4:1 Micro USB Switch with Accessory detection and OVP

ON Semiconductor®

<http://onsemi.com>

Overview

The LC824204-13YB is the IC suitable for use in multi function and high performance switch as well as compatible accessory detector which supports micro USB connector for DSC, DVC and mobile phone.

This IC includes low impedance USB supply switch (100 mΩ) which enables high speed battery charge as well as USB2.0-capable switch with low input capacitance, negative input-capable low distortion audio switch, UART, microphone (Mono, Stereo), and various video signal switches.

Also, this IC integrates auto detector for accessories which is capable of detecting accessories compliant to CEA936-A automotive kit and ACA standard which includes MCPC standard established in June 2010. In addition, it's capable of detecting a lot of charger accessories, such as Dedicated (D+/D- short) charger, Apple charger, SONY charger, USB charger and so on. Switching operation is controlled via I²C serial interface.

Function

- Configuration
 - Audio-SW (Mono/Stereo, Negative signal capable)
 - USB2.0-SW (LowSpeed/FullSpeed/HighSpeed-capable)
 - UART-SW
 - Video-SW (Video + V_Audio-R/L)
 - MIC-SW (DP/VBUS switch, Mono/Stereo-capable)
 - VBUS-SW
 - High speed battery charge –capable (100mΩ)
 - Integrated OVP, OCP, TSD
 - DP/DM short-circuit detection, VBUS auto detection
 - Various charger detection (Dedicated, Apple, SONY, USB)
 - ID detection function
 - Integrated 5-bit ADC
 - I²C Interrupt function
- Package
 - WLCSP Pin25, 2.07 mm × 2.07 mm, 0.4 mm pitch
 - Halogen-free, lead-free-capable
- Operating temperature
 - -30 to 85°C
- Supply voltage
 - VDD : 3.0 to 3.6 V
 - VBUS : 4.5 to 5.5 V
- ID detection for the accessories
 - MCPC standard, CEA936-A automotive kit standard, ACA standard-compliant
- Application
 - DSC, DVC, mobile phone

Function Description

Charger Detection

By using charger detector circuit including built-in D+/D- short-circuit detector, you can judge the connection of DP pin and DM pin and then detect charger according to USB Charger and Battery Charging Specification Revision 1.1 as well as CEA936-A automotive kit specification. This IC can detect the charger of the following list.

Detectable charger list
Standard Downstream Port (USB mode)
Dedicated Charging Port (D+/D- short ACC)
Apple Charger
SONY Charger
D- High Charger (Basic CarKit Type1,2 ACC)
VBUS only ACC (No Charger Detect)

Accessory ID Detection

Accessory is detected according to CEA936-A automotive kit and ACA standard including MCPC standard using ID detection circuit including built-in 5-bit ADC. Accessories are judged from the resistance value of accessory (RID) connected to ID pin. ID range of RID varies depends on each standard. See Resistance (RID) and Detectable accessory for the further details.

Application Circuit Example

Caution:

- (1) Connect a capacitor higher than 1 μF to VBUSOUT
- (2) Pull Up supply for CHG_DETB (open drain) should be the same VDD as the LSI. Since Pch protector diode is connected to CHG_DETB, when VDD is OFF, latch up may occur when the signal level turns high by the pull up.
- (3) Make sure to connect capacitor (C cut) to VIDEO pin.
- (4) TEST should be either GND or Open.

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
