Features and benefits

- Suitable for fast rotating fields up to 600Hz.
- Conversion of the PWM output signal (symmetrical voltage components) of motor drives into a smooth sine wave with low residual ripple.
- Elimination of premature motor damage caused by high dv/dt, overvoltages, motor overheating and eddy current losses.
- Significantly increased service life of expensive (high-speed) motors.
- Reduction of the pulse load of motor drive IGBTs and the parasitic losses on long shielded motor cables.
- Less interference propagation towards neighboring equipment or lines.
- Advanced choke design to minimize filter losses and voltage drop.
- IP20 protection, touch-safe terminals and temperature monitoring function to increase overall equipment safety.

Typical applications

Motor drives and motors in high-speed applications, like:

- High-speed spindles
- Textile machinery
- Lasers
- Military appliances (400Hz)

Motor drive applications with medium to long motor cables and/or with multiple motors in parallel, like:

- Pumps
- Conveyors

* General purpose four-pole (1500r/min) AC induction motor rated 480V/50Hz.
** Exact value highly depends upon the motor cable type and length, switching frequency, motor frequency and further stray parameters within the system. Please contact your local Schaffner partner for individual application support.

Temperature monitoring function

All filters of this range are equipped with a temperature monitoring function. The built-in temperature sensor opens a potential-free contact in the case of filter overtemperature (>120°C). The maximum switching capability is 6A/250V. This function can be used, for example, in the input of a CNC controller or to interrupt the mains power supply. Connections are located next to the phase connectors (see mechanical data for details).

Forced cooling

The 75A and 120A filters provide internal cooling fans which require external power supply (24VDC/~4W). Connections are located next to the connectors of the temperature sensor (see mechanical data for details).

For additional information please consult the Schaffner application note „Sinus Plus – New Output Filter Concept for Power Drive Systems“.
