

LUXEONTX

Extreme efficacy that will transform
your next market leading luminaire

Introduction

LUXEON®TX emitters are illumination grade LEDs designed to deliver high efficacy with high flux density to enable directional and high-lumen applications. With *Freedom from Binning*™ and extreme performance, LUXEONTX emitters ensure system color point accuracy and provide lamp and luminaire designers with the flexibility to optimize for the highest possible efficacy or for low system cost, in vast Correlated Color Temperature (CCT) ranges at 70 CRI from 3000K to 6500K, at 80 and 85 CRI from 2700K to 5000K, and at 90 CRI from 2700K to 3000K.

Features

- Compact 3737 package
- Typical V_f of 2.8V and thermal resistance of 3K/W
- Hot tested at $T_j = 85^\circ\text{C}$
- *Freedom from Binning* - 3 & 5 SDCM
- Exceeds ENERGY STAR lumen maintenance requirements
- UL-recognized component [E352519] with level 4 enclosure consideration

Benefits

- High luminance for directional applications
- Optimized for extreme efficacy
- Excellent color consistency
- Proven reliability

Key Applications

- Downlights
- High Bay & Low Bay
- Indoor Area Lighting
- Lamps
- Outdoor

General Information

Product Nomenclature

LUXEON TX emitters are specified and binned “hot” under conditions comparable to those found in “real-world” lighting products. The test conditions for LUXEON TX are 700 mA DC with junction temperature at 85°C.

The base part number designation is explained as follows:

L I T 2 – x x y s 0 0 0 0 z z z 0

Where:

- xx — designates nominal ANSI CCT (27 for 2700K, 30 for 3000K)
- yy — designates minimum CRI performance (70 for 70 CRI, 80 for 80 CRI)
- s — designates SDCM (0 for full distribution, 3 for 3-step SDCM, 5 for 5-step SDCM)
- zzz — designates minimum flux level at standard binning current and temperature (210 for 210 lm, etc.)

Therefore, 80 CRI 3-step SDCM products tested and binned at 3000K with a 210 lm minimum flux at binning current and temperature will have the part numbering scheme:

L I T 2 – 3 0 8 0 3 0 0 0 0 2 1 0 0

The base part numbers referred to in this document in the following format indicate full flux and color distribution:

L I T 2 – x x y y 0 0 0 0 0 0 0 0

Average Lumen Maintenance Characteristics

LUXEON TX products are tested in compliance with LM-80. Please visit the LM-80 documentation site at www.philipslumileds.com/support/documentation/lumen-maintenance or contact your local Philips Lumileds Technical Solutions Manager for TM-21 extrapolations or other support.

Environmental Compliance

Philips Lumileds is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON TX complies with the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS and REACH directives. Philips Lumileds will not intentionally add the following restricted material to the LUXEON TX: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Product Selection

Product Selection Guide for LUXEON TX Emitters, Junction Temperature = 85°C

Table I.

Typical Performance Characteristics

5700K	LIT2-5770000000000	2.5	3.25	-1.6	3
6500K	LIT2-6570000000000	2.5	3.25	-1.6	3

Notes for Table 3:

1. Philips Lumileds maintains a tolerance of $\pm 0.06V$ on forward voltage measurements.
2. Measured between $T_j = 25^\circ C$ and $T_j = 110^\circ C$ at $I_f = 700$ mA.

Absolute Maximum Ratings

Table 4.

Parameter	LUXEONTX	
DC Forward Current ^{[1][2]}	1050 mA	1200 mA
Peak Pulsed Forward Current ^{[1][3]}	1200 mA	1350 mA
LED Junction Temperature ^[1]	150°C	135°C
ESD Sensitivity	< 8000V Human Body Model (HBM) Class 3A per JEDEC JS-001-2012	
Operating Case Temperature at 700 mA	-40°C - 135°C	
Storage Temperature	-40°C - 135°C	
Soldering Temperature	JEDEC 020c 260°C	
Allowable Reflow Cycles	3	
Reverse Voltage (V_r) ^{[4][5]}	LUXEONTX LEDs are not designed to be driven in reverse bias	

Notes for Table 4:

1. Proper current derating must be observed to maintain junction temperature below the maximum. For additional information on thermal measurement guidelines please refer to Application Brief AB106.
2. Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple", with frequencies ≥ 100 Hz and amplitude ≤ 150 mA are acceptable, assuming the average current throughout each cycle does not exceed the maximum allowable DC Forward Current at the corresponding maximum junction temperature.
3. Pulsed operation with a peak drive current equal to the stated Peak Pulsed Forward Current is acceptable if the pulse on-time is ≤ 5 ms per cycle and the duty cycle is $\leq 50\%$.
4. Transient reverse voltages and surge currents due to electrical switching or supply interruptions are acceptable if these events do not last for more than 10ms, the amplitude of the reverse voltage does not exceed 5V and the reverse current is less than 200 μA .
5. Max 5V reverse for up to 10s is an acceptable beginning of life, one time test condition.

