### EVAl BOARD USER'S MANUAL

#### Description

The NCV890430 is a fixed-frequency Synchronous Buck regulator intended for Automotive, battery-connected applications that operate with up to a 45 V input supply. It is suitable for automotive systems requiring low noise and low shutdown currents that also need to operate at low input voltage close to the output voltage. A reset pin (with adjustable delay) simplifies interfacing with a microcontroller. This part also features an enable input that can either be connected to a low voltage (such as a micro-controller output) or high voltage (such as the battery input), and a synchronization input. The NCV890430 also provides several protection features expected in automotive

power supply systems such as current limit, short circuit protection, and thermal shutdown. In addition, the high switching frequency produces low output voltage ripple even when using small inductor values and all-ceramic input and output filter capacitors – forming a space-efficient switching regulator solution.

Bottom Side

Figure 1. Evaluation Board Photo

#### Features and Benefits

- Internal 550 mΩ P Channel and 300 mΩ N-Channel Power Switches
- Capable of 100% Duty Cycle Operation
- $V_{IN}$  Operating Range 3.5 V to 37 V, Withstands Load Dump to 45 V
- 2 MHz Free-running Switching Frequency
- Shutdown Current Less than 10  $\mu$ A
- High Voltage Enable Pin
- Synchronization Input Pin

- Maximum DC Output Current of at Least 0.6 A
- Fixed Output Voltages of 2.5 V, 3.3 V or 5.0 V with  $\pm 2\%$  Accuracy

#### Typical Applications

- Automotive Infotainment and Instrumentation
- Automotive Body Applications
- Linear Regulator Replacement
- Rear View Camera

## TYPICAL APPLICATION

Figure 3. NCV890430 Typical Application Diagram

**Table 1. EVALUATION BOARD TERMINALS**

Pin Number	Pin Name	Function
1	VIN	Input voltage from battery. Place an input filter capacitor in close proximity to this pin.
2	RSTB	Reset reporting flag. Open drain output, pulling down to ground when the output voltage is out of regulation. The value of the external pull-up resistor determines the delay time that the Reset is held low.
3	GND	Analog ground reference – should be connected directly to the output capacitor ground and the exposed pad.
4	EN	Enable input. Connecting a “high” voltage (TTL compatible, battery voltage tolerant) to this pin turns on the regulator. A low voltage forces the part into a very low Iq shutdown mode.
5	VOOUT	Output voltage sensing for regulation.
6	SYNC	Synchronization input. Connecting an external clock to this pin synchronizes switching to the rising edge of the SYNC signal.

**Table 2. ABSOLUTE MAXIMUM RATINGS**

(Voltages are with respect to GND)

Rating	Value	Units
DC supply voltage (VIN)	-0.3 to 45	V
DC supply voltage (EN)	-0.3 to 40	V
DC supply voltage (VOOUT)	-0.3 to 18	V
DC supply voltage (SYNC and RSTB)	-0.3 to 6	V
Storage Temperature Range	-55 to +150	°C

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

**Table 3. ELECTRICAL CHARACTERISTICS**

Characteristics	Conditions	Typical Value	Units
<b>Regulation</b>			
Output Voltage (NCV890430MW25GEVB)		2.5	V
Output Voltage (NCV890430MW33GEVB)		3.3	V
Output Voltage (NCV890430MW50GEVB)		5.0	V
<b>Switching</b>			
Switching Frequency		2.0	MHz
Soft-start Time		1.4	ms
Synchronization Frequency Range	2.5 V version 3.3 V and 5.0 V version	1.8 to 2.2 1.8 to 2.5	MHz
<b>Current Limit</b>			
Peak Current Limit		1.9	A
<b>Protections</b>			
Input Undervoltage Lockout (UVLO)	V <sub>IN</sub> decreasing	3.2	V
Input Overvoltage Protection	V <sub>IN</sub> increasing	37	V
Thermal Shutdown	T <sub>J</sub> rising	170	°C

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

**Quick-Start Guide**

The following steps will get you familiar with the setup of inputs and outputs of the NCV890430.

*Required Equipment*

- |   |             |
|---|-------------|
| 1 DC Source – $\geq 40$ V, $\geq 2$ A capable | VIN         |
| 1 Oscilloscope – 2 Channel minimum            | VOUT and SW |
| 1 Multi-meter                                 | VOUT        |
| 1 DC Electronic Load – 1 A capable            | ILOAD       |

1. Disconnect the EN jumper.
2. Connect DC source set to 13.2 V DC between the VIN and GND terminals in the center left of the evaluation board.
3. Connect a multi-meter or oscilloscope probe between the VOUT and GND terminals located in the center right of the evaluation board.
4. Connect the EN jumper between VIN to the EN input.

