

Brief Description

The SSC Sensor Replacement Board is included in IDT's modular SSC Evaluation Kits, which provide a very simple and intuitive method for evaluating both hardware and software for IDT's resistive sensor signal conditioner (SSC) IC products. SSC Evaluation Kit components include the SSC Evaluation Software, the SSC Communication Board, and the SSC Evaluation Board designed for the SSC product under test. Simply interchanging the SSC Evaluation Boards for different SSC ICs and changing software settings allows comparison of the advantages of each product. The Sensor Replacement Board (SRB) can be used with the kit to evaluate any IDT SSC IC product for resistive sensors by providing an artificial replacement for the bridge sensor and an external diode for external temperature measurement if applicable to the SSC IC.

The SSC Sensor Replacement Board can expedite the design process because the SSC IC can be calibrated and tested even before the actual sensor element has been selected. A simple “test-on-the-desk” is possible without expensive equipment.

The SSC Sensor Replacement Board connects to the SSC Evaluation Board via a 50-pin connector that allows “plug & play” connectivity. Test points provide access to all signal lines for the replacement sensor enabling a simple system check.

An on-board potentiometer creates an adjustable voltage divider for simulating the differential bridge sensor voltage V_{BR_DIFF} to be conditioned by the SSC IC (VINN and VIND signals on the SRB) for an output that is ratiometric to the bridge supply voltage V_{BR} (voltage divider supply voltage). An on-board 1N4148 diode can be used as an external temperature sensor depending on the SSC IC.

Features

- Simple installation via “Plug & Play” connectivity
- Power supplied by the SSC Evaluation Board
- Access to all sensor signal lines of the replacement sensor on board

Benefits

- Basic system evaluation using the replacement sensor
- External temperature sensing via on-board diode for SSC ICs with an external temperature sensor input
- Modular kit design allows reusing SSC Sensor Replacement Board with different SSC Evaluation Boards for comparing IDT's SSC ICs

Related Products

- SSC Communication Board – provides an interface to user's computer for communicating commands, reading measurement results, and calibration
- SSC Evaluation Board for SSC IC under test
- SSC Evaluation Software for SSC IC under test

SSC Sensor Replacement Board Features

Test points for easy access to bridge and temperature signals (VTN=IR_Temp)

External temperature
diode (1N4148)

Potentiometer for simulating bridge

(L x W x H = 67mm x 34mm x 15 mm)

Important Note

Restrictions in Use

The software and the hardware for the ZSC31xxx / ZSSC3xxx SSC Evaluation Kits, including the SSC Sensor Replacement Board, are designed for IC evaluation, laboratory setup and module development only.

The ZSC31xxx / ZSSC3xxx Evaluation Kit hardware and software must not be used for module production or production test setups.

Disclaimer

IDT shall not be liable for any damages arising out of defects resulting from:

- (i) delivered hardware and software
- (ii) non-observance of instructions contained in this manual, or
- (iii) misuse, abuse, use under abnormal conditions or alteration by anyone other than IDT.

To the extent permitted by law, IDT hereby expressly disclaims and user expressly waives any and all warranties, whether express, implied, or statutory, including, without limitation, implied warranties of merchantability and of fitness for a particular purpose, statutory warranty of non-infringement and any other warranty that may arise by reason of usage of trade, custom, or course of dealing.

1 Electrical Specifications

PARAMETER	SYMBOL	CONDITIONS	MIN	TYP	MAX	UNITS
Ambient temperature range ¹⁾	T_{AMB}		+10		+45	°C
External Bridge Supply Voltage	V_{BR}			5	15	VDC
Simulated Sensor Bridge Resistance	R_{BR}		3.800	4.050	4.205	k Ω
Typical Adjustable R_{BR} Range			3.950		4.050	k Ω

1. Important: The SSC Communication Board is designed for operation at room temperature only. Do not place this board in temperature chambers during calibration.

2 SSC Sensor Replacement Board Overview

The SSC Sensor Replacement Board (SRB) is a component of IDT's SSC Evaluation Kits for IDT sensor signal conditioner (SSC) ICs for resistive sensor bridges. It functions with the SSC Communication Board and the SSC Evaluation Board for the SSC IC under test to enable evaluation and calibration of the IC. An example of the SRB being used in the Evaluation Kit is given in Figure 2.1.

5 Document Revision History

Revision	Date	Description
1.04	November 15, 2013	Addition of temperature specifications and warnings. Clarification that U1 is not populated when SRB is used in SSC Evaluation Kits. Addition of kit example illustration. Addition of "Related Products" section on page 2. Update for contact information and imagery for cover and headers.
	March 29, 2016	Changed to IDT branding.

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
