

GENERAL DESCRIPTION

The SP510E is a highly integrated physical layer solution that is configurable to support multiple serial standards. It incorporates eight drivers and eight receivers (8TX/8RX), configurable for either differential (V.11 or V.35) or single ended (V.28 and V.10) signaling.

SP510E enables a Serial Communications Controller to implement a variety of serial port types including V.24, V.25, V.36, EIA-530, EIA-530-A, X.21, RS-232. The device architecture is designed to support the data and clock signals used in HDLC or SDLC serial ports as either DTE or DCE.

Operating configuration is programmable in system using the mode-select pins. The V.11 and V.35 modes include internal bus termination that may be switched in or out using the TERM_OFF pin.

The SP510E is ideal for space constrained applications. It requires only a single 5V supply for full operation. The V_L pin determines the receiver output voltage (V_{OH} , down to 1.65V), for interfacing with lower voltage CPUs and FPGAs. For single supply operation at 5V the V_L pin will be connected to V_{CC} .

Fully compliant V.28 and V.10 driver output voltages are generated using the onboard charge pump. Special power sequencing is not required during system startup. Charge pump outputs are internally regulated to minimize power consumption. The SP510E requires only four 1 μ F capacitors for complete functionality. The device may be put into a low power shutdown mode when not in active use.

All receivers have fail-safe protection to put outputs into an output-high state when inputs are open, shorted, or terminated but idle.

FEATURES

- Up to 52Mbps Differential Transmission Rates
- ± 15 kV HBM ESD Tolerance for Analog I/O Pins
- Integrated Termination Resistors for V.11/V.35
- Eight Drivers and Eight Receivers (8TX/8RX)
- Adjustable Logic Level Pin V_L (Down to 1.65V)
- Software Selectable Protocols with 3-Bit Word:
 - RS-232 (V.28)
 - EIA-530 (V.10 & V.11)
 - EIA-530A (V.10 & V.11)
 - X.21 (V.11)
 - RS-449/V.36
- Internal Line or Digital Loopback Testing
- Adheres to NET1/NET2 and TBR2 Requirements
- Easy Flow-Through Pinout
- Single +5V Supply Voltage
- Individual Driver/Receiver Enable/Disable Controls
- Operates in DTE or DCE Mode
- Pin Compatible Upgrade for SP509, SP508

TYPICAL APPLICATIONS

- Data Communication Networks
- Telecommunication Equipment
- Secured Data Communication
- CSU and DSU
- Data Routers
- Network Switches
- WAN Access Equipment
- VoIP-PBX Gateways

ORDERING INFORMATION

| PART NUMBER | PACKAGE | OPERATING TEMPERATURE RANGE | DEVICE STATUS |
|-------------|--------------|-----------------------------|---------------|
| SP510EEF-L | 100-pin LQFP | -40°C to +85°C | Active |
| SP510ECF-L | 100-pin LQFP | 0°C to +70°C | Active |

SP510E

ULTRA HIGH SPEED MULTIPROTOCOL TRANSCEIVER

REV. 1.0.1

ABSOLUTE MAXIMUM RATINGS

These are stress ratings only and functional operation of the device at these ratings or any other above those indicated in the operation sections of the specifications below is not implied. Exposure to absolute maximum rating conditions for extended periods of time may affect reliability.

| | |
|---|------------------------------|
| Supply Voltage V_{CC} | +7.0V |
| Logic-Interface Voltage (V_L) | $V_L \leq V_{CC}$ |
| Receiver DC Input Voltage | $\pm 15.5V$ |
| Input Voltage at TTL Input Pins | -0.3V to ($V_{CC} + 0.5V$) |
| Driver Output Voltage (from Ground) | -7.5V to +12.5V |
| Short Circuit Duration, TxOUT to GND | Continuous |
| Storage Temperature Range | -65°C to +150°C |
| Lead Temperature (soldering, 10s) | +300°C |
| Continuous Power Dissipation at $T_{AMB} = +70^\circ C$ 100-Pin LQFP (derate 19mW/°C above +70°C) $\theta_{JA} = 52.7^\circ C/W$, $\theta_{JC} = 6.5^\circ C/W$ | 1520mW |

ESD PROTECTION

| | | | |
|---------------------------|----------|----|------------------|

Thermal Considerations

High speed devices like the SP510E dissipate heat during normal operation. Actual power dissipation is a function of the switching frequency and loading. For maximum system performance and reliability designers should ensure sufficient air flow. Other commonly used methods for managing heat include heat sinks for higher powered devices, forced air flow (fans) and lower density board stuffing.

PCB Design

The use of multi layer printed circuit boards is recommended to provide both a better ground plane and a thermal path for heat dissipation. If possible, the ground plane should face the bottom of the package to form the thermal conduction plane. Two-sided printed circuit boards may be used where board dimensions and package count are small, but multi-layer boards allow for improved signal routing as well as improved signal integrity. A multi-layer board allows microstrip line techniques for high speed signal interconnections when the high speed signal lines on the inner layers.

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
