**Standard Proximity Sensor** 

E2E

## Your Search for Proximity Sensors Starts with the World-leading Performance and Quality of the E2E

- Standard Sensors for detecting ferrous metals.
- Wide array of variations. Ideal for a variety of applications.
- Models with different frequencies are also available to prevent mutual interference.
- Superior environment resistance with standard cable made of oilresistant PVC and sensing surface made of material that resists cutting oil.
- Useful to help prevent disconnection. Cable protector provided as a standard feature.

\*1: No AC/DC 2-wire models or AC 2-wire M8 models are compliant. \*2: Attach three ferrite clamps to the cable of the E2E-X3 and E2E-X8MD. (Refer to information on TDK catalog number ZCAT2035-0930A.)

### Features

page 27

### 2-Wire Models

Pre-wired Models with Oil-resistant Reinforced PUR Cables Added to the Lineup and Easy Differentiation with Orange Head

Differentiation from standard models: Orange Head

Oil Resistance (Insulation service life): twice or three times that of oil-resistant vinyl chloride

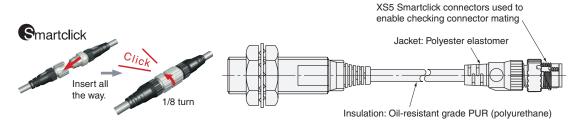

Cable Flexibility: approximately twice that of cinyl chloride cables

More Flexibility at -40°C

### Lineup includes models with Smartclick pre-wired connectors for fast connection.

### Lineup includes models with self-diagnostic output to provide notification of failures and unstable detection conditions, such as coil burnout.

• Contributes to preventive maintenance to keep the line from stopping.

### Reduced wiring, fewer resources, and low power consumption contribute to environmentalism.

- Wiring work and amount of copper wire used reduced to two thirds of that required for 3-wire models.
- Current consumption drastically reduced to less than 10% (when a DC 2-wire model is compared with a DC 3-wire model).

**3-Wire Models** 

### Lineup includes models with small diameter (3 dia., 4 dia., 5.4 dia., M5)

- All small-diameter models use sealed construction. Operation is stable even when the Sensor is mounted in a small space or embedded in metal. • Bright indicators enable easily checking the installation condition.

### Wide range of ambient operating temperatures: -40°C to 85°C (M8 to M30 models)

- Wide range of ambient operating temperatures also for small-diameter models: -25°C to 70°C
- Suitable for low-temperature and high-temperature applications, which are troublesome for photoelectric sensors.

### Lineup includes models with flexible cable (4-dia. to M30 models)

• Reduced risk of disconnection in applications with moving parts.

## Models Listed by E2E Type

●: Standard Models, ▲: Different frequency, □: Self-diagnosis, ■: Different frequency and self-diagnosis, ----: Not listed

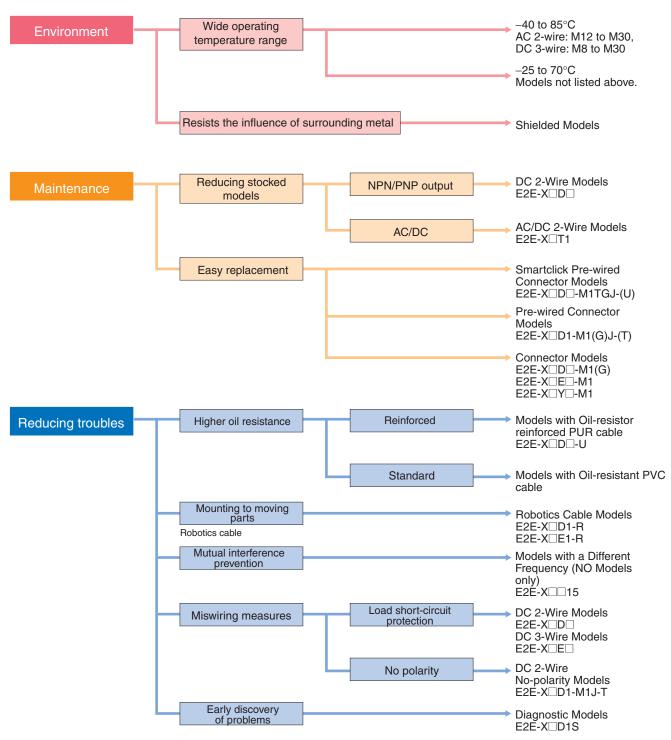

### 2-Wire Models

\*1. Models with different frequencies are also available. The model number is E2E-X D15 (example: E2E-X3D15-N 2M).
\*2. Models with a flexible cable are also available. Add "-R" rather than "-N" to the end of the model number (example: E2E-X2D1-R 2M).
\*3. The standard stock includes models with a cable length of 5 m. Specify the cable length at the end of the model number. (Example: E2E-X3D1-N 5M)
\*4. Defendent areas 044 for debiild.

