

MAX40002–MAX40005 Evaluation Kits

Evaluates: MAX40002–MAX40005
MAX40012–MAX40015

General Description

The MAX40002–MAX40005 evaluation kits (EV kits) are fully assembled and tested PC boards that evaluate the MAX40002ANS02–MAX40005ANS02 single comparators. The MAX40002ANS02–MAX40005ANS02 operate from a V_{CC} supply between 1.7V to 5.5V, come with an internal reference voltage of 0.2V, and have a wide 0.1V to 5.5V input voltage (IN) range. These EV kits demonstrate the MAX40002ANS02–MAX40005ANS02 in an ultra-small, 0.76mm x 0.76mm, 4-bump wafer-level package (WLP) with 0.35mm bump spacing.

These EV kits are configured to evaluate all devices in the MAX40002–MAX40005/MAX40012–MAX40015 family that have a 4-bump wafer-level package (WLP). To evaluate other WLP devices in this MAX40002–MAX40005/MAX40012–MAX40015 family other than what is pre-installed, replace the U1 IC with the desired part (see [Ordering Information](#) for details).

Features

- 0.1V to 5.5V Input Voltage Range
- 1.7V to 5.5V External Reference Range (MAX40002ANS–MAX40005ANS)
- 1.7V to 5.5V V_{CC} Range with Internal Reference (MAX40002ANS__–MAX40005ANS__)
 - 0.2V, 0.5V, 0.9V, and 1.222V Internal Reference Options Available
- Evaluates 4-Bump WLP Package
- Fully Assembled and Tested

[Ordering Information](#) appears at the end of the data sheet.

Quick Start

Required Equipment

Before beginning, the following equipment is needed:

- Three +5V DC power supplies (V_{CC} /REF, IN, and V_{PU})
- One digital multimeter (DMM)

Procedure

The MAX40002–MAX40005 EV kits are fully assembled and tested. Follow these steps to verify board operation. **Do not turn on the power supply until all connections are completed.**

- 1) Connect the positive terminal of a DC power supply to the V_{CC} pad and the ground terminal to the GND pad.
- 2) Connect the positive terminal of a DC power supply to the V_{PU} pad and the ground terminal to the GND pad (MAX40002/MAX40003/MAX40012/MAX40013 only).
- 3) Connect the positive terminal of a DC power supply to the IN pad and the ground terminal to the GND pad.
- 4) Turn on the V_{CC} power supply and set it to the desired level.
- 5) Turn on the V_{PU} power supply and set it to the desired level (MAX40002/MAX40003/MAX40012/MAX40013 only).
- 6) Turn on the IN power supply and set it to the desired level.
- 7) Monitor the output using a DMM at the OUT pad, and study its response to varying voltage at IN (see [Table 1](#) for more information).

Table 1. How Devices Behave Under Various Input Voltage Conditions

PART	V _{REF}	INPUT POLARITY	INPUT VOLTAGE CONDITIONS	ACTION AT OUTPUT
MAX40002, MAX40004 MAX40012, MAX40014	External	Noninverting	V _{IN} > V _{REF}	Output goes high
			V _{IN} < V _{REF}	Output goes low
Inverting		V _{IN} > V _{REF}	Output goes low	
		V _{IN} < V _{REF}	Output goes high	
MAX40002, MAX40004 MAX40012, MAX40014	Internal	Noninverting	V _{IN} > V _{REF_INT}	Output goes high
			V _{IN} < V _{REF_INT}	Output goes low
Inverting		V _{IN} > V _{REF_INT}	Output goes low	
		V _{IN} < V _{REF_INT}	Output goes high	

Detailed Description of Hardware

The MAX40002–MAX40005 EV kits are fully assembled and tested PC boards that evaluate the 4-bump WLP MAX40002ANS02–MAX40005ANS02 comparators.

V_{CC}/REF Supply Selection

The V_{CC}/REF pad on the EV kit is used to either supply a 1.7V to 5.5V V_{CC} voltage (internal reference devices) or a 1.7V to 5.5V external reference voltage to the IC. Refer to the MAX40002–MAX40005 and MAX40012–MAX40015 data sheets for more information.

V_{PU} Pad

The V_{PU} pad on the EV kit is used to connect a pullup supply voltage up to 5.5V for the open-drain output devices (MAX40002/MAX40003/MAX40012/MAX40013) for proper operation. Remove R1 and eliminate V_{PU} if evaluating the push-pull output devices (MAX40004/MAX40005/MAX40014/MAX40015).

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