JEDEC Moisture Sensitivity

Table 5.

Level	Floor Life		Soak Requirements Standard	
	Time	Conditions	Time	Conditions
I	unlimited	≤ 30°C / 85% RH	168h + 5 / - 0	85°C / 85% RH

Reflow Soldering Characteristics

Figure 1. Temperature profile for Table 6.

Table 6.

Profile Feature	Lead Free Assembly
Average Ramp-Up Rate ($T_{s_{max}}$ to T_p)	3°C / second max
Preheat Temperature Min ($T_{s_{min}}$)	150°C
Preheat Temperature Max ($T_{s_{max}}$)	200°C
Preheat Time ($t_{s_{min}}$ to $t_{s_{max}}$)	60 - 180 seconds
Liquidus Temperature (T_L)	217°C
Time Maintained Above Time (t_L)	60 - 150 seconds
Peak / Classification Temperature (T_p)	260°C
Time Within 5°C of Actual Peak Temperature (t_p)	20 - 40 seconds
Ramp-Down Rate	6°C / second max
Time 25°C to Peak Temperature	8 minutes max

Mechanical Dimensions

Figure 2.

Notes for Figure 2:

1. Do not handle the device by the lens. Excessive force on the lens may damage the lens itself or the interior of the device.
2. Drawings not to scale.
3. All dimensions are in millimeters.
4. The thermal pad is electrically isolated from the anode and cathode contact pads.

Solder Pad Design

Figure 3. Solder pad layout.

Notes for Figure 3:

1. All dimensions are in millimeters.
2. The figure shows the recommended LUXEON TX layout on Printed Circuit Board (PCB).
3. For more information on assembly and layout, please refer to Application Brief 106 (AB106).
4. The .dwg files are available at www.philipslumileds.com and www.philipslumileds.cn.com.

Product Binning and Labeling

Purpose of Product Binning

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical data sheets. For this reason, Philips Lumileds bins the LED components for luminous flux and forward voltage (V_f). Color is offered in a single 3-step or 5-step MacAdam ellipse color space centered on the ANSI CCT color bins. For additional information please review the MacAdam ellipse technical definition section.

Decoding Product Bin Labeling

LUXEON TX emitters are labeled using a four digit alphanumeric CAT code following the format below:

ABCD

A
Flux Bin
see flux bin table

B	
Nominal ANSI CCT	
1	6500K
2	5700K
3	5000K
5	4000K
6	3500K
7	3000K
8	2700K

C	
SDCM Definition	
3	3-step (80, 85, 90 CRI)
U	
L	
5	5-step (70 CRI)
A	5-step (80, 85, 90 CRI)
B	
C	
D	

D		
Vf	min	max
P	2.50V	2.75V
R	2.75V	3.00V
S	3.00V	3.25V

Product Binning and Labeling, Continued

Table 7 lists the standard photometric luminous flux bins for LUXEON TX emitters (tested and binned at 700 mA and $T_j = 85^\circ\text{C}$). Although several bins are outlined, product availability in a particular bin varies by production run and by product performance.

Not all bins are available in all colors.

Table 7. Flux Bins – White

Bin Code	Minimum Photometric Flux (lm)
G	160
H	170
J	180
K	190
L	200
M	210
N	220
P	230
Q	240
R	250

Note for Tables 8 & 9:

- Philips Lumileds maintains a tester tolerance of ± 0.005 on x, y color coordinates.

Who We Are

Philips Lumileds focuses on one goal: Creating the world's highest performing LEDs. The company pioneered the use of solid-state lighting in breakthrough products such as the first LED backlit TV, the first LED flash in camera phones, and the first LED daytime running lights for cars. Today we offer the most comprehensive portfolio of high quality LEDs and uncompromising service.

Philips Lumileds brings LED's qualities of energy efficiency, digital control and long life to spotlights, downlights, high bay and low bay lighting, indoor area lighting, architectural and specialty lighting as well as retrofit lamps. Our products are engineered for optimal light quality and unprecedented efficacy at the lowest overall cost. By offering LEDs in chip, packaged and module form, we deliver supply chain flexibility to the inventors of next generation illumination.

Philips Lumileds understands that solid state lighting is not just about energy efficiency. It is about elegant design. Reinventing form. Engineering new materials. Pioneering markets and simplifying the supply chain. It's about a shared vision. Learn more about our comprehensive portfolio of LEDs at www.philipslumileds.com.

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