\*4. Refer to page 24 for details.
\*5. The residual voltage for models without polarity is 5 V, so use caution concerning the connection load interface conditions (e.g., PLC ON voltage). Refer to page 28.
\*6. The standard cable length is 300 mm. Cables with a length of 500 mm and 1 m can also be manufactured.

### Unshielded DC 2-Wire Models with No Self-diagnosis Output [Refer to Dimensions on page 29.]

\*2. Refer to page 24 for details.

### **Connector Pin Assignments of DC 2-Wire Models**

- The connector pin assignments of each New E2E DC 2-Wire Model conform to IEC 947-5-2 Table III. (Only DC 2-Wire Models have been changed in comparison to the previous models.)
- The following models with conventional connector pin assignments are available as well. (Only NO Models can be used.) The cable at the right should also be used if the XW3A-P\_45-G11 Connector Junction Box is already being used.

#### Models with conventional connector pin assignments are available as well.

\*1. The standard stock includes models with a cable length of 5 m. Specify the cable length at the end of the model number. (Example: E2E-X2E1 5M) \*2. Models with a flexible cable are also available. Add -R to the end of the model number. (example: E2E-X5E1-R 2M). \*3. Models with different frequencies are also available. The model number is E2E-X = 5 (example: E2E-X5E15 2M). \*4. Refer to page 24 for details.

### Unshielded DC 3-Wire Models [Refer to Dimensions on page 29.]

\*1. The standard stock includes models with a cable length of 5 m. Specify the cable length at the end of the model number. (Example: E2E-X5ME1 5M)
\*2. Models with a flexible cable are also available. Add -R to the end of the model number. (example: E2E-X51-R 2M).
\*3. Models with different frequencies are also available. The model number is E2E-X IM 5 (example: E2E-X5ME15 2M).
\*4. Refer to page 24 for details.

\*1. Use the E2E within the range in which the setting indicator (green LED) is ON (except D2 Models).
\*2. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
\*3. The residual voltage of each M1J-T Model is 5 V. When connecting to a device, make sure that the device can withstand the residual voltage. (Refer to page 28 for details.)

\*1. When supplying 24 VAC to any of the above models, make sure that the operating ambient temperature range is at least -25°C.
 \*2. When using an M18 or M30 Connector Model at an ambient temperature between 70 and 85°C, make sure that the Sensor has a control output (load current) of 5 to 200 mA max.

\*1. The response frequency is an average value. Measurement conditions are as follows: standard sensing object, a distance of twice the standard sensing object, and a set distance of half the sensing distance.
\*2. Power Supply Voltage Waveform: Use a sine wave for the power supply. Using a rectangular AC power supply may result in faulty reset.

### <u> WARNING</u>

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

### 

- Do not short the load. Explosion or burning may result.
- Do not supply power to the Sensor with no load, otherwise Sensor may be damaged. Applicable Models

(Unit: mm)

#### E2E-CR6 E2E-CR8 E2E-X1 E2E-X1 E2E-C1

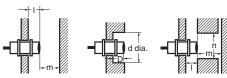

### **Precautions for Correct Use**

Do not use this product under ambient conditions that exceed the ratings.

### • Design

### Influence of Surrounding Metal

When mounting the Sensor within a metal panel, ensure that the clearances given in the following table are maintained. Failure to maintain these distances may cause deterioration in the performance of the Sensor.

### Influence of Surrounding Metal

|                                   |              |      |    |          |           |           |  |

Note: Values in parentheses apply to Sensors operating at different frequencies.

### Loads with Large Surge Currents (E2E-X T)

If a load with a large surge current is connected, such as a relay, lamp, or motor, the surge current may cause the load short-circuit protection circuit to operate, resulting in operating errors.

### Mounting

### **Tightening Force**

Do not tighten the nut with excessive force. A washer must be used with the nut.

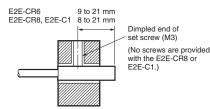

Note: 1. The allowable tightening strength depends on the distance from the edge of the head, as shown in the following table. (A is the distance from the edge of the head. B includes the nut on the head side. If the edge of the nut is in part A, the tightening torque for part A applies instead.)

<sup>2.</sup> The following strengths assume washers are being used.

| Model      |          | Part      | Part B   |           |  |
|------------|----------|-----------|----------|-----------|--|
|            | Model    | Dimension | Torque   | Torque    |  |
| M5         |          |           | 1 N⋅m    |           |  |
| M8         | Shielded | 9         | 9 N⋅m    | 12 N⋅m    |  |
| Unshielded |          | 3         | 9 11.111 | 12 10-111 |  |
| M12        |          | 30 N·m    |          |           |  |
| M18        |          | 70 N·m    |          |           |  |
| M30        |          | 180 N·m   |          |           |  |

Refer to the following to mount the E2E-CR6, E2E-CR8 and E2E-C1 Unthreaded Cylindrical Models.

