

LTC6957-3/LTC6957-4

Low Phase Noise, Dual CMOS Output Buffer/Driver/Logic Converter

DESCRIPTION

Demonstration Circuit 1766A features the LTC[®]6957-3/LTC6957-4, a low phase noise, dual CMOS output buffer/driver/logic converter.

The DC1766A provides SMA connectors for the differential inputs and the CMOS outputs. The inputs are terminated to on-board 50Ω resistors and the outputs present similar impedance. The DC1766A allows the user to take advantage of the shutdown and bandwidth selection features of the LTC6957. The DC1766A can operate with a single-ended or

differential sine wave or square-wave input signal. Supply the DC1766A with 3.3V and it is ready to function. Or, the output can be powered from a lower voltage supply if a lower voltage CMOS driver is desired. The DC1766A gives extra component population options to make it compatible with different logic signal types.

Design files for this circuit board are available at

DEMO MANUAL DC1766A

QUICK START PROCEDURE

The DC1766A is very straightforward to operate. Refer to Figure 1 for the following discussion.

DC1766A Configuration

1. Apply a low-noise and low-spurious 3.3V supply between the V+ (E1) and GND (E2) turrets.
2. Make sure that jumper VDD (JP7) is at the V+ position if 3.3V CMOS output operation is desired. Otherwise, apply a voltage that is between 2.4V and 3.3V between the VDD (E4) and GND (E3) turrets, and move jumper VDD (JP7) to EXT position to operate the CMOS outputs at the voltage level supplied at the VDD turret.
3. Connect a low phase noise (or jitter) single-ended or differential input signal to IN+ (J1) and/or IN- (J2) SMA connectors. Refer to the LTC6957 data sheet for appropriate input signal types and levels.
4. Connect either of the outputs (OUT1, J3 or OUT2, J4) to a high-speed scope, spectrum analyzer or a signal analyzer to start the evaluation of the LTC6957.

NOTE: The CMOS outputs of the DC1766A are AC-coupled and attenuated through two 100Ω resistors as shown in the DC1766A schematic diagram to present a 50Ω source impedance appropriate to connect to a 50Ω input impedance instrument.

5. Configure the input bandwidth of the LTC6957 with the use of FILTA (JP1) and FILTB (JP2) jumpers. Follow the instructions given in the LTC6957 data sheet to choose the correct bandwidth given an input signal.
6. Shut down an unused output by using jumper SD1 (JP3) to shutdown OUT1 or jumper SD2 (JP4) to shutdown OUT2.

DC1766A Reconfiguration

The DC1766A is flexible and allows the connectivity of a variety of input and output signal types. The DC1766A is configured as shown in the schematic diagram. However, the DC1766A allows the installation of different input and output configurations to adapt to a variety of logic signals. Refer to the Applications Information section of the LTC6957 data sheet for all possible connectivity options that can be implemented by modifying the DC1766A.

ASSEMBLY OPTIONS

Table 1. DC1766A Assembly Options

ASSEMBLY VERSION	PART NUMBER	OUTPUT TYPE
DC1766A-A	LTC6957HMS-3	In-Phase CMOS
DC1766A-B	LTC6957HMS-4	Complementary CMOS

AYOUT TOP LAYER

The top metal layer of the DC1766A is shown here as an example of good PCB layout for the LTC6957-3/LTC6957-4.

DEMO MANUAL DC1766A

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No license is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
