

RJF 544

Ethernet Connection System for Harsh Environment – Industrial Ethernet

Description

RJField allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT, 100 BaseTX or 1000 BaseT networks in harsh environments:

- Sealed against fluids and dusts (IP67)
- Shock, Vibration and Traction resistant
- No cabling operation in field and no tools required
- Improved EMI Protection

With the patented RJStop® system you can use a **standard RJ45 cordset** in a protective composite plug which will protect it from shocks, dust and fluids.
No hazardous in-field cabling and grounding !

*Electronica 2004 :
RJField awarded « Component
Product of the Year »*

**RJF544 is
ROHS compliant**

**Transform your RJ45
cordset into a Push Pull
IP67 Connector !**

This RJF 544 plug is connected into a receptacle, using a **quick** user-friendly **Push Pull** coupling mechanism.
On the receptacle, one female RJ45 is soldered onto a PCB allowing for the following back terminations :

- another female RJ45
- a RJ45 cordset
- a Solder termination

The RJ45 cordset shielding is transmitted to the RJ45 receptacle through lateral grounding fingers.
For an outstanding EMI protection, a metallized (Ni), version of the RJF 544 receptacle, transmits the shielding directly to the panel.

Assembly instructions

1. Push down the RJ45 cordset latch, and fix it inside the insert
2. Press in and click the other part of the insert
3. Insert in the plug housing

Easy and Safe : No field cabling tools required

* The RJStop® system allows the use of standard RJ45 cordsets regardless their Brand. However, Amphenol Socapex can provide Cat5-5e cordset with reinforced jacket to be used in harsh environments (shocks, oils, fuel,...). Please consult factory.

Locking and Unlocking sequences

In unlocked position, the locking ring cannot move forward.

Once the plug has been inserted into the receptacle, the locking ring is free and can be pushed forward.

The connector is unlocked by pulling back the locking ring, and withdrawing the plug.
