Functional Diagram

General Description

The HMC904LC5 is a compact GaAs MMIC I/Q downconverter in a leadless RoHS compliant SMT package. This device provides a small signal conversion gain of 12 dB with a noise figure of 3 dB and 30 dB of image rejection across the frequency band. The HMC904LC5 utilizes an LNA followed by an image reject mixer which is driven by an active x2 multiplier. The image reject mixer eliminates the need for a filter following the LNA, and removes thermal noise at the image frequency. I and Q mixer outputs are provided and an external 90° hybrid is needed to select the required sideband. The HMC904LC5 is a much smaller alternative to hybrid style image reject mixer downconverter assemblies, and is compatible with surface mount manufacturing techniques.

|--|----------|--|---------------------|
| 1 | VDLO | Power supply for first stage of LO amplifier. | |
| 2, 4 - 6, 8, 9, 12 - 18, 21, 22, 25 - 28, 31, 32 | N/C | The pins are not connected internally; however, all data shown herein was measured with these pins connected to RF/DC ground externally. | |
| 3 | VDLO2 | Power supply for second stage of LO amplifier. | |
| 7 | VDRF | Power supply for RF LNA. | |
| 10, 19, 24, 29 | GND | These pins and the exposed ground paddle must be connected to RF/DC ground. | |
| 11 | RF | This pin is AC coupled and matched to 50 Ohms | |
| 20 | IF2 | This pin is DC coupled. For applications not requiring operation to DC this port should be DC blocked externally using a series capacitor whose value has been chosen to pass the necessary frequency range. For operation to DC, this pin must not sink / source more than 3 mA of current or part non-function and possible failure will result. | |
| 23 | IF1 | | |
| 30 | LO | This pin is AC coupled and matched to 50 Ohms. | |

The circuit board used in the application should use RF circuit design techniques. Signal lines should have 50 Ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation circuit board shown is available from Hittite upon request.
