

Cree® XLamp® XM-L Color LEDs

PRODUCT DESCRIPTION

The XLamp XM-L Color LED is a multi-color LED that provides high lumen output in a small package. Compared to discrete LEDs, XLamp XM-L Color LEDs reduce the distance between LED die, creating a small optical source for excellent optical control and efficient color mixing. XLamp XM-L Color LEDs can reduce LED system complexity by reducing the number of components required.

Cree XLamp XM-L Color LEDs bring high performance and quality of light to a wide range of lighting applications, including color-changing lighting, stage lighting, architectural lighting, indoor directional lighting, and entertainment lighting.

Notes:

- Cree maintains a tolerance of $\pm 7\%$ on flux and power measurements and ± 0.005 on chromaticity (CC_x, CC_y) measurements.
- Flux and chromaticity are measured with each LED die connected to independent drive circuits at 350 mA. The flux and chromaticity of each LED die within the XLamp XM-L Color LED package are measured individually.
