#### Recommended Component Values

| Reference Designator | Frequency (MHz) |         |        |       |       |       |       |
|----------------------|-----------------|---------|--------|-------|-------|-------|-------|
|                      | 50              | 500     | 900    | 1900  | 2200  | 2500  | 3500  |
| L1                   | 820 nH          | 220 nH  | 68 nH  | 27 nH | 22 nH | 18 nH | 15 nH |
| C1, C2, C4           | .018 µF         | 1000 pF | 100 pF | 68 pF | 68 pF | 56 pF | 39 pF |

- The proper values for the components are dependent upon the intended frequency of operation.
- The following values are contained on the evaluation board to achieve optimal broadband performance:

| Ref. Desig. | Value / Type             | Size |
|-------------|--------------------------|------|
| L1          | 39 nH wirewound inductor | 0603 |
| C1, C2      | 56 pF chip capacitor     | 0603 |
| C3          | 0.018 µF chip capacitor  | 0603 |
| C4          | Do Not Place             |      |
| R1          | 22.1 Ω 1% tolerance      | 0805 |

#### Recommended Bias Resistor Values

| Supply Voltage | R1 value  | Size |
|----------------|-----------|------|
| 5 V            | 22.1 ohms | 0603 |
| 6 V            | 51 ohms   | 0805 |
| 7 V            | 80 ohms   | 1206 |
| 8 V            | 108 ohms  | 1210 |
| 9 V            | 137 ohms  | 1210 |
| 10 V           | 166 ohms  | 1210 |
| 12 V           | 223 ohms  | 2010 |

The proper value for R1 is dependent upon the supply voltage and allows for bias stability over temperature. WJ recommends a minimum supply bias of +5 V. A 1% tolerance resistor is recommended.

### Mounting Config. Notes

- Ground / thermal vias are critical for the proper performance of this device. Vias should use a .35mm (#80 / .0135") diameter drill and have a final plated thru diameter of .25 mm (.010").
- Add as much copper as possible to inner and outer layers near the part to ensure optimal thermal performance.
- Mounting screws can be added near the part to fasten the board to a heatsink. Ensure that the ground / thermal via region contacts the heatsink.
- Do not put solder mask on the backside of the PC board in the region where the board contacts the heatsink.
- RF trace width depends upon the PC board material and construction.
- Use 1 oz. Copper minimum.
- All dimensions are in millimeters (inches). Angles are in degrees.
