16-Channel, Low Harmonic Distortion, High Voltage Analog Switch with Bleed Resistors

Features

- Low harmonic distortion
- Integrated bleed resistors on the outputs
- 3.3 or 5.5V CMOS input logic level
- 20MHz data shift clock frequency
- HVCMOS technology for high performance
- Very low quiescent power dissipation (-10µA)
- Low parasitic capacitance
- DC to 50MHz small signal frequency response
- CMOS logic circuitry for low power
- Excellent noise immunity
- Cascadable serial data register with latches
- Flexible operating supply voltages

Applications

- Medical ultrasound imaging
- NDT metal flaw detection
- Piezoelectric transducer drivers
- Optical MEMS modules

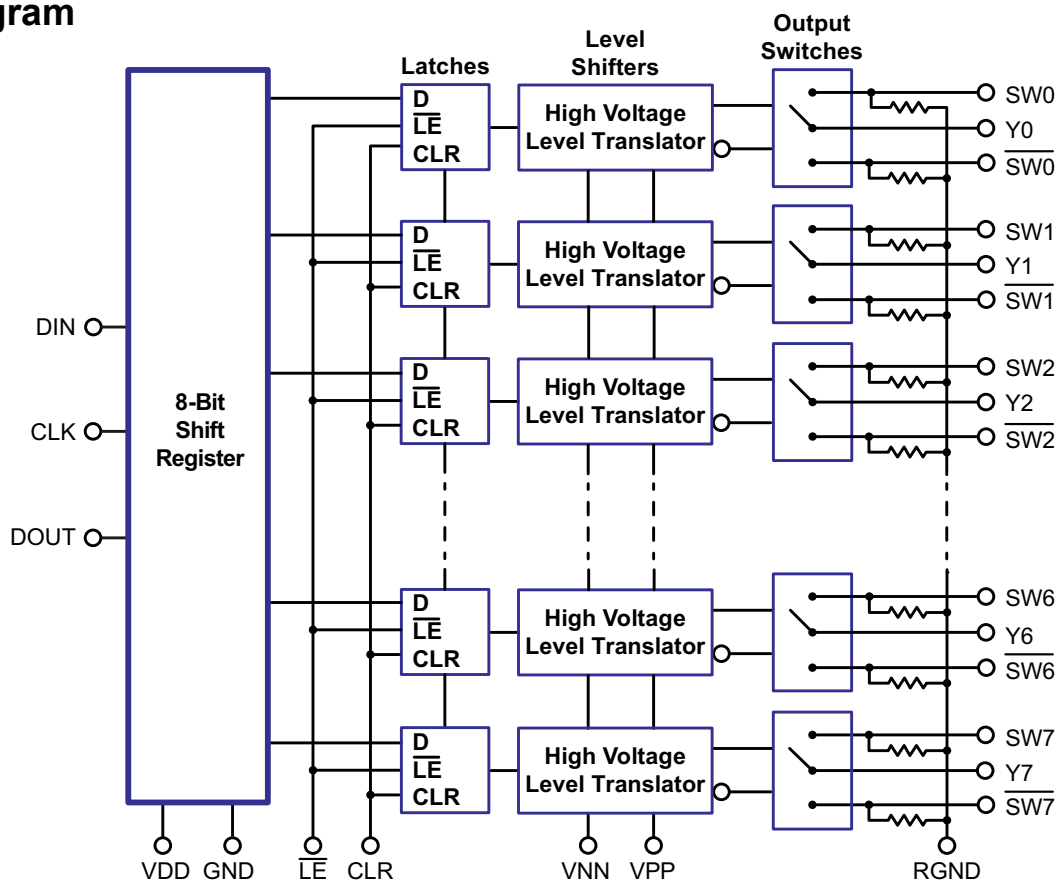
General Description

The Supertex HV2733 is a low charge injection, 16-channel, low harmonic distortion, high voltage analog switch integrated circuit (IC) intended for use in applications requiring high voltage switching, controlled by low voltage control signals, such as medical ultrasound imaging, piezoelectric transducer drivers, and printers. The bleed resistors eliminate voltage built up on capacitive loads such as piezoelectric transducers.

The outputs are configured as single-pole double-throw analog switches. Data are shifted into a 8-bit shift register using an external clock. The $\overline{LE}$ latches the shift register data into the individual switch latches. A logic high connects a switch common YX to SWX. A logic low connects YX to $\overline{SWX}$. A logic high in CLR resets all switches to $\overline{SWX}$ simultaneously.

To reduce any possible clock feed-through noise, the latch enable bar ($\overline{LE}$) should be left high until all bits are clocked in. Data are clocked in during the rising edge of the clock. Using HVCMOS technology, this device combines high voltage bilateral DMOS switches and low power CMOS logic to provide efficient control of high voltage analog signals.

Block Diagram



Ordering Information

Device	Package Option
	48-Lead LQFP *7.00x7.00mm body 1.60mm height (max) 0.50mm pitch*
HV2733	HV2733FG-G

-G indicates package is RoHS compliant ('Green')

Pin Configuration

Absolute Maximum Ratings

Parameter	Value
V_{DD} logic supply	-0.5V to +7.0V
V_{PP} - V_{NN} differential supply	220V
V_{PP} positive supply	-0.5V to +200V
V_{NN} negative supply	+0.5V to -200V
Logic input voltage	-0.5V to V_{DD} +0.3V
V_{SIG} analog signal range	V_{NN} to V_{PP}
Peak analog signal current/channel	2.5A
Storage temperature	-65°C to 150°C
Power dissipation, 48-Lead LQFP	1.0W

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.

Recommended Operating Conditions

Sym	Parameter	Value
V_{DD}	Logic power supply voltage	3.0V to 5.5V
V_{PP}	Positive high voltage supply	+40V to V_{NN} +200V
V_{NN}	Negative high voltage supply	-40V to -160V
V_{IH}	High level input voltage	0.9V_{DD} to V_{DD}
V_{IL}	Low level input voltage	0V to 0.1V_{DD}
V_{SIG}	Analog signal voltage peak-to-peak	V_{NN}+10V to V_{PP}-10V
T_A	Operating free air temperature	0°C to 70°C

Notes:

1. *Power up/down sequence is arbitrary except GND must be powered-up first and powered-down last.*
2. *V_{SIG} must be within V_{NN} and V_{PP} or floating during power up/down transition.*
3. *Rise and fall times of power supplies V_{DD}, V_{PP}, and V_{NN} should not be less than 1.0msec.*

DC Electrical Characteristics

(over recommended operating conditions unless otherwise noted)

Sym	Parameter	0°C		+25°C			+70°C		Units	Conditions

Notes:

1. *Serial data is clocked in on the L to H transition of the CLK.*
2. *All switches go to a state retaining their latched condition at the rising edge of $\overline{LE}$. When $\overline{LE}$ is low the shift registers data flow through the latch.*
3. *D_{OUT} is high when data in the shift register 7 is high.*
4. *Shift registers clocking has no effect on the switch states if $\overline{LE}$ is high.*
5. *The CLR clear input overrides all other inputs.*

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
