D4B-N omron

Safety Limit Switch

Positive Action Limit Switches with Direct Drive Contacts for Critical Switching Applications

- Snap-action contact for accurate switching with safe operation via direct drive positive opening mechanism
- Two sets of contacts: one (NC) for safety circuit and the other (NO) for control circuit
- Safety of lever settings ensured as a mechanism engages a gear between the operating position indicator plate and the lever
- Conforms to EN (TÜV) standards corresponding to the CE marking
- 3-conduit switches are available for easy wiring
- Conforms to these standards and EC Directives:

Machinery Directive Low Voltage Directive EN1088 EN50041

Approved Standards

Snap-Action Models

| Agency | Standard | File No. | |

| OP | | | 35±1 mm | 48±1 mm | | | |

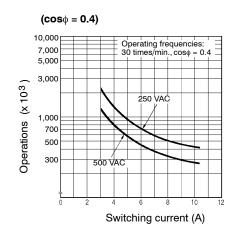

Note: 1. The operating characteristics of these Switches were measured with the roller lever set at 31.5 mm.

- 2. The operating characteristics of these Switches were measured with the rod lever set at 140 mm.
- 3. Only for slow-action models.
- 4. Only for snap-action models.

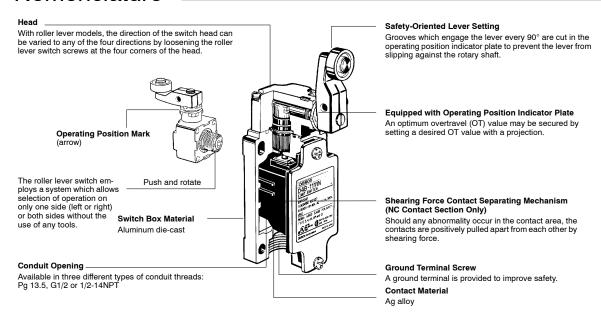

Engineering Data

■ ELECTRICAL LIFE EXPECTANCY SNAP-ACTION MODELS

Nomenclature

Operation

■ CONTACT FORM (EN50013)

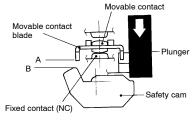

| Model | Contact | | Diagrar | ns | Explanation |
|----------|--------------------------|------------------------|----------------|-------------|--|
| D4B-⊡1⊡N | 1NC/1NO (Snap-action) | 13 — Za — 14 — 12 | 11-12 13-14 | ON Stroke → | Only NC contact 11-12 has an approved positive opening mechanism. Terminal numbers 11-12 and 13-14 cannot be used as unlike poles. |
| D4B-⊡5⊡N | 1NC/1NO (Slow-action) | 7b 11 12 23 - 24 | 11-12 23-24 | ON Stroke → | Only NC contact 11-12 has an approved positive opening mechanism. Terminal numbers 11-12 or 23-24 can be used as unlike poles. |
| D4B-□A□N | 2NC (Slow-action) | 21 | 11-12 21-22 | ON Stroke → | Both NC contacts 11-12 and 21-22 have an approved positive opening mechanism. Terminal numbers 11-12 and 21-22 can be used as unlike poles. |

■ POSITIVE CONTACT OPENING MECHANISM

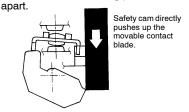

1NO/1NC Contact (Snap-action)

If metal deposition between mating contacts occurs on the NC contact side, they can be pulled apart by the shearing force and tensile force generated when part B of the safety cam or plunger engages part A of the movable contact blade. When the safety cam or plunger is moved in the direction of the arrow, the Limit Switch releases.

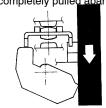

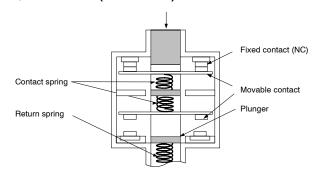

2. When contacts are being pulled

3. When contacts are completely pulled apart.

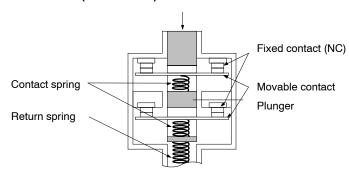

1NC/1NO Contact (Slow-Action)

Conforms to IEC 947-5-1 Positive Opening

When metal deposition occurs, the contacts are separated from each other by the plunger being pushed in.

2NC Contact (Slow-Action)

Conforms to EN60947-5-1

When metal deposition occurs, the contacts are separated from each other by the plunger being pushed in.

is marked on the product to indicate approval of positive opening.

Dimensions

Unit: mm (inch)

Note: 1. Unless otherwise specified, a tolerance of ±0.4 mm applies to all dimensions shown in this section.

2. When placing your order, specify the conduit type by adding a code (see below) to the first blank box in the model number of the selected switch. (For more ordering information, refer to the Model Number Legend, found in the *Ordering Information* of this data sheet.)

