

Model: 485OPDR
Industrial DIN Rail Mounted
RS-422/485 Line Isolator / Repeater

Features

- ✓ **High Speed Communications.** Supports data rates up to 460.8 kbps.
- ✓ **Extended Communications.** Supports distances up to 1,200 m (4,000 ft).
- ✓ **Wide Operating Temperature, -40° to 80° C (-40° to 176° F).**
- ✓ **Modbus ACSII or RTU Compatible.**
- ✓ **2000 V 2-way Optical Isolation.** Reliable in harsh electrical environments.

Functional Description

The 485OPDR provides 2-way optical isolation between one piece of RS-422/485 equipment and the remainder of the network. As a repeater, it extends the distance of an existing network and expands it beyond the 32-node limitation. All inputs connect to a terminal block. Data lines, power, and ground are isolated from one side of the repeater to the other. The device supports Transmit Data (A) and (B), Receive Data (A) and (B), Signal Ground, and Protective Ground. The 485OPDR operates in two-wire half-duplex, four-wire half-duplex, or four-wire full-duplex systems. Additionally, it will convert four-wire to two-wire. An external 10 to 30 VDC power supply is required (not included).

Ordering Information

Model Number	Description
485OPDR	RS-422/485 Isolator / Repeater
Accessories	
DR9FTB	Terminal Block to DB9 Female DIN Mountable Adapter
ERS35	Steel DIN Mounting Rail
DR-30-24	DIN Rail Mount Power Supply, 24 VDC
PS5R-A12	DIN Rail Mount Power Supply, 12 VDC
PS5R-A24	DIN Rail Mount Power Supply, 24 VDC

Operation

- The 485OPDR enables both receivers when it is not transmitting. When one side receives data, the opposite side enables its driver. The device waits one character time after receiving the falling edge of the last data bit before disabling the driver. This time-out is factory preset to about one millisecond, which accommodates a baud rate of 9,600 pits per second. Change the time-out by positioning the DIP Switches in accordance with Table 1. The switch selectable baud rates should accommodate most systems. Configure alternative time-outs by turning the baud rate switches OFF and placing a specific value through-hole resistor and/or through-hole capacitor on the circuit board near the switches.
- 4.7 K Ω pull-up/down resistors provide bias on the Data In lines. This value is adequate for most applications without termination. If necessary, add specific value through-hole resistors (R12, R21, R14, and R23).
- Refer to B&B's RS-422/485 Application Note and the Schematic Diagram before configuring non-standard baud rates and biasing. They are free and available for download. See the web links below table one. B&B's Technical Support staff will also assist with these configurations.
- Set the communications mode by positioning DIP Switches in accordance with Table 2.
- The DIP Switch settings for both sides of the converter are identical.
- The 485OPDR is factory pre-set to RS-485 2-wire, 9600 baud.
- Figures 1 through 3 illustrate various configurations. Figure 4 is a mechanical drawing, which shows the DIP Switch orientation.
- Refer to Table 3 to determine signals associated with each terminal on the terminal block.
- Two LED's indicate data flow.

Specifications

Input Power	+10 to 30 VDC
Isolation	2,000 VRMS for 1 Minute, Optical Isolation of data lines.
Surge Suppression	6.5 V working peak voltage, bi-directional, 600 W peak power dissipation.
Current Draw	67mA @ 12 VDC
Signal and Power Connection	Terminal Block
Data Rate	Switch Selectable 2400 to 115.2 kbps, See Table 1 for other data rates.
Operating Temperature	-40 to +80 °C (-40 to +176 °F)
Operating Humidity	0 to 95% Non-condensing
LED Indicators	2 data flow
Dimensions	3.9 x 2.9 x 0.9 in (10.0 x 7.4 x 2.3 cm)
DIN Mount	35 mm
MTBF	225,299 hours, based on MIL217F using Parts Count Reliability Prediction Method.
Approvals	CE, RoHS

CE Declaration of Conformity

**Стандарт
Электрон
Связь**

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