When using a set screw, tighten it to a torque of 0.2 N·m max. (E2E-C1: 0.4 N·m max.)

### Connecting a DC 2-Wire Proximity Sensor to a PLC (Programmable Controller)

### **Required Conditions**

Connection to a PLC is possible if the specifications of the PLC and the Proximity Sensor satisfy the following conditions. (The meanings of the symbols are given at the right.) 1.

- The ON voltage of the PLC and the residual voltage of the Proximity Sensor must satisfy the following.  $V_{ON} \leq V_{CC} - V_{R}$
- The OFF current of the PLC and the leakage current of the Proximity Sensor must satisfy the following. 2. IOFF ≥ Ileal
- (If the OFF current is not listed in the PLC's input specifications, take it to be 1.3 mA.)

The ON current of the PLC and the control output of the Proximity Sensor must satisfy the following. З. IOUT (min.)  $\leq$  ION  $\leq$  IOUT (max.)

The ON current of the PLC will vary, however, with the power supply voltage and the input impedance, as shown in the following equation. ION = (VCC - VR - VPC)/RIN

#### Example

In this example, the above conditions are checked when the PLC Unit is the C200H-ID212, the Proximity Sensor is the E2E-X7D1-N, and the power supply voltage is 24 V.

- 1. Von (14.4 V)  $\leq$  Vcc (20.4 V) Vr (3 V) = 17.4 V:OK OK
- 2. IOFF (1.3 mÅ) ≥ Ileak (0.8 mÅ):
- 3. Ion = [Vcc (20.4 V) VR (3 V) VPLc (4 V)]/Rin (3 k $\Omega$ ) = Approx. 4.5 mA Therefore, lout (min.) (3 mA)  $\leq$  lon (4.5 mA): OK Connection is thus possible.

VON: ON voltage of PLC (14.4 V) Ion: ON current of PLC (typically 7 mA) IOFF: OFF current of PLC (1.3 mA) RIN: Input impedance of PLC (3  $k\Omega$ ) VPc: Internal residual voltage of PLC (4 V) VR: Output residual voltage of Proximity Sensor (3 V) Ileak: Leakage current of Proximity Sensor (0.8 mA) IOUT Control output of Proximity Sensor (3 to 100 mA) Vcc: Power supply voltage (PLC: 20.4 to 26.4 V) Values in parentheses apply to the following PLC model and Proximity Sensor model. C200H-ID212 PLC: Sensor: E2E-X7D1-N

| F (mm)     | 8.5 <sup>+0.5</sup> dia. | 12.5 <sup>+0.5</sup> dia. | 18.5 <sup>+0.5</sup> dia. | 30.5 <sup>+0.5</sup> dia. |

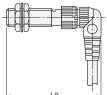

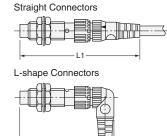

### Dimensions for Proximity Sensors with Sensor I/O Connectors Shielded Models Unshielded Models Di

L-shape Connectors

Dimensions with the XS2F Connected (Unit: mm)

| Dimension<br>Sensor diameter |    | L1         | L2         |  |
|------------------------------|----|------------|------------|--|
| M8                           |    | Approx. 75 | Approx. 62 |  |
| M12*                         | DC | Approx. 80 | Approx. 67 |  |
|                              | AC | Approx. 85 | Approx. 72 |  |
| M18                          |    | Approx. 85 | Approx. 72 |  |
| M30                          |    | Approx. 90 | Approx. 77 |  |

\* The overall length of the Sensor is different between AC and DC Models for Sensors with diameters of M12. This will change the dimension when the I/O Connector is connected.

### Dimensions with the XS3F Connected (Unit: mm)

| Dimension<br>Sensor diameter | L1         | L2         |
|------------------------------|------------|------------|
| M8                           | Approx. 65 | Approx. 54 |

### Accessories (Order Separately)

### Sensor I/O Connectors

Refer to Introduction to Sensor I/O Connectors for details.

#### **Read and Understand This Catalog**

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

### Warranty and Limitations of Liability

#### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

#### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

### **Application Considerations**

#### SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- · Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- · Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### **PROGRAMMABLE PRODUCTS**

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

### Disclaimers

#### CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

#### DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

#### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

#### ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

2012.4

## OMRON Corporation

In the interest of product improvement, specifications are subject to change without notice.

Industrial Automation Company

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию.

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России, а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научноисследовательскими институтами России.

С нами вы становитесь еще успешнее!