Key for Part No. Code:

Conduit type for standard switches

1: PG 13.5 (European)

2: G 1/2 (Japanese)

3: 1/2-14NPT (North American)

Conduit type for 3-conduit switches

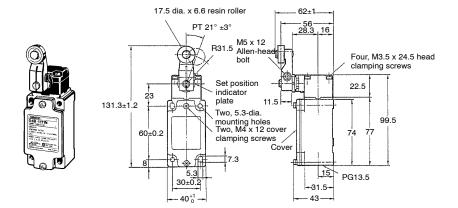

5: PG 13.5 (European)

6: G 1/2 (Japanese)

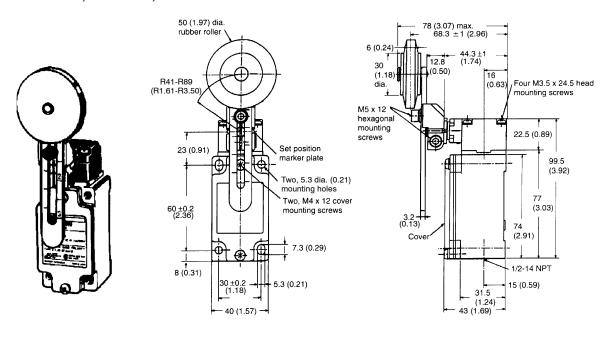

7: 1/2-14NPT (North American)

■ SWITCHES

Roller Lever D4B-□□11N

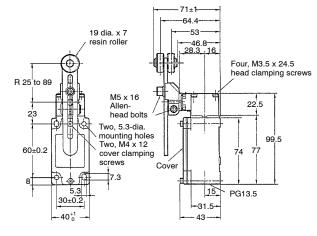

Adjustable Roller Lever Switch, Rubber Roller D4B-3113N, D4B-3513N, D4B-3A13N

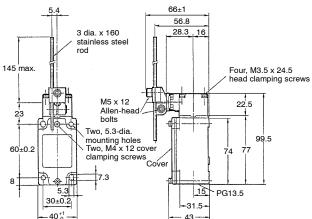

Adjustable Roller Lever D4B-□□16N

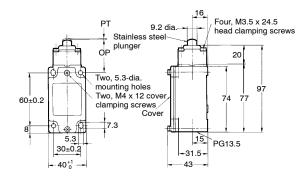

Adjustable Rod Lever D4B-□□17N

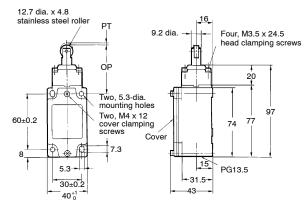

Top Plunger D4B-□□70N

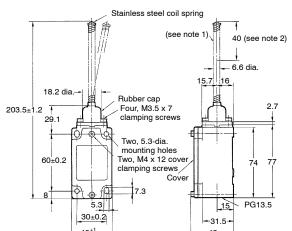

Top Roller Plunger D4B-□□71N

Coil Spring D4B-□□81N

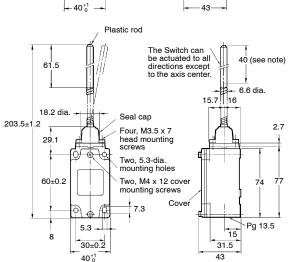

Note: 1. The coil spring may be operated from any directions except axial directions (↓).

 Be sure to adjust the dog to within 40 mm from the top end of the coil spring.

Plastic Rod D4B-□□87N

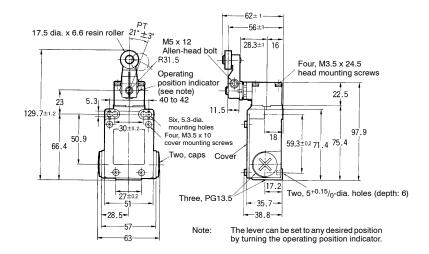

Note: Be sure to adjust the dog to within 40 mm from the top end of the plastic rod.

CW, CCW or Two-way Operation

The head of Side Rotary Switches can be converted in seconds to CW, CCW, or two-way operation. The conversion procedure follows.

Procedure

- 1. Remove the head by loosening the four screws that secure it.
- Turn over the head to set the desired operation (CW, CCW, or both). The desired operation can be selected by setting the mode selector knob shown in the figure. This knob is factory set to the "CW + CCW" (two-way operation) position.
- Set the CW hole on the head at the operation position mark (arrow) for clockwise operation or set the CCW hole right at the arrow for counterclockwise operation. In either case, be sure to set the hole position exactly at the arrow point.

Precautions

If the D4B- \square N is applied to an emergency stop circuit or safety circuit for prevention of injury, use the D4B- \square N model that has an NC contact equipped with a force-separation mechanism, and make sure that the D4B- \square N operates in the positive mode. In addition, secure the D4B- \square N with screws that are tightened in a single direction so that the D4B- \square N cannot be easily removed. Then provide a protection cover for the D4B- \square N and post a warning label near the D4B- \square N.

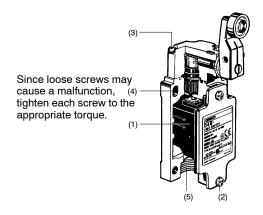

In order to protect the D4B- \square N from damage due to short-circuiting, connect a fuse breaking a current 1.5 to 2 times higher than the rated current in parallel with the D4B- \square N.

