**FEATURES/BENEFITS**

- Short-Circuit Protected: Prevents damage to system components, assemblies and system wiring
- Optical Isolation: Isolates control circuits from load transients  
Eliminates ground loops and signal ground noise
- Low Off-State Leakage: For high off-state impedance
- Switches High Currents: To 1.5 Adc
- High Noise Immunity: Control signals isolated from switching noise
- High Dielectric Strength: For safety and for protection of control and signal level circuits

**DESCRIPTION**

The SR75-1 solid-state relay utilizes a power FET switch that is protected against short-circuit and overload currents. The short-circuit protection feature not only provides protection should a short or overload occur while the relay is on, but will also provide protection should the relay be switched into a short. In either case, the relay will sense the short-circuit condition and then block it indefinitely until the short is removed and the unit is reset by cycling the input control. Using the SR75-1 to switch power sources and loads can prevent fires, damage to system assemblies and system wiring. The power FET output offers low "ON" resistance and can switch loads in either the high or the low side of the power line. The SR75-1 is packaged in a 16-pin DIP package with either surface-mount or through-hole mounting available.

**NOTES:**

1. The input voltage is 5.0 Vdc for all tests unless otherwise specified.
2. For input voltage greater than 6.0 Vdc a series resistor must be used to limit the power dissipation on the input of the relay. The resistor value should be selected using the following equation:  
 $R = (V_{BIAS} - 6 \text{ volts}) / 11 \text{ mA}$
3. The input transitions are to be less than 1.0 msec duration.
4. Inductive loads must be diode suppressed.
5. Reversing the output polarity when the relay is in overload or is sustaining a short circuit may cause permanent damage.
6. Loads may be switched in either the high side or the low side of the power source.
7. Continuous load current rating is determined with relay mounted on a printed circuit card.
8. Tested at 25°C only.
9. Qualification and/or random sample test only.

## Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
