

FEATURES**Very low voltage noise: 1 nV/ $\sqrt{\text{Hz}}$ maximum @ 100 Hz****Excellent current gain match: 0.5%****Low offset voltage (V_{OS}): 200 μV maximum****Outstanding offset voltage drift: 0.03 $\mu\text{V}/^\circ\text{C}$** **High gain bandwidth product: 200 MHz****GENERAL DESCRIPTION**

The SSM2212 is a dual, NPN-matched transistor pair that is specifically designed to meet the requirements of ultralow noise audio systems.

With its extremely low input base spreading resistance ($r_{bb'}$ is typically 28 Ω) and high current gain (h_{FE} typically exceeds 600 at $I_C = 1 \text{ mA}$), the SSM2212 can achieve outstanding signal-to-noise ratios. The high current gain results in superior performance compared to systems incorporating commercially available monolithic amplifiers.

Excellent matching of the current gain (Δh_{FE}) to about 0.5% and low V_{OS} of less than 10 μV typical make the SSM2212 ideal for symmetrically balanced designs, which reduce high-order amplifier harmonic distortion.

PIN CONFIGURATION*Figure 1. 8-Lead SOIC_N*

Stability of the matching parameters is guaranteed by protection diodes across the base-emitter junction. These diodes prevent degradation of beta and matching characteristics due to reverse biasing of the base-emitter junction.

The SSM2212 is also an ideal choice for accurate and reliable current biasing and mirroring circuits. Furthermore, because a current mirror's accuracy degrades exponentially with mismatches of V_{BE} between transistor pairs, the low V_{OS} of the SSM2212 does not need offset trimming in most circuit applications.

The SSM2212 performance and characteristics are guaranteed over the extended temperature range of -40°C to $+85^\circ\text{C}$.

| Collector-to-Collector Capacitance | C_{CC} | $V_{CC} = 0\text{ V}$ | | 35 | | pF |

¹ Current gain is guaranteed with collector-to-base voltage (V_{CB}) swept from 0 V to V_{MAX} at the indicated collector currents.

² Current gain match (Δh_{FE}) is defined as follows: $\Delta h_{FE} = (100(\Delta I_B)/(h_{FE\text{ min}})/I_C)$.

³ Noise voltage density is guaranteed, but not 100% tested.

⁴ This is the maximum change in V_{OS} as V_{CB} is swept from 0 V to 40 V.

⁵ Measured at $I_C = 10\ \mu\text{A}$ and guaranteed by design over the specified range of I_C .

⁶ Guaranteed by design.

⁷ I_{CC} and I_{CES} are verified by measurement of I_{CBO} .

ABSOLUTE MAXIMUM RATINGS

Table 2.

| Parameter | Rating |
|----------------------------------------------------------------------|-----------------|
| Breakdown Voltage of Collector-to-Base Voltage (BV_{CBO}) | 40 V |
| Breakdown Voltage of Collector-to-Emitter Voltage (BV_{CEO}) | 40 V |
| Breakdown Voltage of Collector-to-Collector Voltage (BV_{CC}) | 40 V |
| Breakdown Voltage of Emitter-to-Emitter Voltage (BV_{EE}) | 40 V |
| Collector Current (I_C) | 20 mA |
| Emitter Current (I_E) | 20 mA |
| Storage Temperature Range | -65°C to +150°C |
| Operating Temperature Range | -40°C to +85°C |
| Junction Temperature Range | -65°C to +150°C |
| Lead Temperature (Soldering, 60 sec) | 300°C |

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

THERMAL RESISTANCE

θ_{JA} is specified for the worst-case conditions, that is, a device soldered in a circuit board for surface-mount packages.

Table 3. Thermal Resistance

| Package Type | θ_{JA} | θ_{JC} | Unit |
|-------------------|---------------|---------------|------|
| 8-Lead SOIC (R-8) | 120 | 45 | °C/W |

ESD CAUTION

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

TYPICAL PERFORMANCE CHARACTERISTICS

$T_A = 25^\circ\text{C}$, $V_{CE} = 5\text{ V}$, unless otherwise specified.

APPLICATIONS INFORMATION

FAST LOGARITHMIC AMPLIFIER

The circuit of Figure 16 is a modification of a standard logarithmic amplifier configuration. Running the SSM2212 at 2.5 mA per side (full-scale) allows for a fast response with a wide dynamic range. The circuit has a 7 decade current range and a 5 decade voltage range, and it is capable of 2.5 μs settling time to 1% with a 1 V to 10 V step. The output follows the equation:

$$V_O = -\frac{R_3 + R_2}{R_2} \frac{kT}{q} \ln \frac{V_{REF}}{V_{IN}}$$

To compensate for the temperature dependence of the kT/q term, a resistor with a positive 0.35%/°C temperature coefficient is chosen for R_2 . The output is inverted with respect to the input and is nominally -1 V/decade using the component values indicated.

Стандарт Электрон Связь

Мы молодая и активно развивающаяся компания в области поставок электронных компонентов. Мы поставляем электронные компоненты отечественного и импортного производства напрямую от производителей и с крупнейших складов мира.

Благодаря сотрудничеству с мировыми поставщиками мы осуществляем комплексные и плановые поставки широчайшего спектра электронных компонентов.

Собственная эффективная логистика и склад в обеспечивает надежную поставку продукции в точно указанные сроки по всей России.

Мы осуществляем техническую поддержку нашим клиентам и предпродажную проверку качества продукции. На все поставляемые продукты мы предоставляем гарантию .

Осуществляем поставки продукции под контролем ВП МО РФ на предприятия военно-промышленного комплекса России , а также работаем в рамках 275 ФЗ с открытием отдельных счетов в уполномоченном банке. Система менеджмента качества компании соответствует требованиям ГОСТ ISO 9001.

Минимальные сроки поставки, гибкие цены, неограниченный ассортимент и индивидуальный подход к клиентам являются основой для выстраивания долгосрочного и эффективного сотрудничества с предприятиями радиоэлектронной промышленности, предприятиями ВПК и научно-исследовательскими институтами России.

С нами вы становитесь еще успешнее!