If an application satisfying EN standards is to employ the D4BL, apply the 10-A gI or gG fuse approved by IEC269.

Do not apply the D4B- \square N to the door without applying a stopper to the door.

If the D4B- \square N is used with the actuator normally pressed, the D4B- \square N may malfunction or may soon have reset failures. Be sure to check and replace the D4B- \square N regularly.

Tightening Torque

| | Type | Proper tightening torque |
|---|--------------------------------------|--------------------------|
| 1 | Terminal screw (M3.5) | 0.59 to 0.78 N • m |
| 2 | Cover-mounting screw (see note) | 1.18 to 1.37 N • m |
| 3 | Head-mounting screw | 0.78 to 0.98 N • m |
| 4 | Switch-mounting screw (M5) | 4.90 to 5.88 N • m |
| 5 | Connector | 1.77 to 2.16 N • m |
| 6 | Cap screw (for three-conduit models) | 1.27 to 1.67 N • m |

Note: Apply a tightening torque of 0.78 to 0.88 N • m to conduit models.

■ CORRECT USE

Operating Environment

The D4B- \square N is for indoor use. The D4B- \square N may malfunction if the D4B- \square N is used outdoors. Be sure to use a model with a lever-type actuator for outdoor use instead.

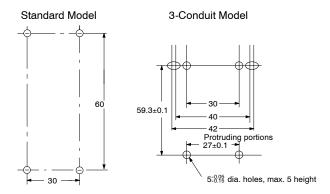

Do not use the D4B-□N in the following places:

- · Places with radical temperature changes.
- Places with excessive humidity that may cause condensation.
- · Places with excessive vibration.
- Places where metal dust, oil, or chemical may be sprayed to the D4B
 N.

Mounting

Use four M5 screws with washers to mount the standard model. Be sure to apply the proper torque to tighten each screw. The D4B- \square N can be mounted more securely by using the four screws plus two 5 $^{-0.05}/_{-0.15}$ -mm protruding parts, each of which has a maximum height of 4.8 mm as shown below.

Mounting Dimensions (M5)

Changes in Actuator Mounting Position

To change the angle of the lever, loosen the Allen-head bolts on the side of the lever.

The operating position indicator plate has protruding parts which engage with the lever, thus allowing changes to the lever position by 90°.

The back of the operating position indicator plate has no protruding parts. The lever can be set at any angle by attaching the operating position indicator plate to the Switch so that this side will face the lever. In this case, however, the D4B-□N will not be approved by SUVA or BIA. Make sure that the lever engages with the operating position indicator plate securely so that the lever will not slip.

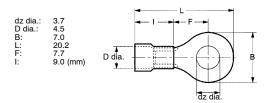

Changes in Head Mounting Position

By removing the screws on the four corners of the head, the head can be reset in any of four directions. Make sure that no foreign materials will penetrate through the head.

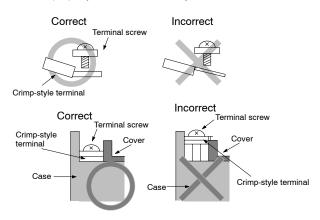

Wiring

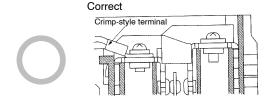

Do not connect the bare lead wires directly to the terminals but be sure to connect each of them by using an insulation tube and M3.5 round solderless terminals and tighten each terminal screw within the specified torque range.

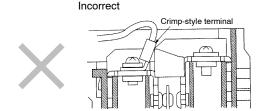

The proper lead wire is 20 to 14 AWG (0.5 to 2.5 mm²) in size.

Make sure that all solderless terminals come into contact with the casing or cover as shown below, or the cover may not be mounted properly or the D4B-□N may malfunction.

Connector

Make sure that each connector is tightened within the specified torque range. The casing may be damaged if the connector is tightened excessively.

If the 1/2-14NPT is used, cover the cable and conduit end with sealing tape in order to ensure IP67.

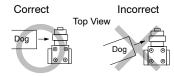

The Pg13.5 connector must be Nippon Flex's ABS-08Pg13.5 or ABS-12 Pg13.5.

Use OMRON's SC-series connector which is suited to the cable in diameter.

Properly attach the provided conduit cap to the unused conduit opening and securely tighten the cap screw within the specified torque when wiring the D4B-□N.

Actuator Load

The load for the actuator (roller) of the Switch must be imposed on the actuator in the horizontal direction, or the actuator or the rotating axis may be deformed or damaged.

When using a long lever model like the D4B-□□16N or D4B- \square 17N, the Switch may telegraph. To avoid telegraphing, take the following precautions.

- 1. Set the lever to operate in one direction. (For details, see the data sheet section: CW, CCW or Two-way Operation.)
- 2. Modify the rear end of the dog to an angle of 15° to 30° as shown below or to a secondary-degree curve.

3. Modify the circuit so as not to detect the wrong operating signals.

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию.

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России, а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научноисследовательскими институтами России.

С нами вы становитесь еще успешнее!
