LC75844M

CMOS IC

1/4-Duty General-Purpose LCD Display Driver

Overview

The LC75844M is a 1/4 duty general-purpose LCD driver that can be used for frequency display in electronic tuners under the control of a microcontroller. The LC75844M can drive an LCD with up to 88 segments directly. The LC75844M can also control up to 4 general-purpose output ports. Since the LC75844M uses separate power supply systems for the LCD drive block and the logic block, the LCD driver block power-supply voltage can be set to any voltage in the range 2.7 to 6.0 volts, regardless of the logic block power-supply voltage.

Application

- Car, Home frequency display

Features

- Support for 1/4 duty 1/2 bias or 1/4 duty 1/3 bias drive of up to 88 segments under serial data control.
- Serial data input supports CCB format communication with the system controller.
- Serial data control of the power-saving mode based backup function and all the segments forced off function
- Serial data control of switching between the segment output port and the general-purpose output port functions
- High generality, since display data is displayed directly without decoder intervention.
- Independent V_{LCD} for the LCD driver block (V_{LCD} can be set to any voltage in the range 2.7 to 6.0 volts, regardless of the logic block power-supply voltage.)
- The INH pin can force the display to the off state.
- RC oscillator circuit

- CCB is a trademark of SANYO Electric Co., Ltd.
- CCB is SANYO's original bus format and all the bus addresses are controlled by SANYO.

■ Any and all SANYO Semiconductor Co., Ltd. products described or contained herein are, with regard to "standard application", intended for the use as general electronics equipment (home appliances, AV equipment, communication device, office equipment, industrial equipment etc.). The products mentioned herein shall not be intended for use for any "special application" (medical equipment whose purpose is to sustain life, aerospace instrument, nuclear control device, burning appliances, transportation machine, traffic signal system, safety equipment etc.) that shall require extremely high level of reliability and can directly threaten human lives in case of failure or malfunction of the product or may cause harm to human bodies, nor shall they grant any guarantee thereof. If you should intend to use our products for applications outside the standard applications of our customer who is considering such use and/or outside the scope of our intended standard applications, please consult with us prior to the intended use. If there is no consultation or inquiry before the intended use, our customer shall be solely responsible for the use.

■ Specifications of any and all SANYO Semiconductor Co., Ltd. products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

Pin Functions

Symbol	Pin No.	Function	Active	I/O	Handling when unused
S1/P1 to S4/P4 S5 to S22	1 to 4 5 to 22	Segment outputs for displaying the display data transferred by serial data input. The S1/P1 to S4/P4 pins can be used as general-purpose output ports under serial data control.	-	O	OPEN
COM1 to COM4	23 to 26	Common driver outputs The frame frequency (fo) is given by: $f_o = (f_{osc}/512)$ Hz.	-	O	OPEN
OSC	32	Oscillator pin, which, together with externally connected resistor and capacitor, makes up an oscillator circuit.	-	I/O	V _{DD}
CE CL DI	34 35 36	Serial data transfer input pin to be connected to the controller. CE: Chip enable CL: Synchronization clock DI: Transfer data		I I I	GND
$\overline{\text{INH}}$	33	Display off input pin • $\overline{\text{INH}} = \text{"L"} (V_{SS}) \dots$ OFF S1/P1 to S4/P4 = "L" (V _{SS}) (Fixed to "L" after forced selection of segment output port.) S5 to S22 = "L" (V _{SS}) COM1 to COM4 = "L" (V _{SS}) • $\overline{\text{INH}} = \text{"H"} (V_{DD}) \dots$ ON Note that the serial data can be transferred when OFF.	L	I	GND
V _{LCD1}	29	Used for applying the LCD driver 2/3 bias voltage externally. Must be connected to V _{LCD2} when a 1/2 bias scheme is used.	-	I	OPEN
V _{LCD2}	30	Used for applying the LCD driver 1/3 bias voltage externally. Must be connected to V _{LCD1} when a 1/2 bias scheme is used.	-	I	OPEN
V _{DD}	27	Logic block power supply pin to provide a voltage between 2.7V to 6.0V.	-	-	-
V _{LCD}	28	LCD driver power supply pin to provide a voltage between 2.7V to 6.0V.	-	-	-
V _{SS}	31	Power supply pin to connect to ground.	-	-	-

Serial Data Transfer Form

(1) When CL is stopped at the low level

Note) DD Direction data

(2) When CL is stopped at the low level

Note) DD Direction data

- CCB address .. “44H”
- D1 to D88 Display data
- P0 to P2..... Segment output port / general-purpose output port switching control data
- DR 1/2 bias driver / 1/3 bias driver switching control data
- SC Segment ON, OFF control data
- BU Normal mode, power save mode control data

LC75844M

(3) SC Segment ON, OFF control data

This control data controls segment ON and OFF.

