

Manufactured in line with the requirements of MIL 18546 and IEC 115, designed for direct heatsink mounting with thermal compound to achieve maximum performance.

- High Power to volume
- Wound to maximise High Pulse Capability
- Values from R005 to 100K
- Custom designs welcome
- RoHS Compliant

## Characteristics

|                                    |                                                                                                          |
|------------------------------------|----------------------------------------------------------------------------------------------------------|
| Tolerance (Code):                  | Standard $\pm 5\%$ (J) and $\pm 10\%$ (K). Also available $\pm 1\%$ (F), $\pm 2\%$ (G) and $\pm 3\%$ (H) |
| Tolerance for low $\Omega$ values: | Typically $\geq R05 \pm 5\% \leq R047 \pm 10\%$                                                          |
| Temperature coefficients:          | Typical values $< 1K$ 100ppm Std. $> 1K$ 25ppm Std. For lower TCR's please contact Arcol                 |
| Insulation resistance (Dry):       | 10,000 M $\Omega$ minimum                                                                                |
| Power dissipation:                 | At high ambient temperature dissipation derates linearly to zero at 200°C                                |
| Ohmic values:                      | From R005 to 100K depending on wattage size                                                              |
| Low inductive (NHS):               | Specify by adding N before HS Series code, e.g. NHS50                                                    |
| NHS ohmic value:                   | Divide standard HS maximum value by 4                                                                    |
| NHS working volts:                 | Divide standard HS maximum working voltage by 1.414                                                      |

## Temp. Rise & Power Dissipation

Surface temperature of resistor related to power dissipation. The resistor is standard heatsink mounted using a proprietary heatsink compound.

## Heat Dissipation

Heat dissipation: Whilst the use of proprietary heat sinks with lower thermal resistances is acceptable, uprating is not recommended. For maximum heat transfer it is recommended that a heat sink compound be applied between the resistor base and heat sink chassis mounting surface. It is essential that the maximum hot spot temperature of 200°C is not exceeded, therefore, the resistor must be mounted on a heat sink of correct thermal resistance for the power being dissipated.

## Ordering Procedure

Standard Resistor. To specify standard: Series, Watts, Ohmic Value, Tolerance Code, e.g.: HS25 2R2 J

Non Inductive Resistor. To specify add N, e.g.: NHS100 10R J

The figure shows three technical drawings of gear pumps, each with front and side views.

- HS 10, 15, 25, 50:** The front view shows dimensions B (total width), E (flange width), F (distance between mounting holes), G (height), A (total height), J (hole offset), L (mounting hole diameter), and a shaft diameter of  $\varnothing 2.0 \pm 0.25$ . The side view shows dimensions C (gear face width), D (pitch circle diameter), H (gear addendum), and K (key width).
- HS 75, 100, 150:** Similar to the first pump, but with a maximum shaft diameter of  $\varnothing 3.2$  max. It also includes a note: "Centre hole in each flange is in 150 Watts only".
- HS 200, 250, 300:** This larger pump has additional dimensions M (width between end flanges) and N (end flange thickness). The shaft diameter is specified as 6mm.

| Size  | A Max | B Max | C Max | D Max | E Max | F±0.3 | G±0.3 | H Max | J Max | K Max | L ±0.25* | M Max |

**Стандарт  
Электрон  
Связь**

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