Verify that VOUT is:

- a.) 2.5 V  $\pm 2\%$  for NCV890430MW25GEVB
  - b.) 3.3 V  $\pm 2\%$  for NCV890430MW33GEVB
  - c.) 5.0 V  $\pm 2\%$  for NCV890430MW50GEVB
5. Apply a 600 mA load to VOUT.
    - a.) Verify that VOUT is at the necessary regulated voltage.
    - b.) Place a scope probe tip on the SW side of L1. It should show a stable 2 MHz pulsed

waveform with amplitude approximately between VIN and GND.

6. While at load, increase VIN to 21 V. Verify that the SW signal now shows a stable 1 MHz pulsed waveform with amplitude approximately between VIN and GND.
7. Increase VIN to 39 V. Verify the switching regulator turns off and there is 0 V at VOUT.
8. Reduce VIN to 13.2 V. Verify that VOUT is restored to the necessary regulated voltage and that the SW signal returns to a 2 MHz pulsed waveform with amplitude approximately between VIN and GND.
9. Remove the jumper between VIN the EN input. Verify the switching regulator turns off and there is 0 V at VOUT.
10. Disconnect all external connections from the board and restore the EN jumper.

**Soft Start**

The NCV890430 contains a battery-connectable EN pin for the regulator. A common setup includes the following connections:

EN  $\rightarrow$  VIN

When the EN connection on the board is as shown above, the following startup profile can be seen on an oscilloscope:

Figure 4. Typical NCV890430 Startup Profile

**EMI Filter**

In a typical application, an LC filter is used on the input line of a buck regulator to filter EMI from the device. On this demo board, an LC filter is pre-populated to allow you to perform EMI testing directly with this demo board.

LF1: 1.0  $\mu$ H  
CF1: 0.1  $\mu$ F

An input filter can drastically reduce the emissions from a switching regulator.

\*The Bills of Materials for all three evaluation boards covered in this user's manual are identical with the exception of the mounted device. This can be either NCV890430MW25TXG, NCV890430MW33TXG, or NCV890430MW50TXG.

ON Semiconductor and the ON Semiconductor logo are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at [www.onsemi.com/site/pdf/Patent-Marking.pdf](http://www.onsemi.com/site/pdf/Patent-Marking.pdf). ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.

The evaluation board/kit (research and development board/kit) (hereinafter the "board") is not a finished product and is as such not available for sale to consumers. The board is only intended for research, development, demonstration and evaluation purposes and should as such only be used in laboratory/development areas by persons with an engineering/technical training and familiar with the risks associated with handling electrical/mechanical components, systems and subsystems. This person assumes full responsibility/liability for proper and safe handling. Any other use, resale or redistribution for any other purpose is strictly prohibited.

The board is delivered "AS IS" and without warranty of any kind including, but not limited to, that the board is production-worthy, that the functions contained in the board will meet your requirements, or that the operation of the board will be uninterrupted or error free. ON Semiconductor expressly disclaims all warranties, express, implied or otherwise, including without limitation, warranties of fitness for a particular purpose and non-infringement of intellectual property rights.

ON Semiconductor reserves the right to make changes without further notice to any board.

You are responsible for determining whether the board will be suitable for your intended use or application or will achieve your intended results. Prior to using or distributing any systems that have been evaluated, designed or tested using the board, you agree to test and validate your design to confirm the functionality for your application. Any technical, applications or design information or advice, quality characterization, reliability data or other services provided by ON Semiconductor shall not constitute any representation or warranty by ON Semiconductor, and no additional obligations or liabilities shall arise from ON Semiconductor having provided such information or services.

The boards are not designed, intended, or authorized for use in life support systems, or any FDA Class 3 medical devices or medical devices with a similar or equivalent classification in a foreign jurisdiction, or any devices intended for implantation in the human body. Should you purchase or use the board for any such unintended or unauthorized application, you shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the board.

This evaluation board/kit does not fall within the scope of the European Union directives regarding electromagnetic compatibility, restricted substances (RoHS), recycling (WEEE), FCC, CE or UL, and may not meet the technical requirements of these or other related directives.

**FCC WARNING** – This evaluation board/kit is intended for use for engineering development, demonstration, or evaluation purposes only and is not considered by ON Semiconductor to be a finished end product fit for general consumer use. It may generate, use, or radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to part 15 of FCC rules, which are designed to provide reasonable protection against radio frequency interference. Operation of this equipment may cause interference with radio communications, in which case the user shall be responsible, at its expense, to take whatever measures may be required to correct this interference.

ON Semiconductor does not convey any license under its patent rights nor the rights of others.

**LIMITATIONS OF LIABILITY:** ON Semiconductor shall not be liable for any special, consequential, incidental, indirect or punitive damages, including, but not limited to the costs of requalification, delay, loss of profits or goodwill, arising out of or in connection with the board, even if ON Semiconductor is advised of the possibility of such damages. In no event shall ON Semiconductor's aggregate liability from any obligation arising out of or in connection with the board, under any theory of liability, exceed the purchase price paid for the board, if any.

## Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
