic switch product families include standard size basics, miniature, subminiature, hermetically sealed, and high temperature switches. The precision snap-action mechanisms are offered with a wide variety of actuators and operating characteristics. MICRO SWITCH basic switches are ideal for applications requiring compactness, light weight, accurate repeatability and long life. Honeywell basic switches, provide a very cost effective solution for applications that require presence/absence detection where physical contact with object is permissible.

Magnetic Position Sensors

The Honeywell Magnetic Position Sensor family includes digital and analog Hall-effect position sensors, magnetoresistive digital sensors, Hall-effect vane sensors, gear tooth sensors, Hall-effect basic switch, and magnets. Magnetic Position Sensors are reliable, high speed, long life, sensors and are directly compatible with other electronic circuits.

These sensors respond to the presence or the interruption of a magnetic field by producing either a digital or an analog output proportional to the magnetic field strength. Digital and analog "sensor-only" devices are operated by the magnetic field from a permanent magnet or electro-magnet. Position sensors from Honeywell are used in applications that require accurate, reliable outputs.

Position Transducers

The Honeywell Sensing and Control transducer products use potentiometric technology originally developed for military applications and more recently applied to industrial markets. The proprietary MystR® conductive plastic has extensive temperature and power capabilities along with infinite resolution in very small stroke units (5 mm [0.2 in]) without any intermediate signal conditioning. In a world where miniaturization drives sensor development, potentiometers have shrunk to the point where their weight is measured in grams and their stroke in millimeters. This amazing technology can still be utilized for measurements in tens of feet with repeatability in thousandths of an inch.

Current Sensing

Current sensors monitor AC or DC current. Honeywell offers a broad line of adjustable linear, null balance, digital, and linear current sensors. Digital current sensors can sound an alarm, start a motor, open a valve or shut down a pump. The linear signal duplicates the waveform of the current being sensed, and can be used as a feedback element to control a motor or regulate the amount of work being done by a machine.

Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. **The foregoing is Buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose.**

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

Связь**

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
