1 Description

The **PSR-...-24DC/ESD/5X1/1X2/...T...** safety relay can be used for emergency stop and safety door monitoring in safety circuits according to DIN EN 60204-1/VDE 0113-1.

With this switching device, circuits are interrupted in a safety-oriented manner. Single-channel or two-channel control is available, either with an automatic or a manual start circuit. A connected reset button (connected to S33/S34) is monitored.

Depending on the external wiring, up to category 4, PL e according to EN ISO 13849-1 or SIL 3 according to IEC 61508 (EN 62061) can be achieved.

The safety relay is equipped with three enabling current paths that drop out without delay corresponding to stop category 0. Two other enabling current paths drop out with delay corresponding to stop category 1.

Features

- Emergency stop and safety door monitoring
- suitable up to category 4, PL e (EN ISO 13849-1), SIL 3 (IEC 61508)
- Single-channel or two-channel wiring with cross-circuit detection
- Three undelayed and two delayed enable contacts
- Fixed delay time of 0.5 to 30 s
- Automatic or manual start circuit
- Choice of screw or spring-cage terminal blocks

\triangle	WARNING: Risk of electric shock Observe the safety instructions in the corresponding section.
i	Make sure you always use the latest documentation. It can be downloaded from the product at phoenixcontact.net/products.

7 Safety notes

WARNING: Risk of electric shock

During operation, parts of electrical switching devices carry hazardous voltages.

Before working on the switching device, disconnect the power.

Please observe the safety regulations of electrical engineering and industrial safety and liability associations.

Disregarding these safety regulations may result in death, serious personal injury or damage to equipment.

Startup, mounting, modifications, and upgrades should only be carried out by a skilled electrical engineer!

WARNING: Risk of automatic machine restart!

For emergency stop applications, the machine must be prevented from restarting automatically by a higher-level control system.

Protective covers must not be removed when operating electrical switching devices.

WARNING: Danger due to faulty devices!

The devices may be damaged following an error and correct operation can no longer be ensured.

In the event of an error, replace the device immediately.

Repairs to the device, especially if the housing must be opened, may only be carried out by the manufacturer or authorized persons. Otherwise the warranty is invalidated.

NOTE: Risk of damage to equipment due to incorrect installation

For reliable operation, the safety relay must be installed in housing protected from dust and humidity (IP54).

Carry out wiring according to the application. Use the Application Examples section for this purpose.

NOTE: Risk of damage to equipment due to noise emissions

When operating relay modules the operator must meet the requirements for noise emission for electrical and electronic equipment (EN 61000-6-4) on the contact side and, if required, take appropriate measures.

9 Diagnostics

The diagnostic descriptions can be found in Section 7 of the application manual for PSR safety relays.

10 Application example

10.1 Two-channel emergency stop circuit with cross-circuit detection

- Manual activation via monitored reset button at S33/ S34
- Automatic activation with jumper at S33-S35
- suitable up to category 4, PL e (EN ISO 13849-1), SIL 3 (IEC 61508)

Figure 4 Two-channel emergency stop circuit with cross-circuit detection

10.2 Single-channel emergency stop circuit

- Manual activation via monitored reset button at S33/ S34
- Automatic activation with jumper at S33-S35
- Suitable up to category 1, PL c (EN ISO 13849-1), SIL
 1 (IEC 61508)

10.3 Two-channel monitoring with semiconductor output

- Manual activation via monitored reset button at S33/ S34
- Automatic activation with jumper at S33-S35
- suitable up to category 4, PL e (EN ISO 13849-1), SIL 3 (IEC 61508)

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию.

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России, а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научноисследовательскими институтами России.

С нами вы становитесь еще успешнее!
