

TISP820xHDM Overvoltage Protectors

BOURNS®

Description

The TISP8200HDM/TISP8201HDM combination has been designed to protect dual polarity supply rail monolithic SLICs (Subscriber Line Interface Circuits) against overvoltages on the telephone line caused by lightning, a.c. power contact and induction. Protection against negative overvoltages is given by the TISP8200HDM. Protection against positive overvoltages is given by the TISP8201HDM. Both parts are in 8-SOIC (210 mil) surface mount packages.

The TISP8200HDM has an array of two buffered P-gate SCRs with a common anode connection. Each SCR cathode and gate has a separate terminal connection. The NPN buffer transistors reduce the gate supply current. In use, the cathodes of the TISP8200HDM SCRs are connected to the two conductors of the POTS line. The gates are connected to the appropriate negative voltage battery feed of the SLIC driving the line conductor pair, so that the TISP8200HDM protection voltage tracks the SLIC negative supply voltage. The anode of the TISP8200HDM is connected to the SLIC common. Negative overvoltages are initially clipped close to the SLIC negative supply by emitter follower action of the NPN buffer transistor. If sufficient clipping current flows, the SCR will regenerate and switch into a low voltage on-state condition. As the overvoltage subsides the high holding current of the SCR helps prevent d.c. latchup.

The TISP8201HDM has an array of two buffered N-gate SCRs with a common cathode connection. Each SCR anode and gate has a separate terminal connection. The PNP buffer transistors reduce the gate supply current. In use, the anodes of the TISP8201HDM SCRs are connected to the two conductors of the POTS line. The gates are connected to the appropriate positive voltage battery feed of the SLIC driving that line pair, so that the TISP8201HDM protection voltage tracks the SLIC positive supply voltage. The cathode of the TISP8201HDM is connected to the SLIC common. Positive overvoltages are initially clipped close to the SLIC positive supply by emitter follower action of the PNP buffer transistor. If sufficient clipping current flows the SCR will regenerate and switch into a low voltage on-state condition. As the overvoltage subsides the SLIC pulls the conductor voltage down to its normal negative value and this commutates the conducting SCR into a reverse biased condition.

How to Order

Device	Package	Carrier	Order As	Marking Code	Standard Quantity
TISP8200HDM	8-SOIC (210 mil)	Embossed Tape Reeled	TISP8200HDMR-S	8200H	2000
TISP8201HDM			TISP8201HDMR-S	8201H	

TISP8200HDM Absolute Maximum Ratings, $T_A = 25^\circ\text{C}$ (Unless Otherwise Noted)

Rating	Symbol	Value	Unit
Repetitive peak off-state voltage, $V_{GK} = 0$	V_{DRM}	-120	V
Repetitive peak reverse voltage, $V_{GA} = -70\text{ V}$	V_{RRM}	120	
Non-repetitive peak impulse current (see Notes 1, 2 and 3) 2/10 μs (Telcordia GR-1089-CORE, 2/10 μs voltage wave shape) 5/310 μs (ITU-T K.44, 10/700 μs voltage wave shape used in K.20/21/45) 10/1000 μs (Telcordia GR-1089-CORE, 10/1000 μs voltage wave shape)	I_{PPSM}	-500 -150 -100	A
Non-repetitive peak on-state current, 50/60 Hz (see Notes 1, 2, 3 and 4) 10 ms 1 s 7 s 900 s	I_{TSM}	60 14 7 3.5	A
Junction temperature	T_J	-55 to +150	$^\circ\text{C}$
Storage temperature range	T_{stg}	-65 to +150	$^\circ\text{C}$

- NOTES: 1. Initially the device must be in thermal equilibrium with $T_J = 25^\circ\text{C}$. The surge may be repeated after the device returns to its initial conditions.
2. These non-repetitive rated currents are peak values. The rated current values may be applied to any cathode-anode terminal pair.
3. Rated currents only apply if pins 1 & 8 (K1, Tip) are connected together, pins 4 & 5 (K2, Ring) are connected together and pins 6 & 7 (A, Ground) are connected together.
4. These non-repetitive rated terminal currents are for the TISP8200HDM and TISP8201HDM together. Device (A)-terminal positive current values are conducted by the TISP8201HDM and (K)-terminal negative current values by the TISP8200HDM.

Reliable Electronic Solutions

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
