

## ERRATA SHEET # 150320

### Date:

March 20, 2015

### Product:

XBee Development Kits

### Summary:

This errata sheet documents a resolution for a known issue with the USB port use on XBee® development board kits shipped prior to 2/23/15.

### Issue:

Some Digi XBee® development board kits were confirmed to exhibit a failure when powered through the USB port. The cause was found to be a variation on the voltage regulator that caused some USB circuits to not function properly. Specifically, the boards cause the FTDI chip to not enumerate when the power supply doesn't come up properly to 3.3v.

### Determining the failure:

If the board is able to consistently connect through the USB, it is considered ok and not prone to this issue. Because the issue is intermittent, we suggest the user verifies port connectivity three times in succession.

To verify if your board may be faulty, perform the following test:

- 1) Plug in the USB port to your PC
- 2) Open up "Device Manager" from your windows PC to make sure all USB units do not have errors. A faulty connection will show up as a USB icon with an exclamation mark. Below in image 1 is a screen shot highlighting a faulty USB connection

Image 1:

**Resolution:**

To resolve the issue, the barrel jack must be supplied with between 6v to 20v of power, prior to connecting the USB port. If the barrel jack is supplied with between 6v to 20v prior to the USB connection, the board will always function properly. However, the barrel jack must be connected first, followed by the USB to guarantee correct operation.

Most of the development kits include one or more 12V power supplies to power one or more boards. If your kit did not have a power supply and you need one, or would like to return your development board for a new fully functional unit, please see the “customer resolution” information and tables below.

**Customer Resolution:**

If you need a replacement power supply or wish to exchange any affected product, you may request an RMA from the Customer Service team. Please send your request to [DigiRMAs@digi.com](mailto:DigiRMAs@digi.com) or contact us by phone at 800-344-4273 Option 4. Please reference the Errata Sheet # along with Part Number and Quantity of the affected part(s).

If you have technical related concerns or questions about this notice please contact our technical support department via telephone at 801-765-9885 or submit a request online at <http://www.digi.com/support/eservice/>. Please reference the Errata Sheet # along with Part Number and Quantity of the affected part(s).

## Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