SC	Display state
0	ON
1	OFF

Note: that the OFF state with SC=[1] corresponds to the OFF state due to output of the display OFF waveform from the segment output pin.

(4) BU Normal mode, Power save mode control data

This control data controls normal mode and power save mode.

BU	Mode
0	Normal mode
1	Power save mode (oscillation on the OSC pin stops and the common, segment output pins go low, However, output pins S1/P1 to S4/P4 can be used as the general-purpose output port by the use of control data P0 to P2.)

Display data and output pin correspondence

Output pin	COM1	COM2	COM3	COM4
S1/P1	D1	D2	D3	D4
S2/P2	D5	D6	D7	D8
S3/P3	D9	D10	D11	D12
S4/P4	D13	D14	D15	D16
S5	D17	D18	D19	D20
S6	D21	D22	D23	D24
S7	D25	D26	D27	D28
S8	D29	D30	D31	D32
S9	D33	D34	D35	D36
S10	D37	D38	D39	D40
S11	D41	D42	D43	D44

Output pin	COM1	COM2	COM3	COM4
S12	D45	D46	D47	D48
S13	D49	D50	D51	D52
S14	D53	D54	D55	D56
S15	D57	D58	D59	D60
S16	D61	D62	D63	D64
S17	D65	D66	D67	D68
S18	D69	D70	D71	D72
S19	D73	D74	D75	D76
S20	D77	D78	D79	D80
S21	D81	D82	D83	D84
S22	D85	D86	D87	D88

Note: Output pins S1/P1 to S4/P4 are for segment output port selection.

For example, the data to output pin correspondence for the output pin S11 is as follows.

Display data				Output pin (S11) state
D41	D42	D43	D44	
0	0	0	0	LCD segments for COM1, COM2, COM3 and COM4 OFF
0	0	0	1	LCD segment for COM4 ON
0	0	1	0	LCD segment for COM3 ON
0	0	1	1	LCD segments for COM3 and COM4 ON
0	1	0	0	LCD segment for COM2 ON
0	1	0	1	LCD segments for COM2 and COM4 ON
0	1	1	0	LCD segments for COM2 and COM3 ON
0	1	1	1	LCD segments for COM2, COM3 and 4 ON
1	0	0	0	LCD segment for COM1 ON
1	0	0	1	LCD segments for COM1 and COM4 ON
1	0	1	0	LCD segments for COM1 and COM3 ON
1	0	1	1	LCD segments for COM1, 3 and COM4 ON
1	1	0	0	LCD segments for COM1 and COM2 ON
1	1	0	1	LCD segments for COM1, COM2 and COM4 ON
1	1	1	0	LCD segments for COM1, COM2 and COM3 ON
1	1	1	1	LCD segments for COM1, COM2, COM3 and COM4 ON

Output Waveforms (1/4-Duty 1/2-Bias ON System)

Output Waveforms (1/4-Duty 1/3-Bias ON System)

INH and Display Control

Since the IC internal data (D1 to D88, control data) is undefined immediately after applying power, hold $\overline{\text{INH}}$ low at same time as applying power to turn off the display (S1/P1 to S4/P4, S5 to S22, COM1 to COM4 ... V_{SS} level), and serial transfer data from the microprocessor during the period that $\overline{\text{INH}}$ is low.

When the data transfer is complete, set $\overline{\text{INH}}$ high.

This procedure will avoid displaying meaningless patterns at startup. (See Figure 3)

Power Sequence

Be sure to observe the following sequence for power ON/OFF (See Figure 3)

- Power ON: Logic block power (V_{DD}) ON $\rightarrow$ LCD driver power (V_{LCD}) ON
- Power OFF: LCD driver power (V_{LCD}) OFF $\rightarrow$ Logic block power (V_{DD}) OFF

When the logic block power (V_{DD}) and LCD driver power (V_{LCD}) are common, both power supplies can be turned ON/OFF simultaneously.

Figure 3

- Note:
- $t_1 \geq 0$
 - $t_2 > 0$
 - $t_3 \geq 0$ ($t_2 > t_3$)
 - $t_c \dots 10\mu\text{s min}$

Note on Controller-used Display Data Transfer

Since the LC75844M is such that display data (D1 to D88) is transferred in 4 times, it is recommended to transfer display data within 30 [ms] in terms of display quality.

Sample Application Circuit 3

1/3 bias (For normal panel)

*2 If a capacitor other than the external capacitor $C_{osc}=680$ [pF] recommended is to be used, it is recommended to use a capacitor of 220 to 2200 [pF].

Sample Application Circuit 4

1/3 bias (For large panel)

*2 If a capacitor other than the external capacitor $C_{osc}=680$ [pF] recommended is to be used, it is recommended to use a capacitor of 220 to 2200 [pF].

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
